Preface

1. Customer & TESS Definition

TESS Innovation Sdn Bhd is hereinafter referred as “TESS” of the other part in this document.

2. Document Confidentiality

This document contains information that is proprietary to TESS and The Customer. This document, or any part thereof, shall not be copied, reproduced, translated or reduced to any electronic medium or machine readable form or disclosed to any third party without the prior written consent or authorization of TESS and the Customer.

3. Purpose of Document

The purpose of this document is to clearly guide user to perform day by day operation

4. Intended Audience

- Project team from TESS
- Project team from The Customer

5. Document Control

This document is subject to change control. All changes to this document shall be documented and distributed as “Release Version”. It will consist of the following:-

- Full replacement of the document; or
- Full replacement of a section in the document; or
- An addendum to the document.

Each revision will be assigned with a unique “Release Version” number and date. All pages distributed within a Document Release Notice will have the appropriate Release Version and Release Date indicated.

6. Screenshots

All sample screenshots as attached are for the reader’s viewing purpose only. The actual screen displayed in the [iSEM.ai](#) system shall be based on the specification of The Customer’s as agreed upon.

7. Disclaimer

- All advice given or recommendations made in this document are made in good faith on the basis of the information provided and otherwise generally available or known to TESS at the time of writing.
- No advice given or statements or recommendations made shall be in any circumstances constitute or be deemed to constitute warranty by TESS as to the accuracy of such advices, statement and recommendations.
- Subject to the contents of the Supply of Software, Licensing and Service Agreement executed, TESS shall not be liable for any loss, expense, damage or claim arising out of the advice given or not given or statements made or omitted to be made in connection with this document.
- **This document is **subject to updates**. Please note that it may be revised periodically within the same version to reflect any changes.

8. Product Version

This document is based on product version 1.3. Any other product version may not be relevant to this specific document content and its information.

9. Abbreviation & Definitions

Abbreviation	Definition
TM	Transaction Monitoring
KYC	Know Your Customers
STR	Suspicious Transaction Report

1. About Transactions Monitoring (TM) □ Case Workflow

About: Each user will have cases created from the Portfolio to investigate suspicious activities. Users can view details, perform investigations, and raise an STR if the client is deemed suspicious.

1.1 Apps Process Flow to Manage Transaction Monitoring Case Workflow

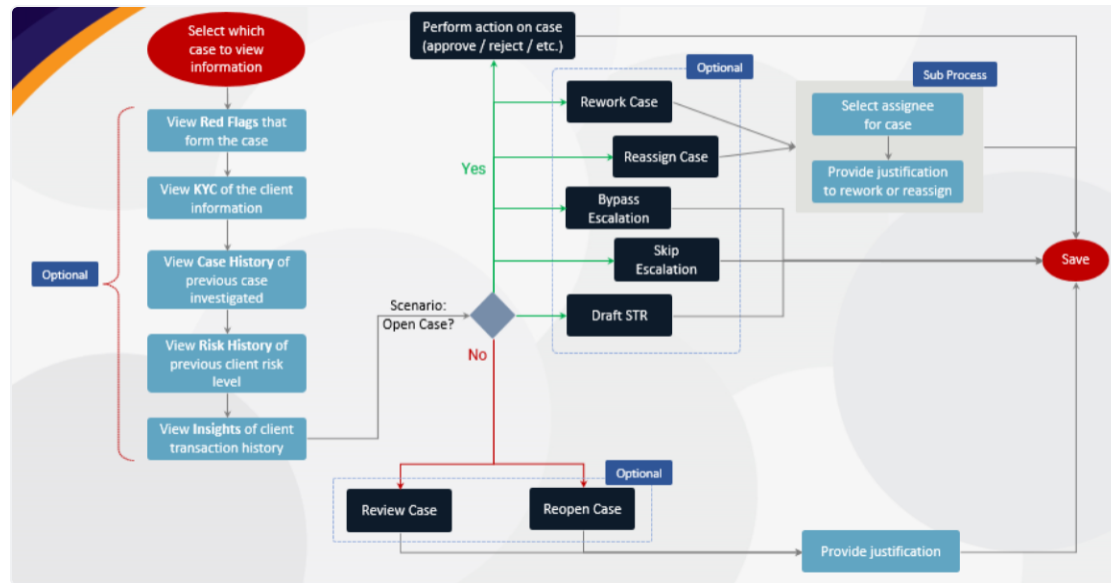

Figure 1.0: Apps Process Flow to Manage Transaction Monitoring Case Workflow

The figure above describes in general the case workflow features and function.

1. The case workflow list consists of two filtering tabs:
 - **My Cases** - Only displays cases assigned to the logged in user.
 - **All Cases** - Displays all cases available in the organization.

Default to **My Cases**.

3. Only cases which is closed that the new red flag generated can be escalate as a new case for investigation.
4. The case workflow table has a "**Columns**" button which allows users to choose which columns to display and which not to.

2. Case Workflow

2.1 Case Workflow □ Case Workflow List

2.1.1 How to View Cases List?

This section outlines how users can manage transaction case workflow list under "**Transaction Monitoring (TM)**".

Steps to View Transactions Case Workflow:

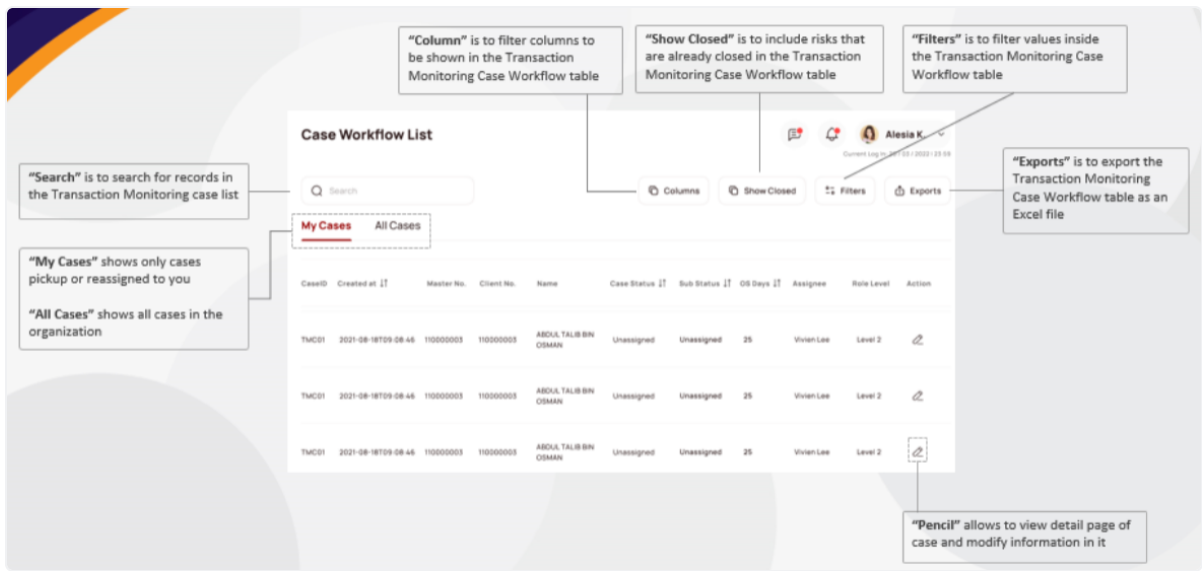

Figure 2.0: How to View Cases List

1. In this section, users can click **"My Cases"** tab to view all the onboard cases list picked up or reassigned to the user themselves.
2. Users can click **"All Cases"** tab to view all the onboard cases list in the organization.
3. If users want to filter columns of cases, click **"Columns"** tab to filter the searches.
4. If users want to include risks that are already closed in the onboard case together with the rest of the cases in the organization, click **"Show Closed"** tab.
5. If users want to filter values inside of onboard cases, click **"Filters"** tab to filter the searches.
6. If users want to export onboard case list as an Excel file, users can click the **"Exports"** tab.
7. For further information about onboard case details, users can click on the **"Pencil"** button.

My Cases:

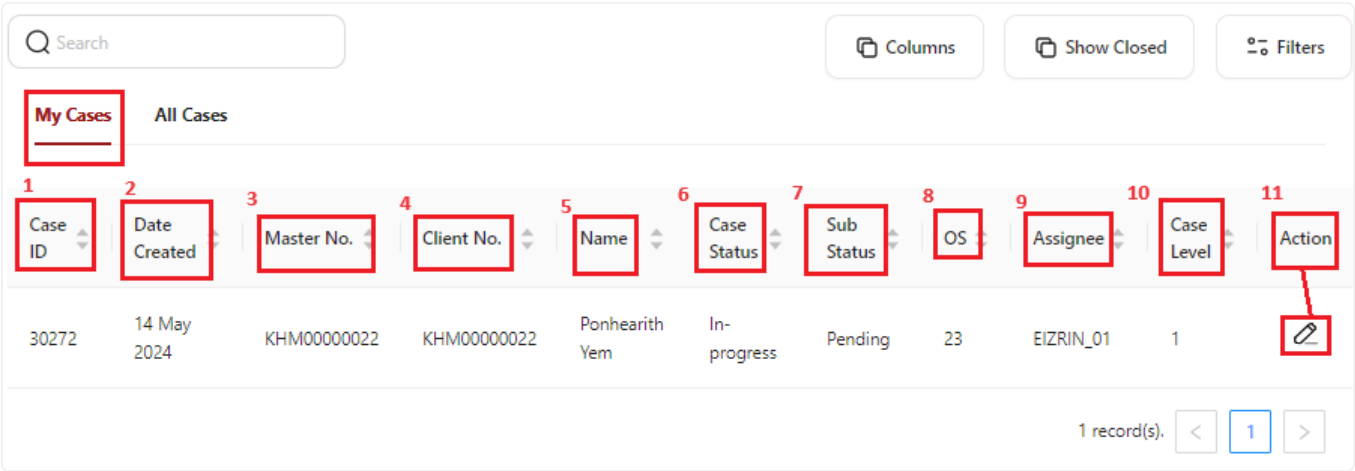

Figure 2.1: Display of 'My Cases' under Case Workflow List

This section only displays cases assigned to the logged in user.

#	Name	Description
1	Case ID	Module case primary key ID number.
2	Date Created	The date that the case first created and escalate for review.
3	Master No.	Display the primary number (CIF number, ID number, etc.).
4	Client No.	Display the client CIF ID or other golden unique number.
5	Name	Display the client's full name.
6	Case Status	The final status of the case.
7	Sub Status	The final sub status of the case.
8	OS	Display total days of the red flag is open and outstanding.
9	Assignee	Display the user's name who are investigating the case.
10	Case Level	Display the user's case workflow level.
11	Action	Pencil: Allow users to update the case and perform investigation to escalate the case.

All Cases:

My Cases										
All Cases										
1	2	3	4	5	6	7	8	9	10	11
Case ID	Date Created	Master No.	Client No.	Name	Case Status	Sub Status	OS	Assignee	Case Level	Action

30475	04 Jun 2024	21441414	21441414	Maria	In-progress	Pending	2	WMO_02	1	

Figure 2.2: Display of 'All Cases' under Case Workflow List

The table below displays all cases available in the organization:

#	Name	Description
1	Case ID	Module case primary key ID number.
2	Date Created	The date that the case first created and escalate for review.
3	Master No.	Display the primary number (CIF number, ID number, etc.).
4	Client No.	Display the client CIF ID or other golden unique number.

5	Name	Display the client's full name.
6	Case Status	The final status of the case.
7	Sub Status	The final sub status of the case.
8	OS (Outstanding)	Display total days of the red flag is open and outstanding.
9	Assignee	Display the user's name who are investigating the case.
10	Case Level	Display the user's case workflow level.
11	Action	Pencil: Allow users to update the case and perform investigation to escalate the case.

Functions of navigation buttons on Case Workflow page:

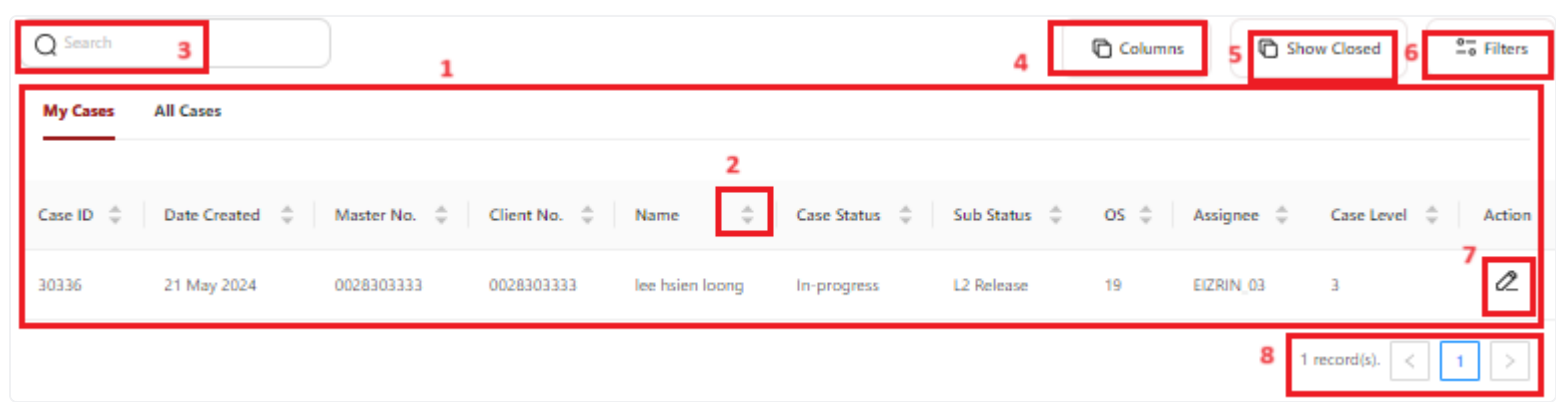

Figure 2.3: Display of general info panel located at the top of Case Workflow List page

The figure above explains each of the buttons and search functions at the Case Workflow List page screen:

#	Name	Description
1	Case workflow info	Displays the general information about the cases:
2	Sorting button	Click to sort based on ascending/descending format for each table's columns.
3	Search bar	Accepts user input to be searched for in database.
4	Columns	To show/hide columns of portfolio list of tables as desired.
5	Show Closed / Show Open	Allow users to display cases when click in the options of: - Show Closed : Display the list of closed cases - Show Open : Display the list of open / in progress cases
6	Filters	To search any information related to the table's column data. Can combine multiple data column using AND

		• The filtering should display the item description instead the operator type. • Condition for filtering item type: =, >, <, >=, <=, <>
7	Action button	Allow the user to update the case and perform an investigation to escalate the case.
8	Pagination	• Can display 10/20/50/100 records of the client's portfolio per page. • Can Click the button to search for the next or previous page of records.

2.2 Case Workflow List □ Case Workflow Detail

2.2.1 How to View Case Workflow Information?

This section outlines how the users can view transactions case workflow information.

Steps to View Case Workflow Information:

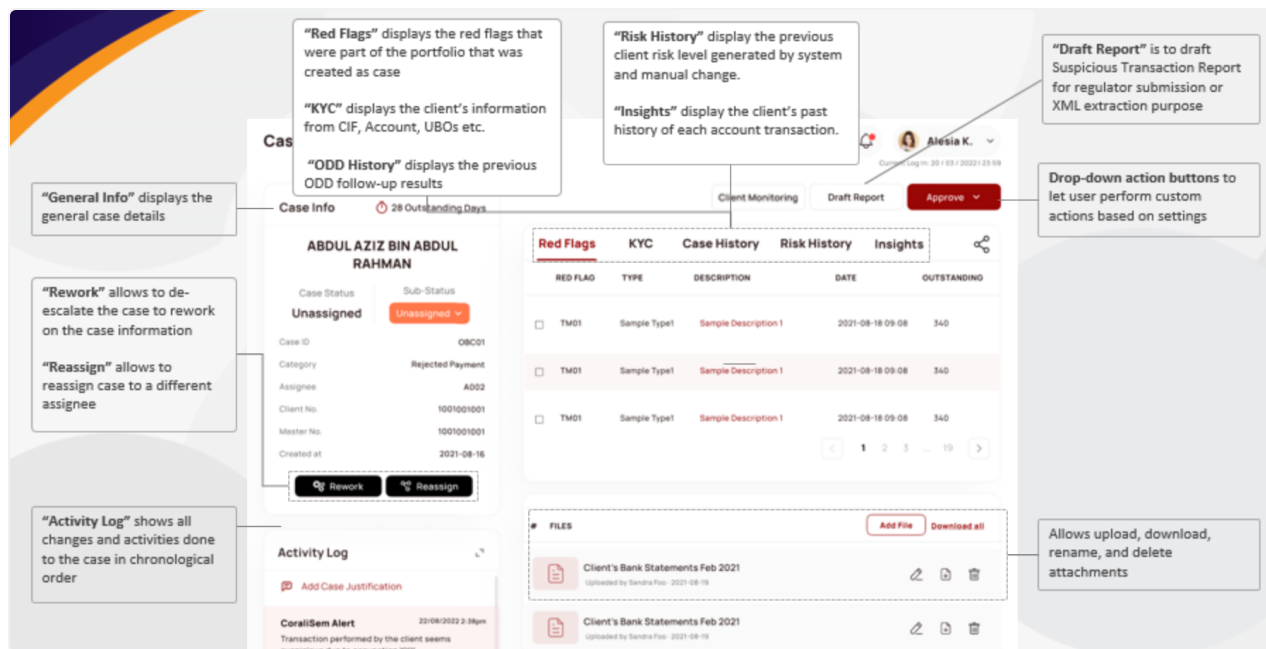

Figure 2.4: How to View Case Workflow Information

1. **Red Flag:** Allow users to view the details of red flags generated. Can also display based by Red Flags match record; where allow users to view details of the red flags match results hit against which watchlist record.
2. **KYC:** Allows users to view the client's information.
3. **Case History:** - Case History summary - case history table.
4. **Risk History:** Allows users to view any past risk changes history built on the client's portfolio.

5. **Insights:** Allows users to view the client's past history of each account transaction performed.

2.3 Case Workflow List □ Draft Report

2.3.1 How to Submit Draft Report Manually?

This section outlines how compliance users can submit draft reports manually.

The general case info panel on the left side of the page. The information displayed in the table below:

#	Name	Description
1	Outstanding Days (OS Days)	Display total days of the red flag is open and outstanding.

2	Full Name	Display the client's full name.
3	Case Status	Display the final status of the case.
4	Sub Status	Display the final sub status of the case.
5	Case ID	Display module case primary key ID number. Each module is unique with prefix.
6	Assignee	Display the user's name who are investigating the case.
7	Client No.	Display the client CIF ID or other golden unique number.
8	Master No.	Display the primary number (CIF number, ID number, etc.).
9	Created on	The date that the case first created and escalate for review.
10	Rework button	- Only available for escalated cases. Allow user to de-escalate the case to rework on the case information. - Can be configured whether the workflow can rework case under Setting – WM: Case Template.
11	Reassign button	Allow user to save the reassign case to a different assignee.

2.4.1 How to Rework and Reassign Case?

This section outlines how compliance users can rework and reassign cases while investigating red flags.

Steps to Rework and Reassign Case:

The diagram illustrates the process of reworking and reassigning a case. It features two side-by-side screenshots of the user interface, with callouts explaining the functionality of specific fields.

Left Screenshot: Rework Case

- Header:** Rework Case (with a close button 'X').
- Current Assignee:** A002.
- Form Fields:**
 - Select a location:** A dropdown menu with 'Petaling Jaya' selected.
 - Select assignee:** A dropdown menu with 'Dustin Adreas' selected.
 - ID:** A005.
 - Name:** Dustin Adreas.
 - Email:** dustin.adreas@mail.com.
 - Last active:** 15 August 2022 12:15pm.
 - Justification:** A text area with a rich text editor toolbar (Bold, Italic, Underline, Link, List, Text Color, Background Color) and the placeholder text 'Write something'.
- Buttons:** An 'Update' button at the bottom.

Right Screenshot: Assignee for WMC3928

- Header:** Assignee for WMC3928 (with a close button 'X').
- Current Assignee:** A002.
- Form Fields:**
 - Select a location:** A dropdown menu with 'Petaling Jaya' selected.
 - Select new assignee:** A dropdown menu with 'Dustin Adreas' selected.
 - ID:** A005.
 - Name:** Dustin Adreas.
 - Email:** dustin.adreas@mail.com.
 - Last active:** 15 August 2022 12:15pm.
 - Justification:** A text area with a rich text editor toolbar and the placeholder text 'Write something'.
- Buttons:** An 'Update' button at the bottom.

Callouts:

- “Select a location” display and allow selection of branches or department to rework or reassign the case too.**
- “Select assignee” display and allow selection of people to rework or to reassign the case for further investigation.**
- “Justification” allow to input reasoning on reworking / reassigning the case.**

Figure 2.10: How to Rework and Reassign Case

1. Users can navigate to the "**Rework Case**" and "**Reassign Case**" pop-up screen by clicking the "**Rework**" and "**Reassign**" buttons respectively.
2. To rework or reassign a case, user needs to select a location where case is being reworked or reassigned and select an assignee to the case.
3. The assignee's information will be displayed, alongside the date the assignee was last active.
4. Users can input the reasoning on reworking or reassigning a case in the "**Justification**" bar.
5. Once users are done, click on the "**Update**" button to save and update the information to rework or reassign the cases.

2.4.2 Why do we need to Rework and Reassign Case?

Reworking and Reassigning cases are common practices to ensure the effectiveness and efficiency of the compliance process. Further explanation will be displayed below:

Rework

1. **Error Correction:** To correct errors or false positives generated by automated AML systems.
2. **Enhanced Investigation:** To conduct a more in-depth investigation or analysis of a suspicious activity.
3. **Quality Assurance:** To ensure that the compliance process is effective, and decisions are accurate.
4. **Regulatory Compliance:** To address cases that become relevant due to new information or regulatory updates.
5. **Timeliness:** To meet time-requirements or deadlines.
6. **Skill Development:** To provide training and skill development opportunities for compliance officers.
7. **Auditing and Oversight:** To review and assess previous decisions for compliance with policies and regulations.
8. **Lack of Information:** The information given by clients is incomplete and/or unclear.
9. **Attachments:** Uploaded attachments are unclear and/or obscure.

Reassign

1. **Workload Distribution:** To evenly distribute the caseload among compliance officers.
2. **Risk Management:** To prioritize high-risk cases and allocate resources effectively.
3. **Expertise Matching:** To assign cases to specialists or investigators with the right expertise.
4. **Resource Optimization:** To make sure that resources are allocated efficiently.
5. **Timeliness:** To ensure cases are reviewed and resolved within the required timeframe.
6. **Training and Skill Development:** To provide exposure to different aspects of AMLA for skill development.

7. **Auditing and Oversight:** To review and assess the decisions made by compliance officers in light of institutional policies and regulatory requirements.
8. **Assignee Availability:** There are no assignees working a case.

2.4.2.1 Rework Pop-up Screen

Rework Pop-up Screen

The information display in the Rework pop-up screen:

The screenshot shows a 'Rework Case' pop-up window for case TM30359. It displays the current assignee as A002 and the current case template & workflow as 'Template 4 - L2 AML CO Supervisor - Level 2'. Below this, there is a section titled 'Rework this case. Search below for alternatives:' which contains three dropdown menus: 'Select a location', 'Select case template & workflow', and 'Select assignee'. At the bottom, there is a table with columns for ID, Name, Email, Last Active, and Justification. The 'Justification' column has a text area for input. An 'Update' button is located at the bottom right of the screen.

Figure 2.11: Rework Pop-up Screen Information Display

Explanation of the attributes displayed in the Rework Pop-up Screen:

#	Name	Description
1	Case ID	Display the module case primary key ID number.
2	Current Assignee	Display the user's name who are investigating the case.
3	Current Case Template & Workflow	Display the current case template & workflow used by the user.

4	Rework details	1. Location - Allow to select the location to rework. 2. Case Template & Workflow - Allow to select the case template & workflow to filter the specific's user case template. 3. Assignee - Allow to select user list based on the case template & workflow
5	ID	Display the new assignee's ID.
6	Name	Display the new assignee's name.
7	Email	Display the new assignee's email address.
8	Last Active	Display the new assignee's last active date.
9	Justification	Allow user to comment/justify reasoning of de-escalating the case for rework purposes.
10	Update button	Allow and confirm to rework the case to new assignee.

2.4.2.2 Reassign Pop-up Screen

Reassign Pop-up Screen

The information display in the Reassign Pop-up Screen:

The screenshot shows a 'Reassign Pop-up Screen' with the following elements and annotations:

- 1**: Title bar 'Assignee for TM30359'.
- 2**: 'CURRENT ASSIGNEE' label above the value 'A002'.
- 3**: A large red box enclosing the reassignment section, which includes:
 - Text: 'Reassign this case. Search below for alternatives:'
 - Label: 'Select a location' above a dropdown menu.
 - Label: 'Select case template & workflow' above a dropdown menu showing 'Template 4 - L2 AML CO Supervisor - Level 2'.
 - Label: 'Select new assignee' above a dropdown menu.
- 4**: 'ID' label for the new assignee.
- 5**: 'Name' label for the new assignee.
- 6**: 'Email' label for the new assignee.
- 7**: 'Last Active' label for the new assignee.
- 8**: 'Justification' label above a text area with placeholder 'Write something...'.
- 9**: 'Update' button at the bottom right.

Figure 2.12: Reassign Pop-up Screen Information Display

Explanation of the attributes displayed in the Reassign Pop-up Screen:

#	Name	Description
1	Case ID	Display the module case primary key ID number.
2	Current Assignee	Display the user's name who are investigating the case.
3	Reassign details	1. Location - Allow to select the location to rework. 2. Case Template & Workflow - Allow to select the case template & workflow to filter the specific's user case template. 3. Assignee - Allow to select user list based on the case template & workflow
4	ID	Display the new assignee's ID number.
5	Name	Display the new assignee's name.
6	Email	Display the new assignee's email address.

7	Last Active	Display the new assignee's last active date.
8	Justification	Allow user to comment/justify reasoning of de-escalating the case for reassigning purposes.
9	Update button	Allow and confirm to rework the case to new assignee.

2.5 Case Workflow List □ Review or Reopen Closed Cases

2.5.1 How to Review Closed Cases?

In the Case Workflow Detail page, users are given a navigation button to review closed cases as shown in the figure below.

Steps to Review Closed Cases:

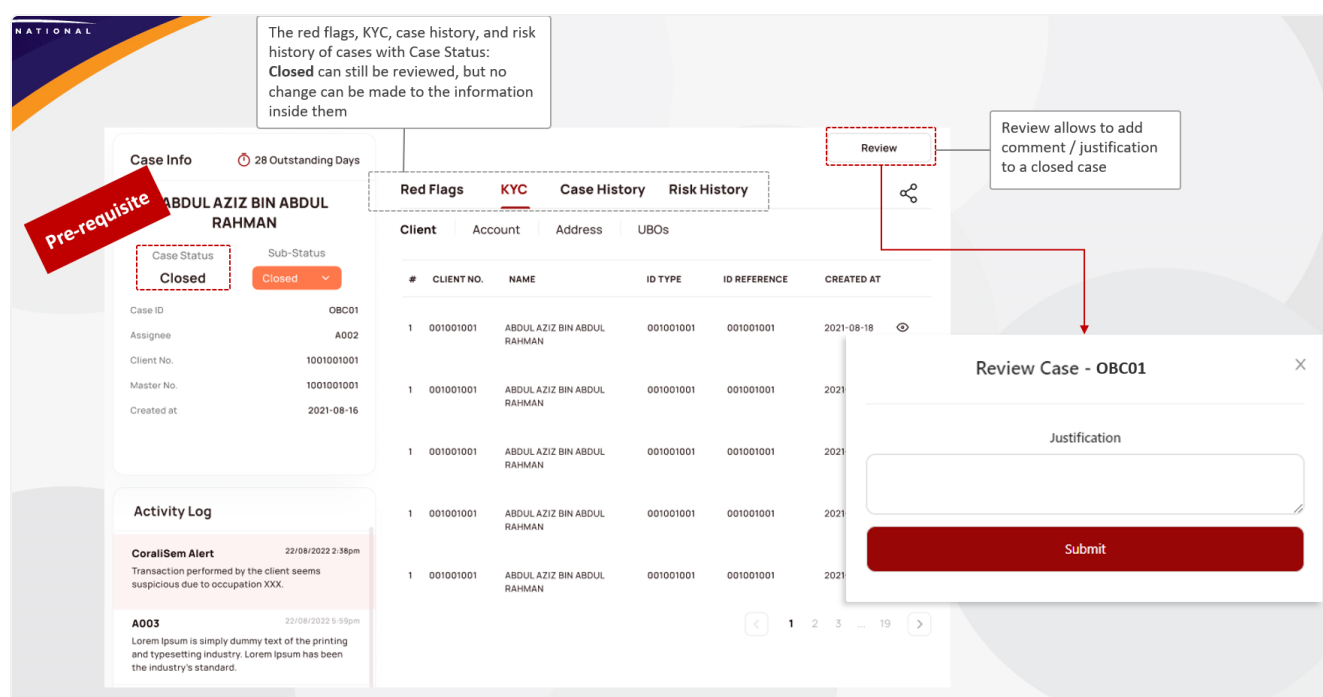

Figure 2.13: How to Review Closed Cases

1. This button option can be found on the top right of the Case Workflow Detail page.
2. If users click on the **"Review"** button, a review case pop-up screen will appear.
3. This section allows users to review cases that have been closed to see the quality of the investigation.
4. To review a case, users can add comments or justify in the empty section given before submitting reviews.
5. If user has completed reviewing a case, click the **"Submit"** button to save it into the system for other users to see the quality of the investigation.
6. The users cannot use any action features in the page except viewing the five (5) tab information and commenting/justifying on the case. This can be configured whether the user can review cases under

2.5.2 How to Reopen Closed Cases?

In the Case Workflow Detail page, users are given a navigation button to reopen closed cases for further investigation as shown in the figure below.

2.5.2.1 Reopen Case

The screenshot shows a form titled "Reopen Case - WMC30247" with a close button (X) in the top right corner. The form contains the following elements:

- 1**: A dropdown menu labeled "Reopen to Role Level" with the placeholder text "Please select".
- PREVIOUS ASSIGNEE**: A section header in red text.
- Change assignee for this case. Search below for alternatives:**: A section header in bold black text.
- 2**: A dropdown menu labeled "Select a location" with the placeholder text "Please select".
- 3**: A dropdown menu labeled "Select a new assignee" with the placeholder text "Please select".
- 4**: A text input field labeled "ID".
- 5**: A text input field labeled "Name".
- 6**: A text input field labeled "Email".
- 7**: A text input field labeled "Last Active".
- 8**: A text input field labeled "Justification".
- Reopen**: A large red button at the bottom of the form.

Figure 2.14 Reopen Case

The display information is displayed in the table below:

#	Name	Description
1	Reopen to role level	Display the workflow level and reopen to which workflow level.
2	Select a location	To allow user to filter branch location.
3	Select a new assignee	Display the user's name that will investigate the case once reopen.
4	ID	Display the new assignee's ID.

5	Name	Display the new assignee's name.
6	Email	Display the new assignee's email address.
7	Last Active	Display the new assignee's last active date and time.
8	Justification	Allow user to comment / justify reason of reassigning case.
9	Reopen button	Allow to confirm reopen.

Steps to Reopen Closed Cases:

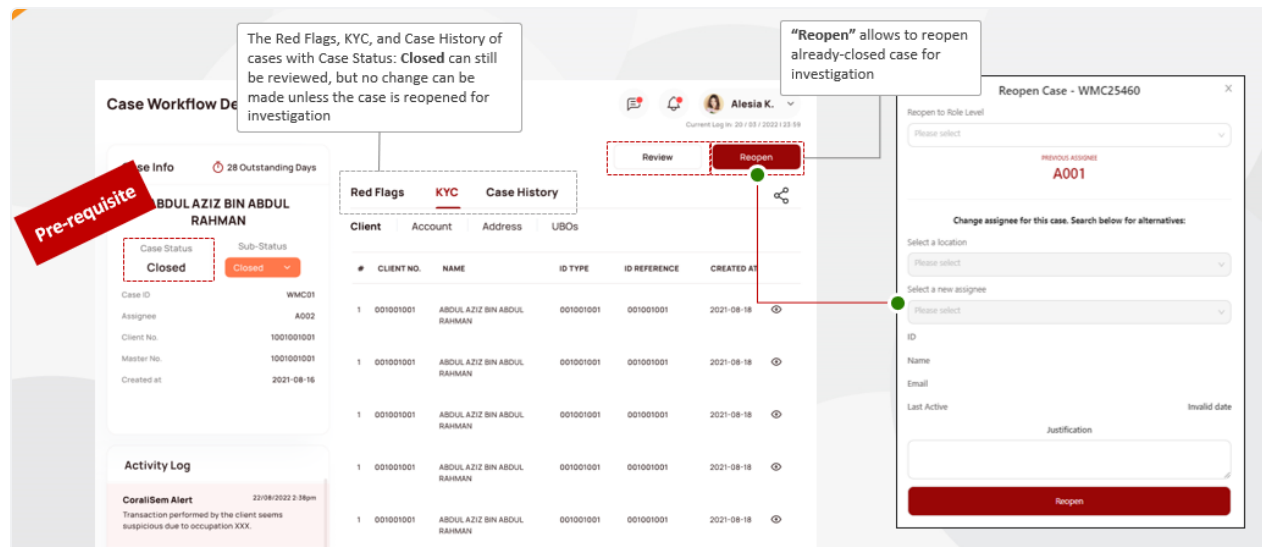

Figure 2.15: Reopen Case

1. This button option can be found on the top right of the Case Workflow Detail page.
2. If users click on the **"Reopen"** button, a reopen case pop-up screen will appear.
3. This section allows users to reopen cases that have been closed to re-investigate the case.
4. To reopen the case, the users need to select on **"reopen to Role Level"** as desired to.
5. After that, they need to select a **"location"** for the case to re-investigate.
6. The user can select a new or existing assignee for the re-investigation case on **"Select a new assignee"** button.
7. The information details of the assignee will be display down below. Users are required to add comments or justify in the empty section given before submitting reviews.
8. If user has completed fill in the details, click the **"Submit"** button to save it into the system for other users to see the case are being open & in-progress for investigation.

2.6 Case Workflow List □ Red Flag Details

2.6.1 How to View Red Flag Details?

This section outlines how users can view red flag details under Transactions Monitoring.

1. The update detail case page consists of several tab to view the client information.
2. **Tab 01 - Red Flag:** Allow users to view the details of red flags generated. The display information is displayed in the table below:

Red Flags KYC Case History Risk History Insights						
2 Red Flag	3 Type	4 Description	5 Category	6 Date	7 OS	
1 ☒	6549	Daily transaction	Monthly >= RM500k for all High Risk Individual Customers (Classification Customer Risk Profiling)	Money Laundering	08 May 2024 15:58pm	28
☐	6963	Daily transaction	Monthly >= RM500k for all High Risk Individual Customers (Classification Customer Risk Profiling)	Money Laundering	08 May 2024 15:58pm	28

Figure 2.16: Red Flag Details

The information displayed is in the table below:

#	Name	Description
1	Selector (Checkbox)	Allow users to select red flag to display red flag match record.
2	Red Flag	Display the module red flag primary key ID number. Each module is unique with prefix.
3	Type	Display the watchlist rule scenario type. The data will be read from watchlist monitoring rule parameter setting.
4	Description	Display the watchlist rule scenario full description. The data will be read from watchlist monitoring rule parameter setting.
5	Date	Display the date that red flag is generated.
6	OS (Outstanding)	Display the total days of red flag open & outstanding.

Steps to View Red Flags Details:

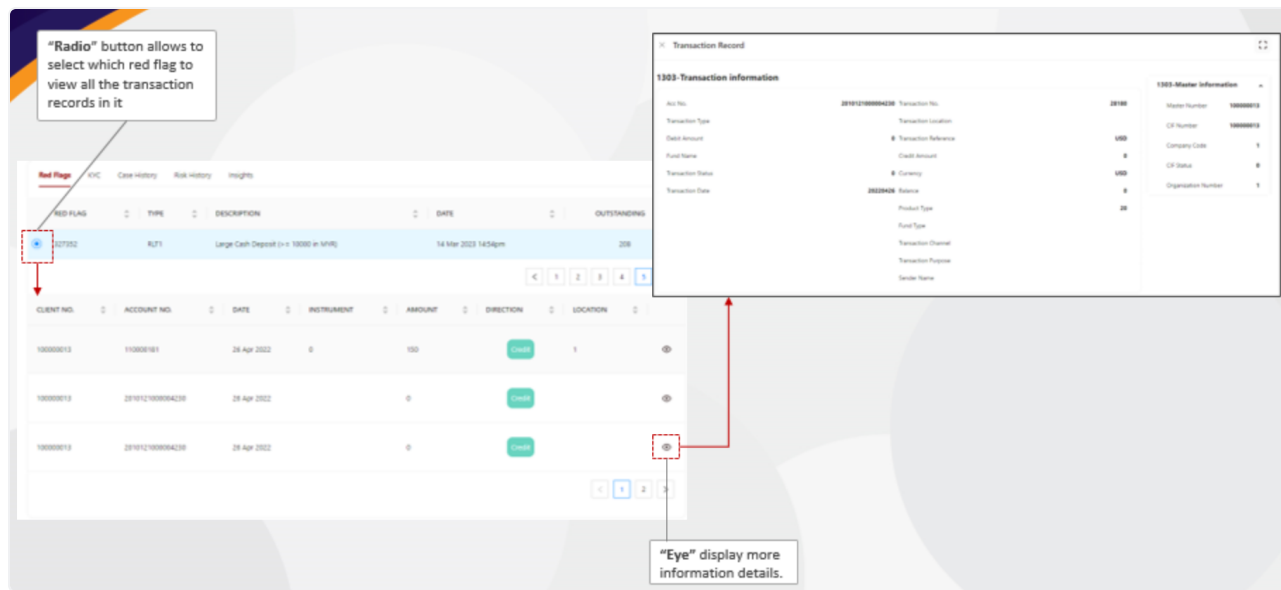

Figure 2.17: How to View Red Flag Details

1. If users click the **"Radio"** button, users are able to select which red flag to view transaction records in.
2. The **"Transaction Record"** will display details of the red flags that hit against the transaction record.
3. If users click on the **"Eye"** button, they can view the full details of the transaction based by transaction mapping.

2.6.1.1 Red Flags Transaction Record

1. This section allows users to view details of the red flags that hit against the transaction record.

2.7 Case Workflow List - KYC Details

This section allow users to view the client's information. The client information availability is **subject based by**:

- Data provided by the organization
- Data mapping configuration setup under General setting

2.7.1 How to View KYC Information?

The following are a few tabs of KYC details, shown and explained below as examples of configured data mapping.

Steps to view KYC Information:

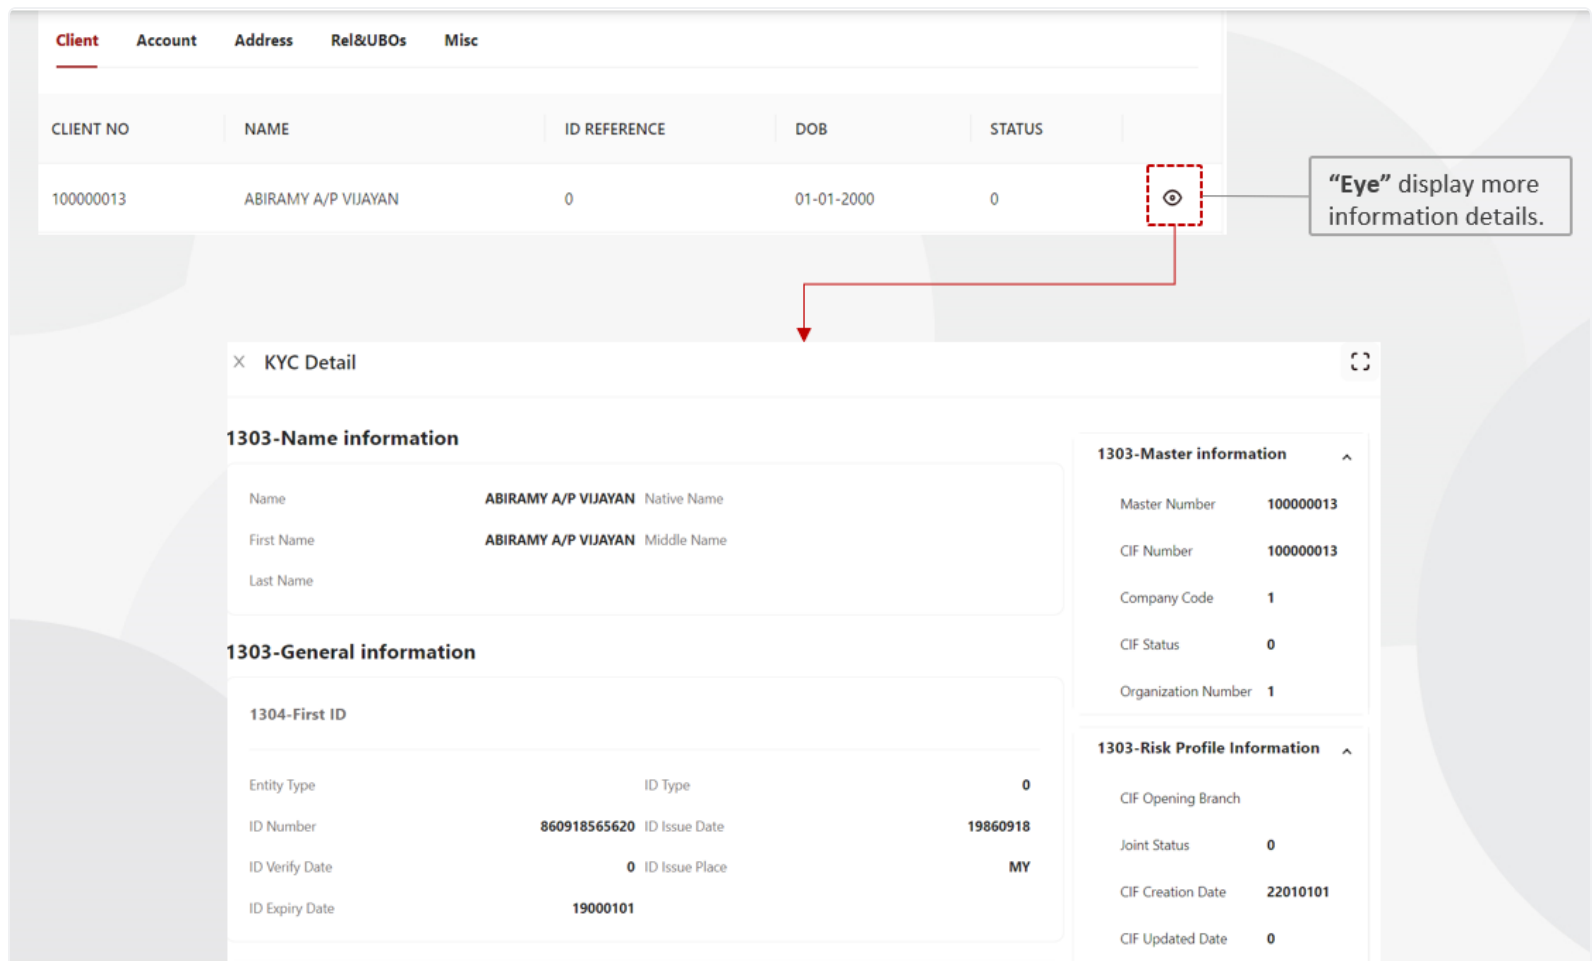

Figure 2.20: How to View KYC Information

1. To view KYC information, users can click on the **"KYC"** tab.
2. Under this tab, it displays five (5) panels whereby each one of them also contains their own set of information (refer to Figure 2.19 for further information):

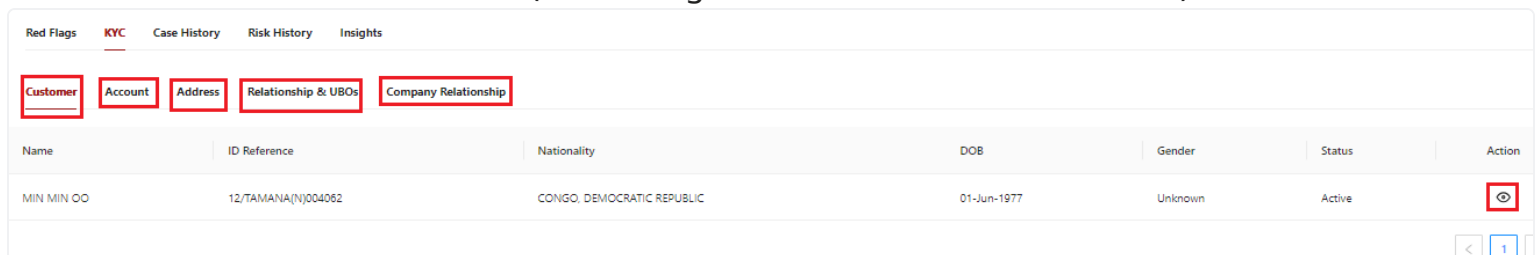

Figure 2.21: KYC Details

3. Only certain panels contain the **"Eye"** button to display more information regarding KYC details.

2.7.2 KYC Details □ Customer

This section outlines how the compliance user can investigate and view client KYC detail information while investigating the transaction red flag.

2	View red flag	Allow to view red flag cases.
3	View attachment	Allow to view supporting documents of case history.
4	Created at	Display the date that the case was first created and escalate for review.
5	Status	Display the final status of the case.
6	Updated at	Display the date that the case investigation is last updated.
7	Sub-status	Display the final status sub of the case.
8	Officer	Display the final person who manages the case.
9	Activity Log	Display the activity log of the case.

2.9 Case Workflow List □ Risk History

2.9.1 How to View Risk History Information?

This section allows users to view risk history information of the clients.

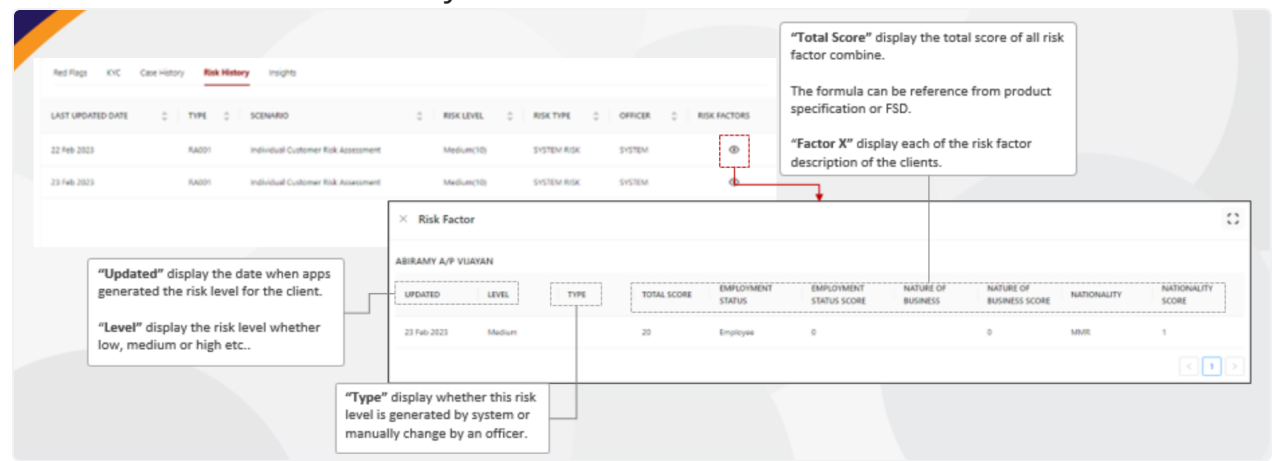

Figure 2.31: How to View Risk History Information

1. This section allows users to view the client have any past risk changes history build on their portfolio.
2. The details are separate into two sections:
 - a. The first section (Risk History Summary) is a graph displaying the overview of the client's previous risk records. The graph shall display the following:
 - Date
 - Risk Level
 - Risk Score
 - b. The second section (Risk History List) is the overview list of each previous risk history and the details surrounding it.

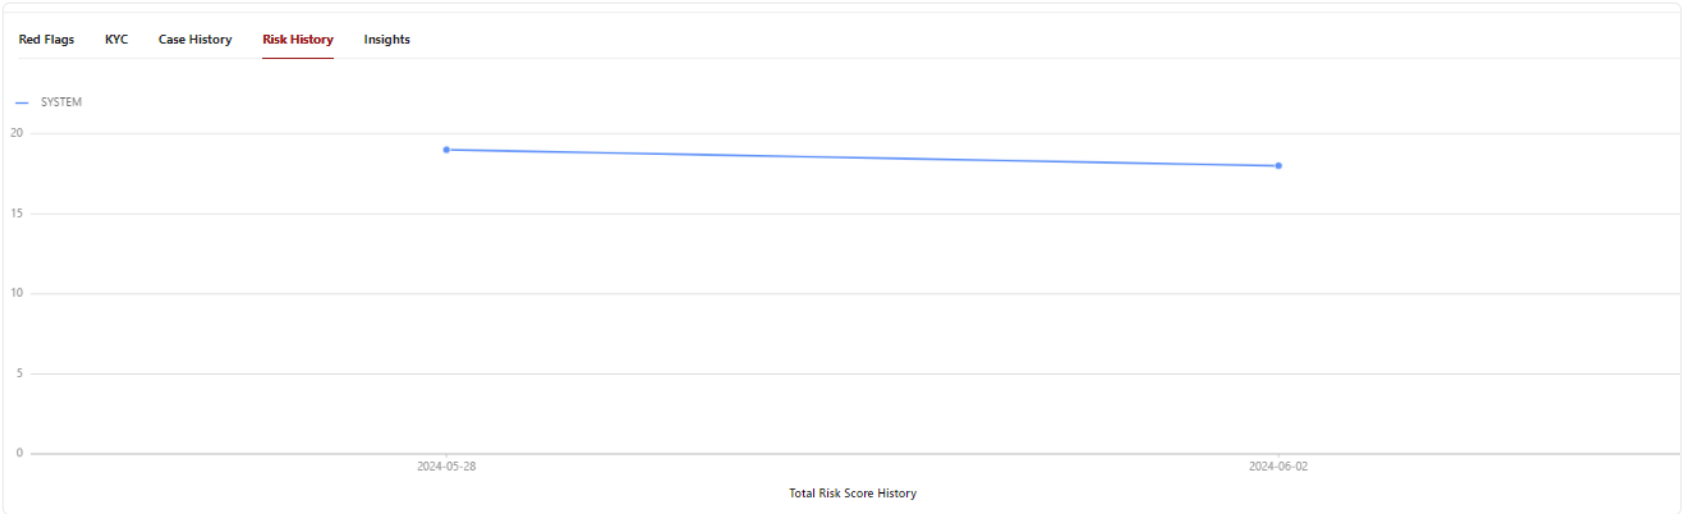

Figure 2.32: Risk History Chart

3. This section allows users to view the risk history table about transactions.

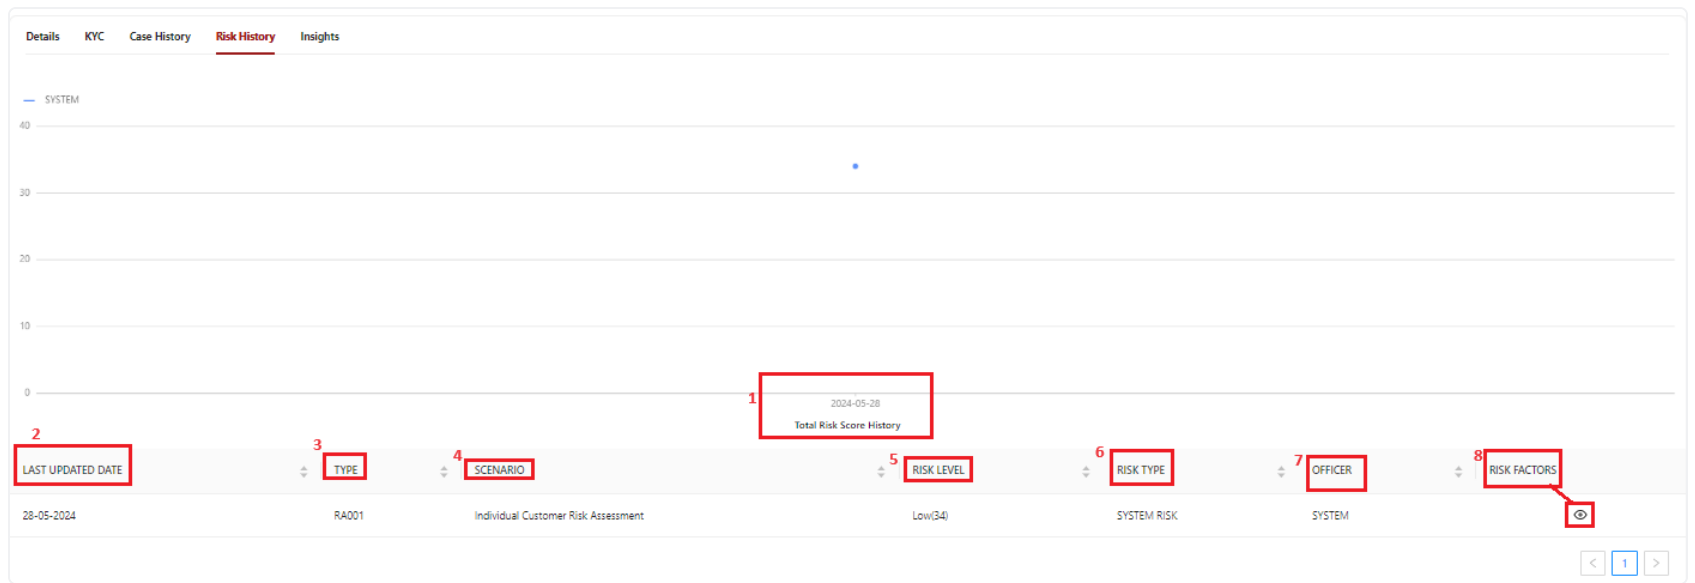

Figure 2.33: Risk History Details

The information displayed is in the table below:

#	Name	Description
1	Last Updated Date	Display the date that risk history last changed.
2	Type	Display the method use to change the risk • System Rate • Manual Rate
3	Description	Display the description of the rule scenario.
4	Risk Level	Display the risk level of the client when last changed.
5	Risk Type	Display the method used to change the risk: 1. System rate 2. Manual rate
6	Assignee	Display the final person who managed the case.
7	Risk Factors	1. Display all the risk factors based by the configuration setup 2. In the pop-up, the following information should be displayed in the table: a. Updated b. Risk Level c. Type d. Total Score e. Employment f. Employment Score

- h. Nature of Business Score
- i. Nationality
- j. Nationality Score
- k. Residency
- l. Residency Score
- m. Income Range
- n. Income Range Score

2.10 Case Workflow List □ Insights

2.10.1 How to View Insight Information?

1. This section allows users to view the client accumulated transactions since integrated with the application.

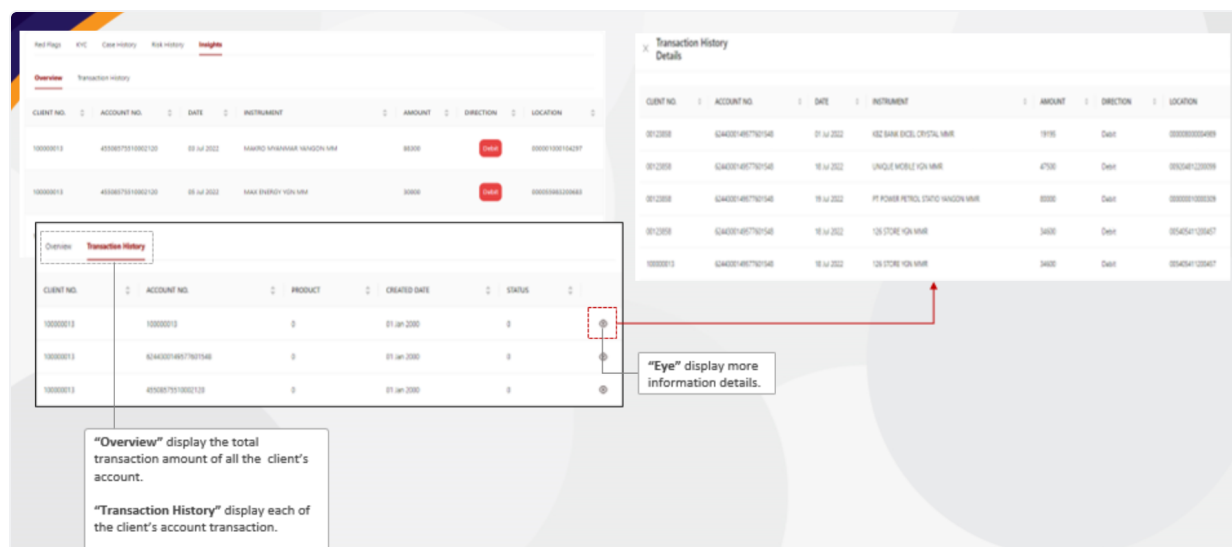

Figure 2.34: How to View Insight Information

2. The details are separate into three sections:
 - a. The first section (Overview) is a graph displaying the overview of the client accumulated transactions since integrated with the application. This section is divided into two parts:
 - Graph Overview
 - Overview Details
 - b. The second section (Transaction History) is the overview list of client-specific account transactions since integrated with the application.
 - c. The third section (Link Analysis) is the graph node of the client's linkage with other entities or clients to identify any possible connection between them.

Steps to View Insights Information:

- 1. In the **"Insights"** tab, users are able to view the overview and transaction history of all the client's account.
- 2. In the **"Transaction History"** tab, users can navigate to view further **"Transaction History Details"** by clicking on the **"Eye"** icon.

2.10.2 Insights Overview

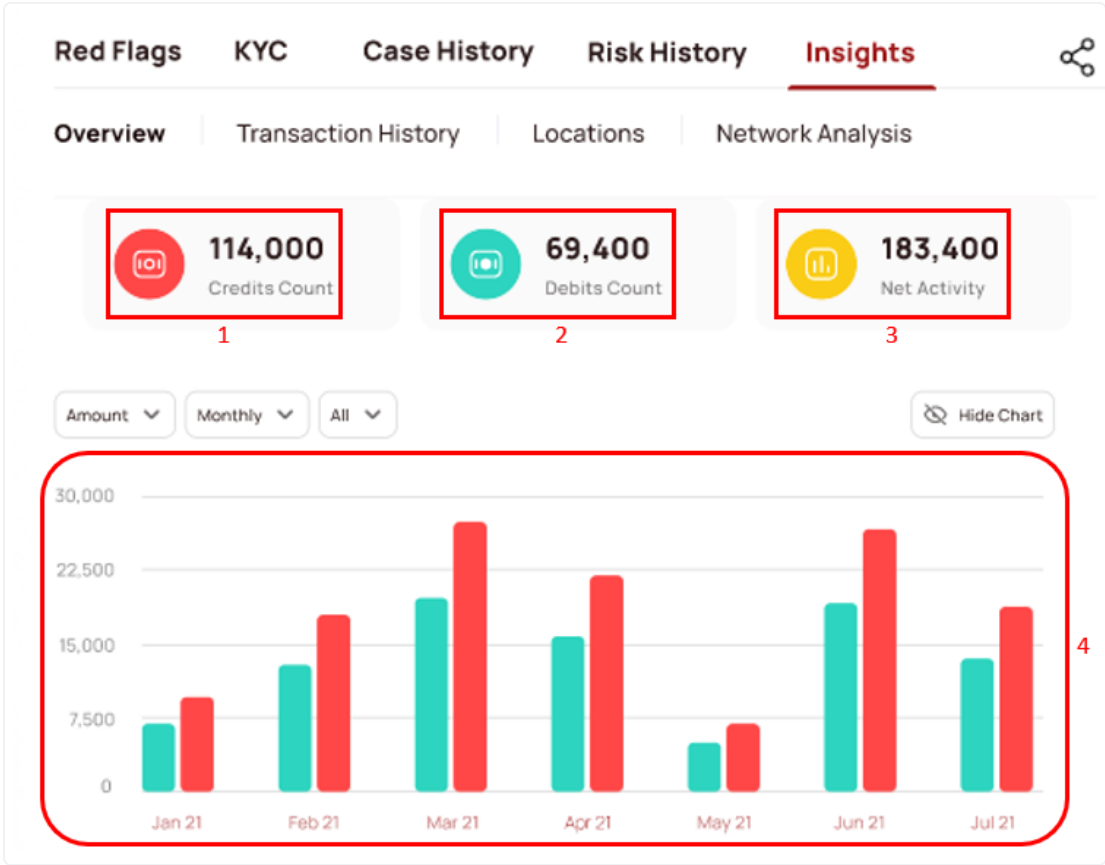

Figure 2.35: Insights Overview

The information displayed is in the table below:

#	Name	Description
1	Credit Information	1. Display the total accumulate credit count transaction for all the client no. and account no. 2. Display the total accumulate credit amount transaction for all the client no. and account no.
2	Debit Information	1. Display the total accumulate debit count transaction for all the client no. and account no. 2. Display the total accumulate debit amount transaction for all the client no. and account no.
3	Net Activity	Display the total accumulate transaction on both credit & debit for all the client no. and account no.

4	Graph	1. Display the total accumulate credit amount transaction for all the client no. and account no. 2. Display the total accumulate debit amount transaction for all the client no. and account no. 3. Display the total accumulate credit count transaction for all the client no. and account no. 4. Display the total accumulate debit count transaction for all the client no. and account no. 5. Default the graph view to transaction amount. 6. Allow to change graph view to transaction count. 7. Default the graph view to monthly. 8. Allow to change graph view to: a. Daily b. Weekly c. Monthly d. Yearly 9. Default the graph view to show both credit & debit amount. 10. Allow to change graph view to show either: a. Credit b. Debit c. All 11. Allow to collapse and hide the graph chart panel. 12. User colour code: a. Use colour code "FF4747" for credit. b. Use colour code "2DD4BF" for debit.
---	-------	--

2.10.3 Insights ▯ Overview Details

This section allows users to view the client accumulated transactions since integrated with the application.

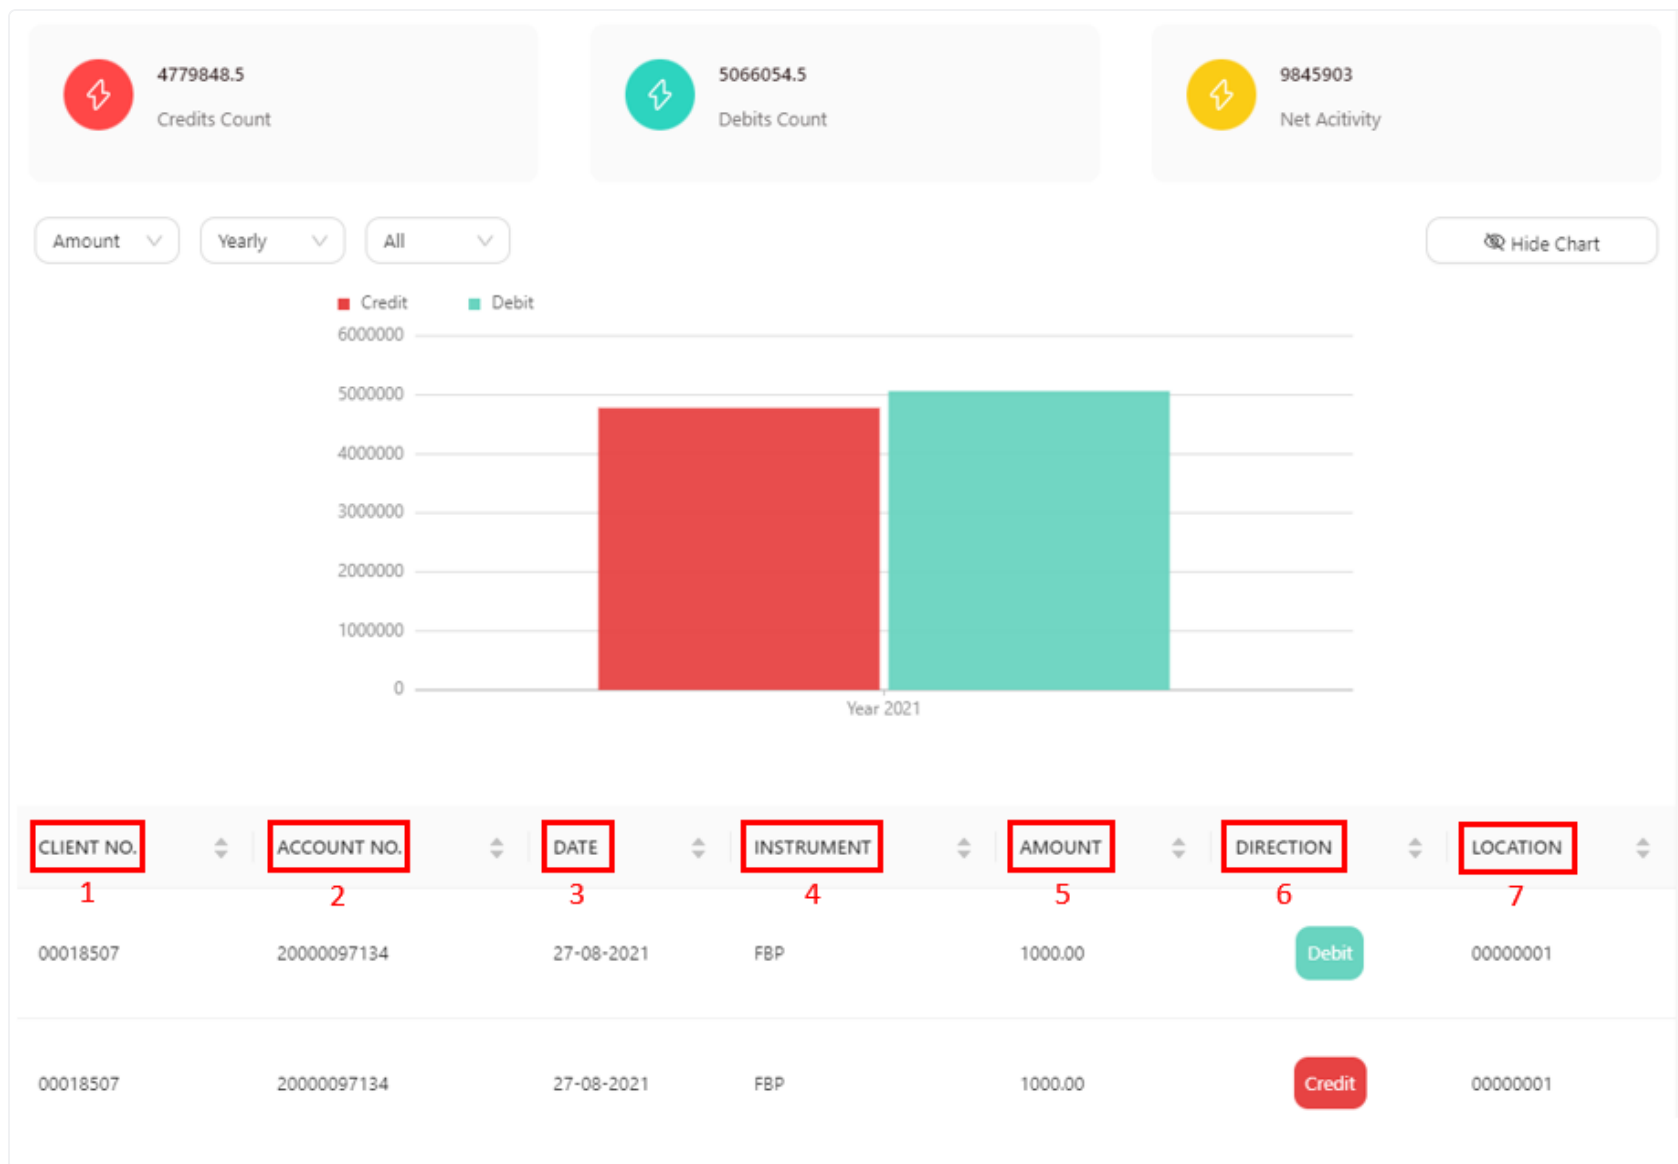

Figure 2.36: Insights Overview Details

The information displayed is in the table below:

#	Name	Description
1	Client No.	Display the client CIF ID or other golden unique number.
2	Account No.	Display the client account no. or unique number.
3	Date	Display the date that transaction is performed.
4	Instrument	Display the instrument of the transaction method.
5	Amount	Display the amount that transaction is performed: 1. Use colour code "FF4747" for credit 2. Use colour code "2DD4BF" for debit
6	Direction	Display the direction of transaction flow either is credit (deposit/incoming) or debit (withdrawal/outgoing).
7	Location	Display the location of where the transaction happens.

2.10.4 Insights Transaction History

1. This section allows users to view the client accumulated transactions since integrated with the application.

Details	KYC	Case History	Risk History	Insights
Overview	Transaction History			
CLIENT NO.	ACCOUNT NO.	PRODUCT	CREATED DATE	STATUS
1	2	3	4	5

1	Client No.	Display the client CIF ID or other golden unique number.
2	Account No.	Display the client account no. or unique number.
3	Product	Display the account product type.
4	Created Date	Display when the account was created.
5	Status	Display the status of the account.
6	Action (View)	Allow to view insights transaction history details in a pop-up side panel.

2. This section allows users to view the client specific account transactions since integrated with the application.

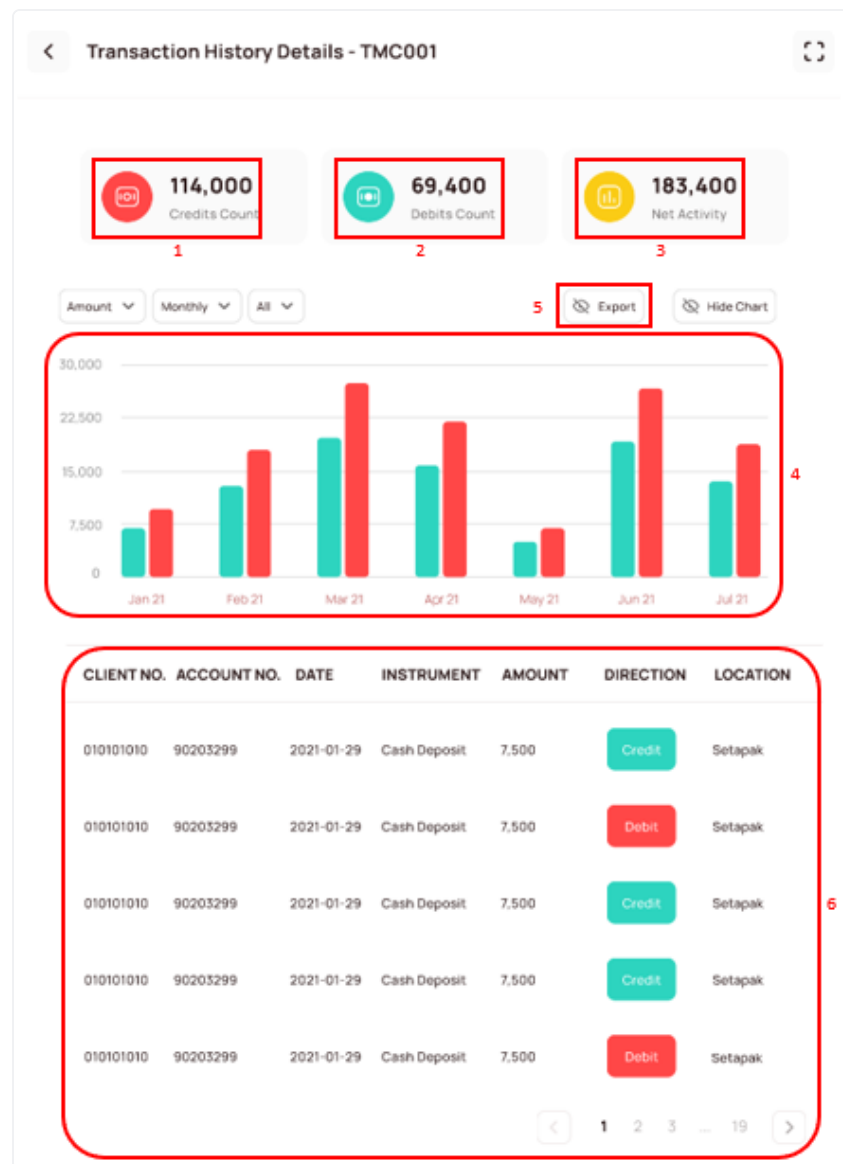

Figure 2.38: Insights Transaction History Details

The information displayed is in the table below:

#	Name	Description
1	Credit Information	1. Display the total accumulate credit count transaction for all the client no. and account no. 2. Display the total accumulate credit amount transaction for all the client no. and account no.
2	Debit Information	1. Display the total accumulate debit count transaction for all the client no. and account no. 2. Display the total accumulate debit amount transaction for all the client no. and account no.
3	Net Activity	Display the total accumulate transaction on both credit & debit for all the client no. and account no.
4	Graph	1. Display the total accumulate credit amount transaction for all the client no. and account no.

		2. Display the total accumulate debit amount transaction for all the client no. and account no. 3. Display the total accumulate credit count transaction for all the client no. and account no. 4. Display the total accumulate debit count transaction for all the client no. and account no. 5. Default the graph view to transaction amount. 6. Allow to change graph view to transaction count. 7. Default the graph view to monthly. 8. Allow to change graph view to: a. Daily b. Weekly c. Monthly d. Yearly 9. Default the graph view to show both credit & debit amount. 10. Allow to change graph view to show either: a. Credit b. Debit c. All 11. Allow to collapse and hide the graph chart panel. 12. User colour code: a. Use colour code "FF4747" for credit b. Use colour code "2DD4BF" for debit
5	Export	Allow to export transaction history table as Excel file.
6	Table	Display a list of transactions in the selected account's transaction history, including the following information: client number, account number, date, instrument, amount, direction, and location.

2.10.5 Insights □ Link Analysis

This section provides a different dimension of investigation on the client's transaction and associates the possible interrelationships between clients.

This facilitates a more refined investigation methodology and diverse insights and investigative perceptive.

Below are the interface of Link Analysis of the client under the TM Case Workflow.

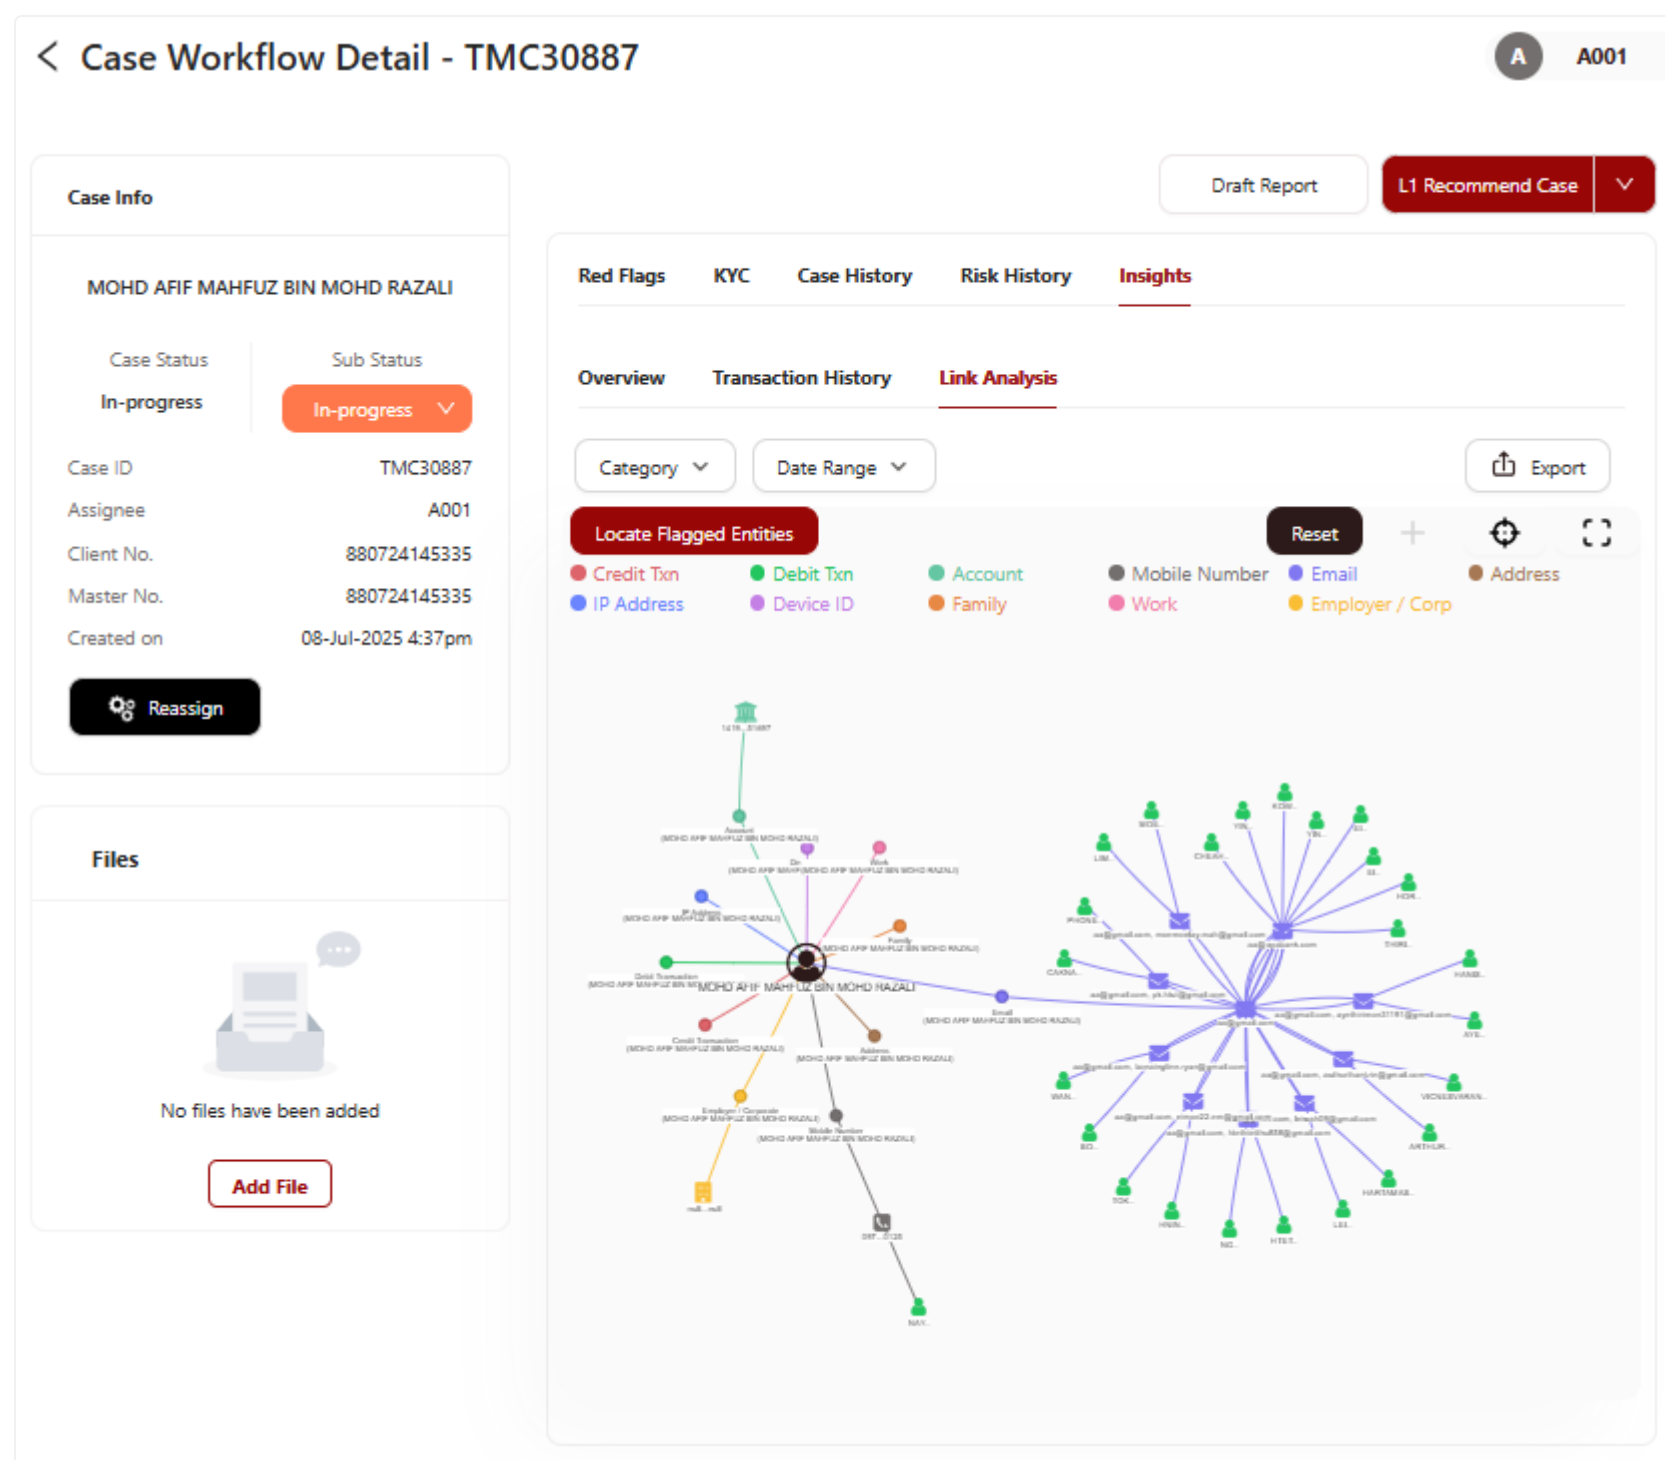

Figure 2.39: Link Analysis section

2.6.3.1 Data Requirement

The expected data is require to use link analysis features:

#	Data Type	Description
1	Account	Client's related account from various product Note: Reference from Account table
2	Family	1. Client's related account with familial relationship 2. Applicable for individual client only

		Note 1: Reference from Relationship table Note 2: Reference from UBO table
3	Employer or corporate relation	Client's related with employer relationship Note 1: Reference from Client table Note 2: Reference from Relationship table
4	Director or UBOs	1. Client's related with director or UBOs relationship 2. Applicable for corporate client only Note 1: Reference from Relationship table Note 2: Reference from UBO table
5	Address	Client's related email address Note: Reference from Client table
6	Device ID	Client's related device ID performed the transaction or account creation Note: Reference from Account table
7	Transaction	Client's related transaction performed Note: Reference from Transaction table

2.6.3.1 Data Requirement

1. The expected link relationship condition and display node:

#	Data Type	Description
1	Account	1. Allow to associate account number related to the client number. 2. Allow to associate for both individuals or corporate.
2	Family	1. Allow to associate with any family relationship related to the client number 2. Allow to associate with any family relationship account number related to the client number 3. Allow to associate for individuals only

3	Employer or corporate relation	1. Allow to associate with any employer relationship related to the client number 2. Allow to associate with any employer account number related to the client number
4	Director or UBOs	1. Allow to associate with any director or UBOs relationship related to the client number 2. Allow to associate with any director or UBOS account number related to the client number 3. Allow to associate for corporate only
5	Address	1. Allow to associate with existing address or past address related to the client number 2. Allow to associate any individuals or corporate having the same full address
6	Phone Number	1. Allow to associate with existing phone number or past phone number related to the client number 2. Allow to associate any individuals or corporate having the same phone number
7	Email Address	1. Allow to associate with existing email address or past email address related to the client number 2. Allow to associate any individuals or corporate having the same email address 3. Allow to associate with similar email address based on the email name before the domain name
8	IP Address	1. Allow to associate with existing transaction IP address or past transaction IP address 2. Allow to associate with any individuals or corporate having the same IP address either from account or transaction
9	Device ID	1. Allow to associate with existing transaction device ID or past transaction device ID 2. Allow to associate with any individuals or corporate having the same device ID either from account or transaction
10	Transaction	1. Allow to associate any transaction performed by the client to other individual or corporate account. 2. Allow to associate any transaction performed by other individual or corporate with the client number.

2. The behavior of the link condition node:
 - a. Allow to view linkage transactions up to 6 months or 180 days.
 - b. The primary client number from the case will be the primary central node.
 - c. The graph node represent the individuals or corporate attributes
 - d. The link represent connections between nodes.
 - e. The categories represent the connection data type.

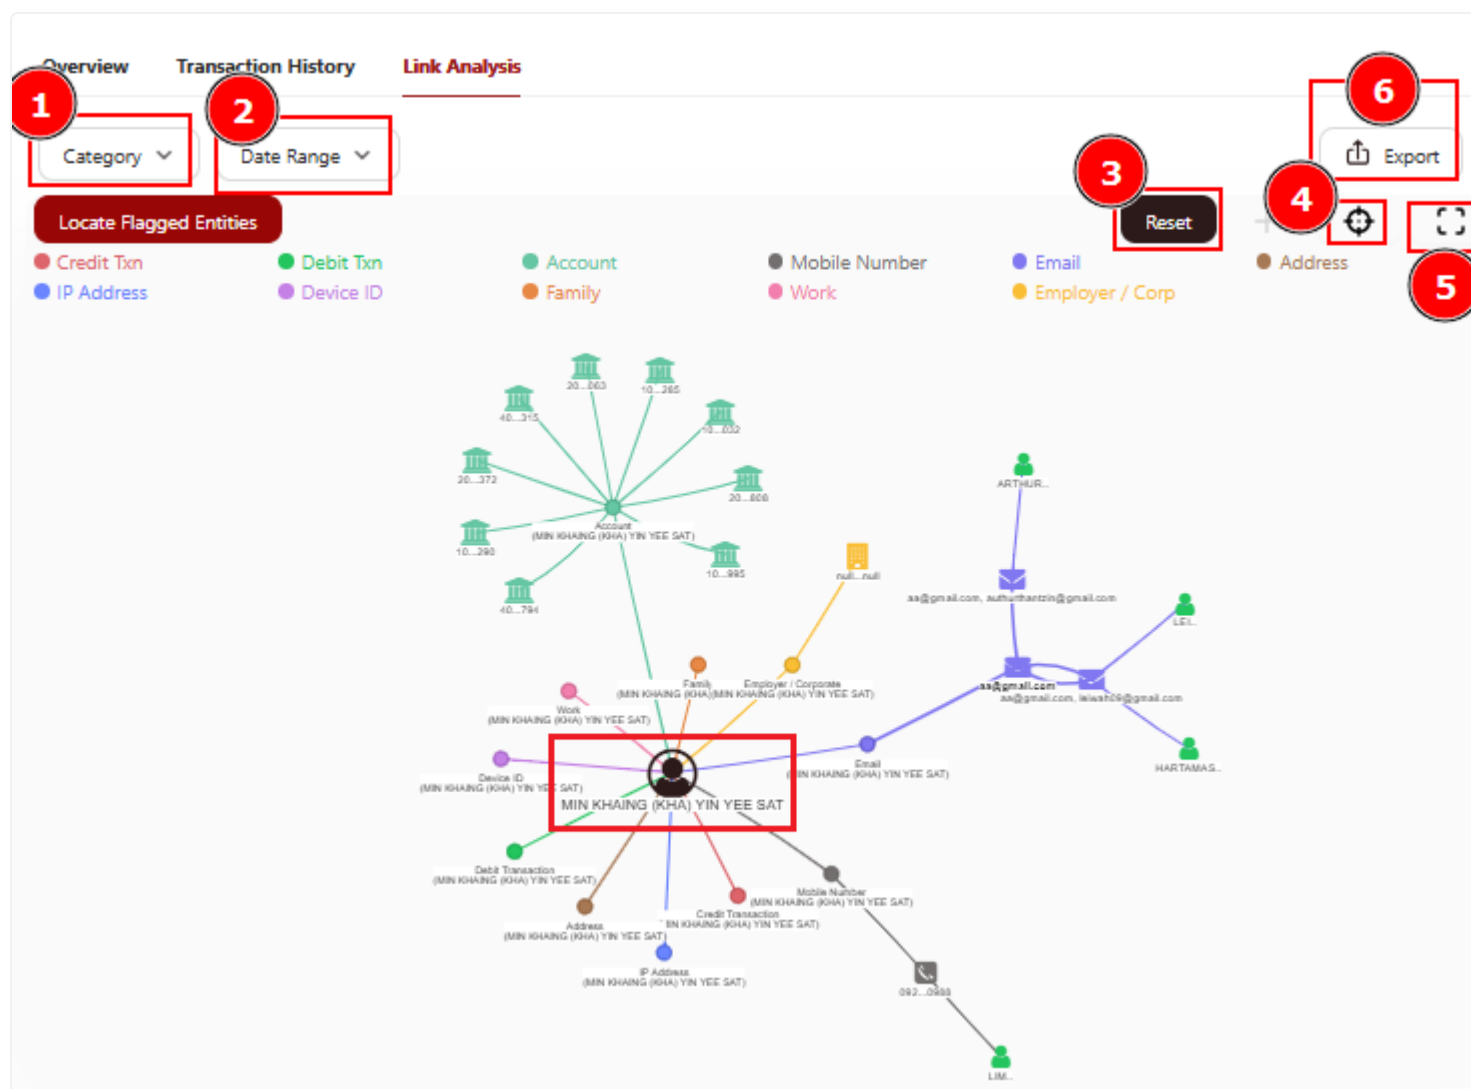

Figure 2.40: Link Analysis condition node

The display information is in the table listed below:

#	Name	Description
1	Category	User allow to select category to show / hide the select category: • Credit Transaction • Debit Transaction

		• Account • Mobile Number • Email • Address • IP Address • Device ID • Family • Work • Employer / Corporate
2	Date Range	User allow to select transaction date range to display the link condition node
3	Reset	Allow to reset the display node back to set
4	Recenter Graph	Allow to recenter the graph display node back to its place
5	Maximize / Minimize button	Maximize: The system will display the node in full-screen mode for a detailed preview. Minimize: The system will exit full-screen mode and return to the normal preview size, navigating back to the previous Link Analysis screen.
6	Export	User allow to export the Link Analysis Graph by two format: • Excel file • PNG file

2.11 Case Workflow ▯ Case Management Actions

Disclaimer: These guidelines are general and may not reflect your institution's specific workflow.

This section outlines the steps for users to perform case management actions using the 'Dropdown' button configurable in Settings. The actions as such of Escalating, De-escalating, Drop case, Recommend case,

Recommending STR, and others.

2.11.1 Steps on how to perform case management actions (Dropdown button)

1. **Navigate to Case Workflow:** After the user has investigated across its tab in Case Workflow page, locate and click the 'Dropdown' button positioned at the top right corner of the page as you can see (a) on the *Figure 2.41* below.

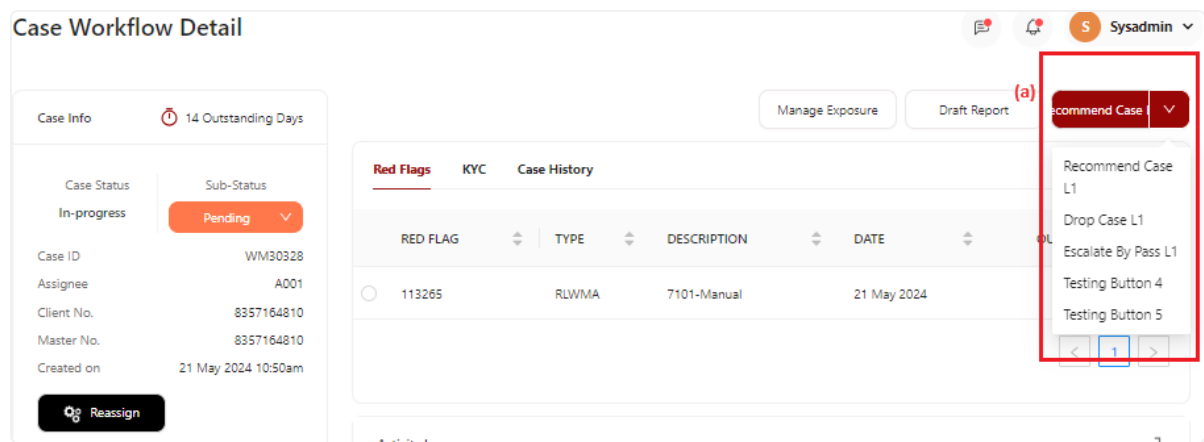

Figure 2.41

2. **Select Action:** From the dropdown menu, users should choose the desired action based on the configured buttons set in Settings to apply the investigated case.

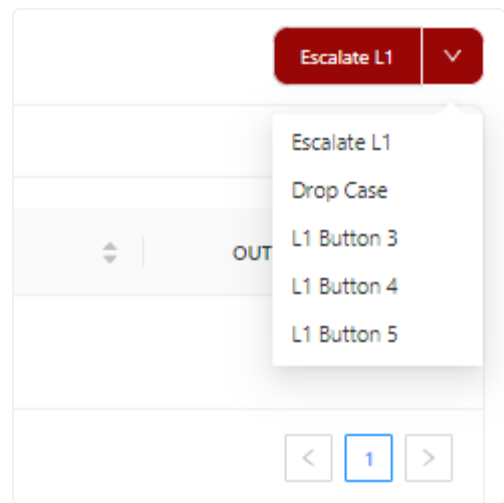

Figure 2.42

3. **Observe Sub-status or status Changes:** User can monitor any changes in the "Sub-status" or "Status" associated with the actions performed on the cases, as shown in the *Figure 2.43 (b)* below.

2.11.2 Steps on how to Bypass Escalation

To allow users to bypass escalation in a case management system within a multi-level workflow when necessary, follows these steps to skip level approval.

Note: This can be configured whether the workflow can enable bypass escalation under Setting – TM: Case Template.

1. **Navigate to Case Workflow:** After the user has investigated across its tab in Case Workflow page, locate and click the 'Dropdown' button positioned at the top right corner of the page as you can see (a) on the Figure 2.46 below.

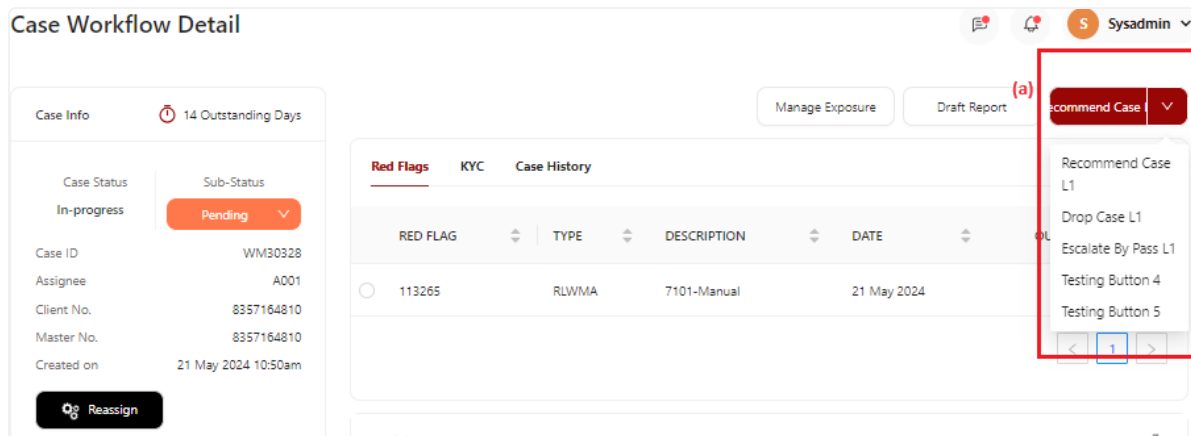

Figure 2.46: Case management action button

2. A pop-up window will appear with the option of "Bypass Escalation" as shown in Figure 2.47 below. Click the checkbox labeled (b) to proceed with bypass escalation of the case to another level. If user decide not to bypass escalation, user may untick the bypass escalation checkbox.

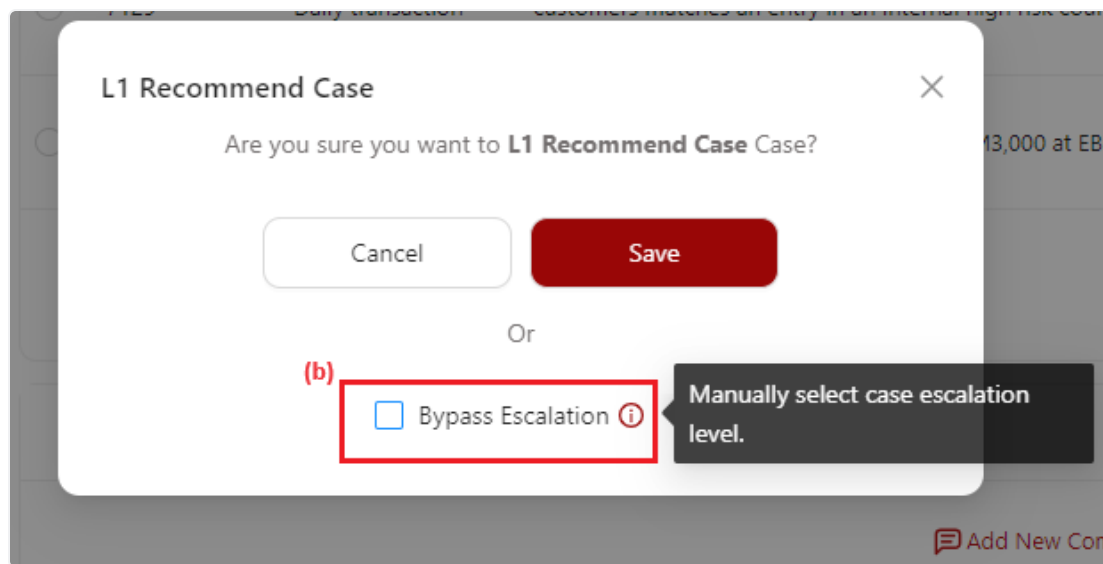

Figure 2.47: Bypass escalation

3. After confirming the option to bypass escalation, the system will navigate to the next pop-up screen where user can select which workflow level to escalate to, as shown in Figure 2.48 (c) below.

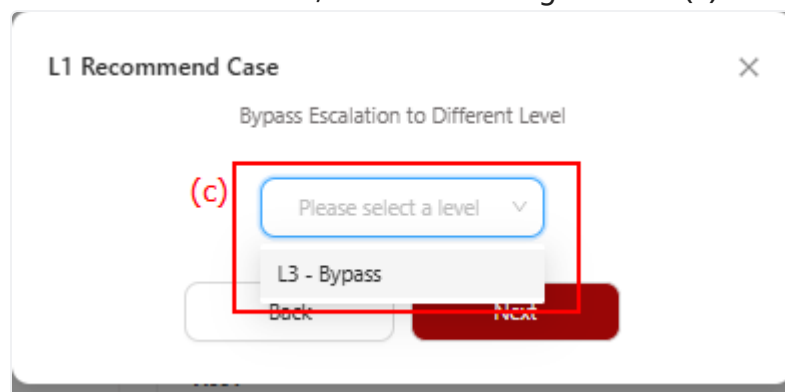

Figure 2.48: To choose level to escalate case

4. Once you have selected the desired workflow level, user will return to the confirmation pop-up window to bypass escalation. Click "Save" to confirm the action or "Cancel" to abort the process.

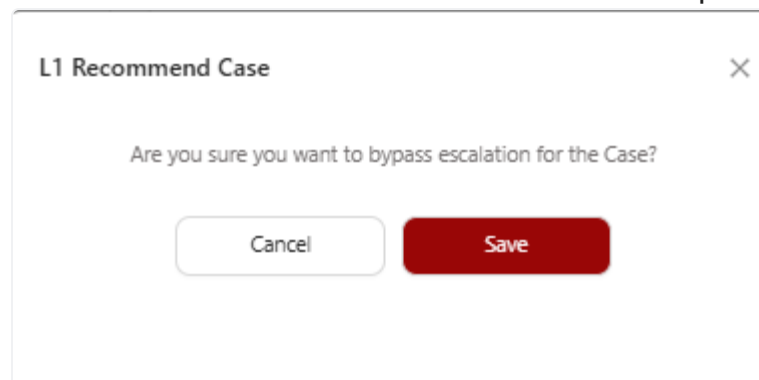

Figure 2.49: Confirmation escalation case

5. The system will auto-refresh indicates that the case has been escalated to another level. User can see the updates on the "Sub-status" under "All Cases" on the Case Workflow page or in the "Activity Log" under the case itself, as shown in the Figure 2.50 below.

2.12 Case Work Detail ▢ Files

This section allows users to add, view, download, and remove a list of files as shown in the figure below:

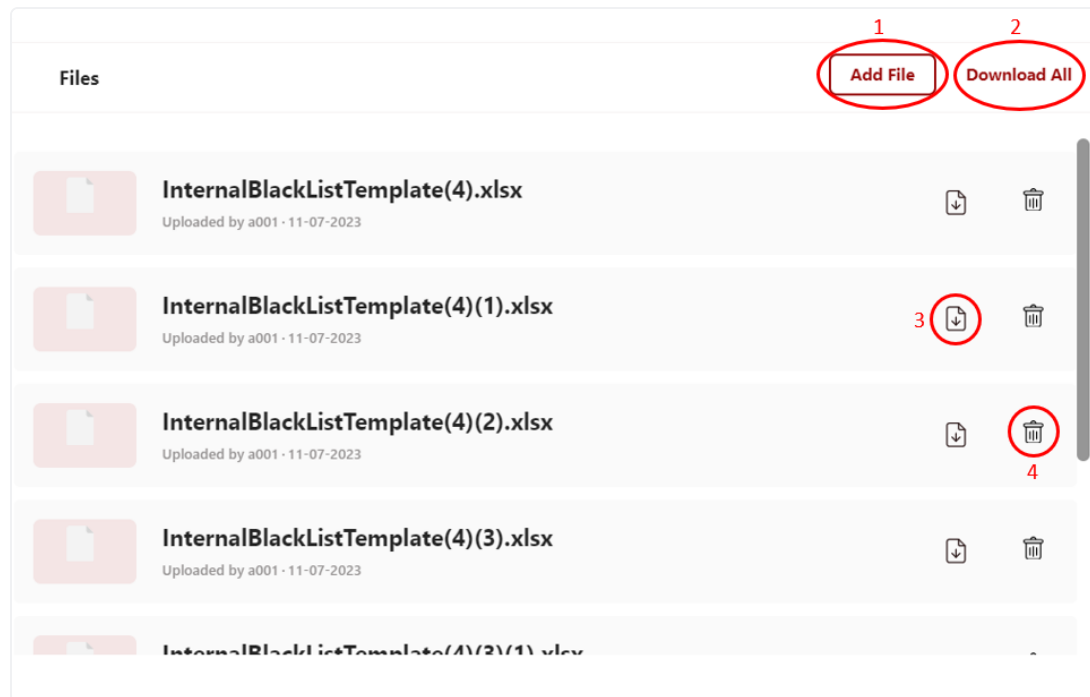

Figure 2.54: List of Files

The display information is in the table below:

#	Name	Description
1	Add File	Add a file or multiple files into the Coral ISEM system.
2	Download All	Allows users to download all files simultaneously.
3	Download Template	Allows users to download an individual file.
4	Remove/Delete	Allows users to remove/delete files from the Coral ISEM system.

2.13 Case Work Detail ▢ Activity Log

There is an Activity Log panel that will capture and display all the activity that happened on the client's case:

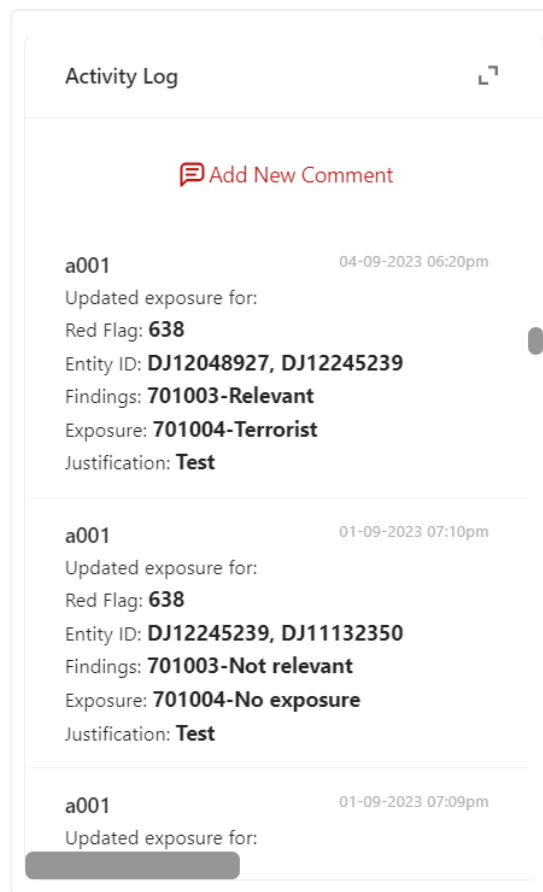

Figure 2.55: Display of 'Activity Log' under TM case list page

The general case info panel on the bottom left side of the page. The information displayed is listed down below:

1. Add New Comment (Justification)
2. ID
3. Last Active
4. Updated Exposure
5. Red Flag No.
6. Entity ID
7. Findings
8. Exposure
9. Status
10. Sub Status

***This parameter is configurable as not all clients will have the same options.**

2.13.1 Add Case Justification

There is "Add New Comment" button on the Activity Log panel above the activity list.

Add Justification

Select a Canned Response:
