1.0	9th June 2025	All 2.2	1st Version Update screenshot and details for "Update Question" section

Preface

1. Customer & TESS Definition

TESS Innovation Sdn Bhd is hereinafter referred as “TESS” of the other part in this document.

2. Document Confidentiality

This document contains information that is proprietary to TESS and The Customer. This document, or any part thereof, shall not be copied, reproduced, translated or reduced to any electronic medium or machine-readable form or disclosed to any third party without the prior written consent or authorization of TESS and the Customer.

3. Purpose of Document

The purpose of this document is to clearly guide user to perform day by day operation.

4. Intended Audience

- Project team from TESS
- Project team from The Customer

5. Document Control

This document is subject to change control. All changes to this document shall be documented and distributed as “Release Version”. It will consist of the following: -

- Full replacement of the document; or
- Full replacement of a section in the document; or
- An addendum to the document.

Each revision will be assigned with a unique “Release Version” number and date. All pages distributed within a Document Release Notice will have the appropriate Release Version and Release Date indicated.

6. Screenshots

All sample screens as attached are for the reader’s viewing purpose only. The actual screen displayed in the [iSE M.ai](#) system shall be based on the specification of The Customer’s as agreed upon.

7. Disclaimer

- All advice given or recommendations made in this document are made in good faith on the basis of the information provided and otherwise generally available or known to TESS at the time of writing.
- No advice given or statements or recommendations made shall be in any circumstances constitute or be deemed to constitute warranty by TESS as to the accuracy of such advice, statement and recommendations.
- Subject to the contents of the Supply of Software, Licensing and Service Agreement executed, TESS shall not be liable for any loss, expense, damage or claim arising out of the advice given or not given or statements made or omitted to be made in connection with this document.
- **This document is **subject to updates**. Please note that it may be revised periodically within the same version to reflect any changes.

8. Product Version

This document is based on product version 1.3. Any other product version may not be relevant to this specific document content and its information.

9. Abbreviation & Definitions

Abbreviation	Definition
EDD	Enhanced Due Diligence

1. About Settings □ Enhanced Due Diligence (EDD)

2. Enhanced Due Diligence (EDD)

2.1 Enhanced Due Diligence (EDD) □ General

EDD cases are kept in an EDD master table. When EDD is enabled, every time EDD criteria is met, system will check this table to make sure client and account numbers do not exist before creating a new case.

Figure 2.4: Onboard Monitoring

The information displayed is in the table below:

#	Name	Description
1	Onboard Monitoring (EDD Enable)	1. Allow the module to perform the necessary EDD features. 2. If enabled, the EDD form button and history panel is viewable on the Case Workflow.

		3. If enabled, the EDD configuration will be accessible for configuration. 4. If disabled, the module will not be viewable on the Case Workflow nor accessible for configuration. Default to "On".
2	Submission Type	Allow to select whether the EDD form is optional or mandatory process: Optional: EDD form submission process is optional and not mandatory. Mandatory: EDD form submission is mandatory. Default to "Mandatory". Additional toggles only available for Submission Type - Mandatory: Approval required for ____ level(s): - Allow to enable EDD approval and set the number of approvals required (minimum 1, maximum 3). If enabled, EDD case will be generated in EDD Workflow page whenever EDD criteria are met. Expiry in ____ day(s) from approval date: - Allow to set expiry date for EDD. If EDD approval is enabled, the expiry date will be counted based on EDD approval date. If not, it will follow onboard case approval date. Default to "On". Default value to 365.
3	Submission Level	- Allow to select when to display EDD form: Onboarding Workflow: EDD form will be part of client registration workflow and EDD form URL will be returned to user during registration process. Post-Onboarding Workflow: EDD form will only be available after client registration. During registration, only compute EDD status, but EDD form is not shown. Default to "Onboarding Workflow". Display EDD form for clients of all risk levels: - Allow to display EDD form for all risk levels. - If disabled, EDD form by default only appears for:

		• Risk levels marked as high risk under Setting: CPM - Risk Assessment. • Other risk levels specified for custom template. c. Default switch to "Off". d. Show disclaimer: "When disabled, EDD form will only be generated for risk levels specified as high risk under Setting: CPM - Risk Assessment and others specified under custom template".
4	Default Template Rule	Allow to select default template ID. Initially, the default template should be the built-in template (EDDF001).
5	Custom Template Rule	1. Allow to select the template ID. 2. Allow to select the client type, include 'All' option. 3. Allow to select the product type, include 'All' option. 4. Allow to select the risk level type, include 'All' option. 5. Cross button: Allow to delete custom template rule.
6	+ Add New	1. Allow to add a new custom template rule if each EDD form is unique based by the client type and product type. 2. The same template ID can be selected more than once.

2.1.1.4 Client Profile Management

The screenshot shows the 'Client Profile Management' configuration window. It includes a toggle switch (1) in the top right corner. Below the title, there are two buttons for 'Submission Type': 'Optional' (2) and 'Mandatory' (3). Under 'Default Template Rule', there is a dropdown menu for 'Default Template ID' currently set to 'Standard EDD Form' (4). The 'Custom Template Rule' section (5) contains four dropdown menus: 'Template ID' (set to 'Standard EDD Form'), 'Customer Type' (set to 'Person/Individual'), 'Product Type' (set to 'CASA'), and 'Risk Level' (set to 'Medium'). A '+ Add New' button is located at the bottom right of the configuration area.

Figure 2.5: Risk Profiling

The information displayed is in the table below:

#	Name	Description
1	Client Profile Management (EDD Enable)	1. Allow the module to perform the necessary EDD features. 2. If enabled, the EDD form button and history panel is viewable on the Case Workflow. 3. If enabled, the EDD configuration will be accessible for configuration. 4. If disabled, the module will not be viewable on the Case Workflow nor accessible for configuration.

Figure 2.7: EDD Templates

The information displayed is in the table below:

#	Name	Description
1	Template ID	Display the template ID.
2	Description	Display the template description.
3	Date Created	Display the date first new record of template registered in the app.
4	Date Updated	Display the record of the template been updated.
5	Action	1. Update: Allow to update the template details (description). 2. Delete: Allow to delete the template. 3. More Setting: Allow to access and modify the questionnaire inside the template.
6	+ Add New Template	Allows to add new EDD template.

Note: The *Master Template* is available as a reference and cannot be **updated** or **deleted**. To create a customized EDD template, use the **Add New** option.

• Add New / Update EDD Template

The screenshot shows a mobile application interface for adding a new EDD template. The form is titled 'Add New Template' and includes a close button in the top right corner. It features two input fields: 'Template ID' (containing 'EDDT000') and 'Template Description' (which is empty). A red 'Save' button is positioned below the description field. At the bottom of the screen, a status bar displays the template ID 'EDDT052', the form name 'EDD Form - CC', and two dates: '04-Oct-2024' and '05-Jun-2025'.

Figure 2.8: Add New EDD Template

The information displayed is in the table below:

#	Name	Description
---	------	-------------

1	Template ID	Display the template ID, which is a system-generated unique sequence number, not editable by user. Format: EDDTXXX. (XXX is a 3-digit number representing the order of template creation.)
2	Template Description	1. Allow user to add description for the template. Maximum 200 characters. 2. Description must be unique. Error prompt shall be shown if user tries to save with an already-used description.

• EDD Template → More Setting

Allows to view the EDD template questions.

The screenshot shows the 'EDDT052 - EDD Form - CC' interface. At the top, there are 'Update' and 'Validation' buttons. Below them is a '+ Add New Question' button. A table displays the list of questions with columns: Item No., Display Order, Answer Type, Description, and Action. Numbered callouts (1-6) highlight the following elements:

- 1: Item No. column header
- 2: Display Order column header
- 3: Answer Type column header
- 4: Description column header
- 5: Action column header
- 6: + Add New Question button

Item No.	Display Order	Answer Type	Description	Action
001	0	Header/Tittle	Question Header	
002	1	Radio Button	Customer Type	

Figure 2.9: More Setting

The information displayed is in the table below:

#	Name	Description
1	Item No.	Display the system-generated item number.
2	Display Order	Display the order in which the question is displayed on the actual form (if set). Remains blank if not set.
3	Answer Type	Display the expected answer type. Possible types:

		• Header/Title • Yes/No • Checkbox • Radio button • Drop-down List • Input Text (Single Line) • Input Text (Multi Line) • Input Text (Integer) • Input Text (Decimal)
4	Description	Display the description of the question.
5	Action	1. Update: Allow to update question details. 2. Delete: Allow to delete questions.
5	+ Add New Question	Allows to add new questions in the questionnaire to the template.

• Add / Update Question

Update Question when clicking edit action.

The screenshot shows a modal window titled "Add Question" with a close button (X) in the top right corner. The form contains the following fields and controls, each marked with a red circle and a number:

- 1**: Item No. text input field containing "011".
- 2**: Display Order text input field containing "0".
- 3**: Answer Type dropdown menu with "Please Select" and a downward arrow.
- 4**: Field Mapping dropdown menu with "Please Select" and a downward arrow.
- 5**: Description text input field.
- 6**: Content text input field.
- 7**: Required toggle switch, currently turned off.
- 8**: Apply button.

Figure 2.10: Update Question

#	Name	Description
1	Item No.	Display unique identifier, non-editable by user. Format: xxxxxxxQyyy Where xxxxxxx refers to the Template ID and yyy is a 3-digit sequence number of the question creation.
2	Display Order	Display order of question with regards to the other questions in the section. If not specified, the sections will be displayed in the order of their creation (oldest to newest). Display order must be unique. Error prompt shall be shown if user tries to save with an already-used display order.
3	Answer Type	Allow to choose the expected answer type that could be one of the following: 1. Header/Title - No answer. Question content is displayed as is to be used as section header. 2. Yes/No - Two options. Yes or No. Only one option can be chosen. 3. Checkbox - Multiple options that are pre-set by the user and presented in checkbox format. More than one options can be chosen. 4. Radio Button - Multiple options that are pre-set by the user and presented in radio button format. Only one option can be chosen. 5. Drop-down List - Multiple pre-set options presented in a drop down list format. Drop-down lists can accommodate large number of options (e.g. country). Only one option can be chosen in the drop-down list. User can manage drop-down items through Setting: General - Parameter. 6. Input Text (Single Line) - User can input their own answer in single line text form. 7. Input Text (Multi Line) - User can input their own answer in multi-line form. 8. Input Text (Integer) - User can input their own answer, but only integer is allowed. 9. Input Text (Decimal) - User can input their own answer, but only decimals are allowed. 10. Date - User can choose a date from calendar.

		For Radio Button and Checkbox, user can set the options according to their needs. By default, initially display 1 (one) option, then user can add more by clicking on a '+ Add Option' button. Maximum 5 (five) answer option per question. For Input Text answer types, minimum length is 1 character, and user can set the maximum field length as needed. If not set default maximum length will be applied. This default value can be configured in Setting: General - Parameter.
4	Field Mapping	1. Allow selection of active data mapping field from the CIF table to map the item's value to Note: Field Mapping list retrieved from Setting: Data Mapping with status "Active"
5	Description	1. Allow to write a description for the template. 2. Description must be unique. Error prompt shall be shown if user tries to save with an already-used description. Maximum length is 200 characters
6	Content	Allow input of the content of the question. Note: Content will be displayed in the form
7	Required	1. Allow to set whether a question is required to be answered or not. 2. Default to "Disable" Disable for Answer Type: Header / Title.
8	Apply	Apply any changes or updates made.

• Validation

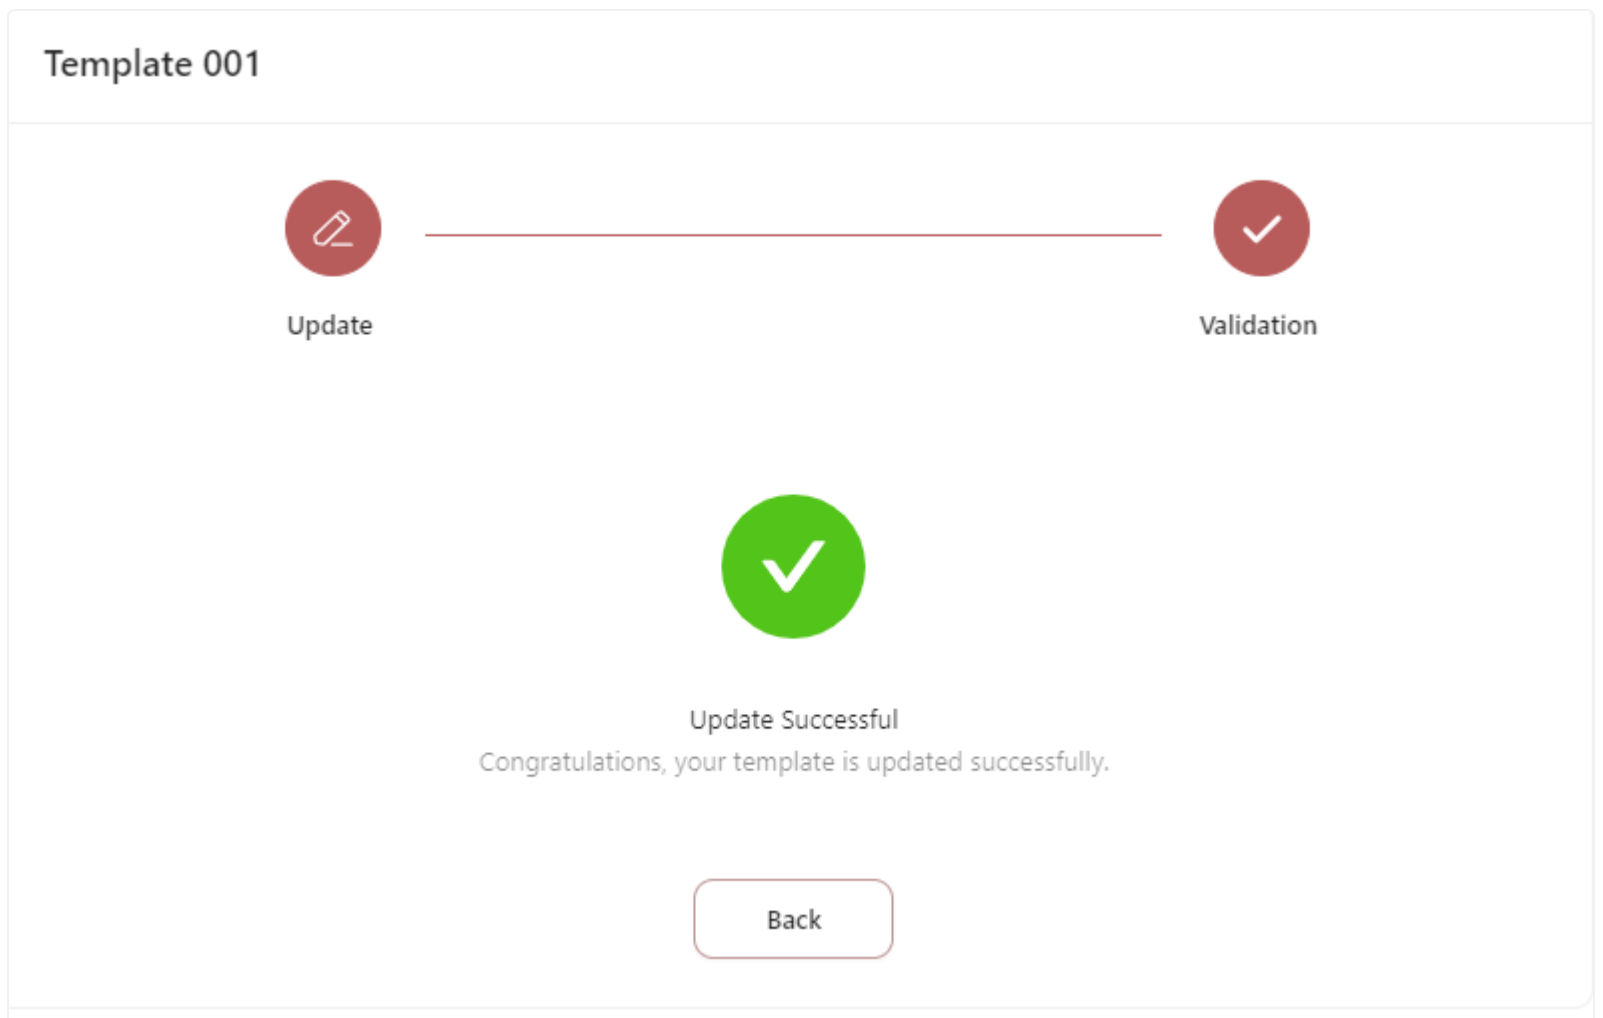

Figure 2.11: Validation

1. Validation notifies user whether the configurations setup is successful or unsuccessful
2. The wizard step can continue to next page without any update or back to previous page
3. Each of the configuration during update will update the database directly when clicking save.
