All sample screens as attached are for the reader’s viewing purpose only. The actual screen displayed in the [iSE M.ai](#) system shall be based on the specification of The Customer’s as agreed upon.

7. Disclaimer

- All advice given or recommendations made in this document are made in good faith on the basis of the information provided and otherwise generally available or known to TESS at the time of writing.
- No advice given or statements or recommendations made shall be in any circumstances constitute or be deemed to constitute warranty by TESS as to the accuracy of such advices, statement and recommendations.
- Subject to the contents of the Supply of Software, Licensing and Service Agreement executed, TESS shall not be liable for any loss, expense, damage or claim arising out of the advice given or not given or statements made or omitted to be made in connection with this document.
- **This document is **subject to updates**. Please note that it may be revised periodically within the same version to reflect any changes.

8. Product Version

This document is based on product version 1.3. Any other product version may not be relevant to this specific document content and its information.

9. Abbreviation & Definitions

Abbreviation	Definition

Overview of History
1. About History

This section outlines the overall history in a page that will list all the user’s activity that is accessing the system and navigating around it.

2. Main Page

2.1 Main Page ▯ History page

2.1.1 My History and All History

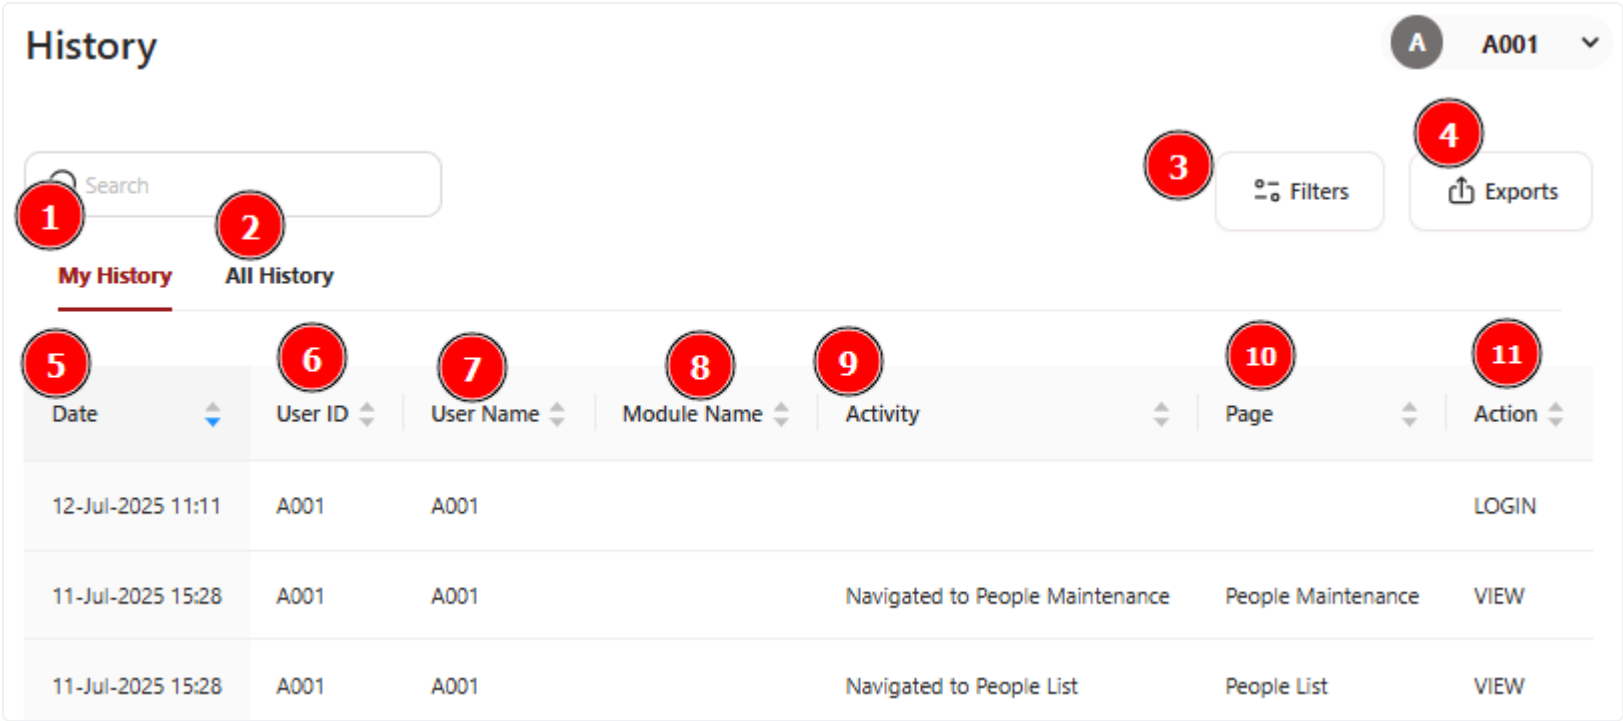

Figure 2.0: My History page

The display information is in the table below:

#	Name	Description
1	My History	List the logged in user's activity that is accessing the system and navigating through it.
2	All History	List all the user's activity that is accessing the system and navigating around it. 1. If the user type is either admin or people admin, this user can view all other user’s activity in the system. 2. If the user type is people, this user can only view his/her own activities when browsing the history page.

3	Filters	To search any information related to the table's column data. • Can combine multiple data column using AND • The filtering should display the item description instead the operator type. • Condition for filtering item type: =, >, <, >=, <=, <>
4	Exports	Allow users to export transaction history table as PDF or Excel files within the data timeframe.
5	Date	Display the date of the user performing the specify activity.
6	User ID	Display the user's ID performing the specific activity.
7	User Name	Display the user's name performing the specific activity.
8	Module Name	Display the user is accessing to which module when performing the specific activity.
9	Activity	Display the user's activity on the specific page.
10	Page	Display the user navigation on the specific activity.
11	Action	Display the user's actions performing the specific activity.

Figure 2.1 : Filters

1. A single active-passive filtering button that includes all relevant fields based by the table's column data.
2. The active-passive filtering button can combine multiple data column using AND to get better output result with the filtering formula. The filtering should display the item description instead the operator type.

#	Name	Operator Type	Description
1	Equal to	=	Equivalent within two data or expression.
2	Greater than	>	Greater number within two data or expression.
3	Less than	<	Lesser number within two data or expression.
4	Greater than equal to	>=	Equivalent and greater number within two data or expression.
5	Less than equal to	<=	Equivalent and lesser number within two data or expression.
6	Not equal to	<>	Not equivalent between the two data or expression.

3. The active-passive filtering can automatically display the correct filtering type based by the data type.

#	Name	Operator Type	Description
1	Input text	Outline Text	If the data column is a normal text character, user manual input the value.
2	Parameter list	Drop down list	If the data column is reading from a parameter code, automatically display the list of the parameter value and can select multiple value instead manual input.
3	Date	Date & Time	If the data column is a date format, user can select which date.

4. A search text filtering to search any information related to the table's column data.

2.1.2 Exports History Details

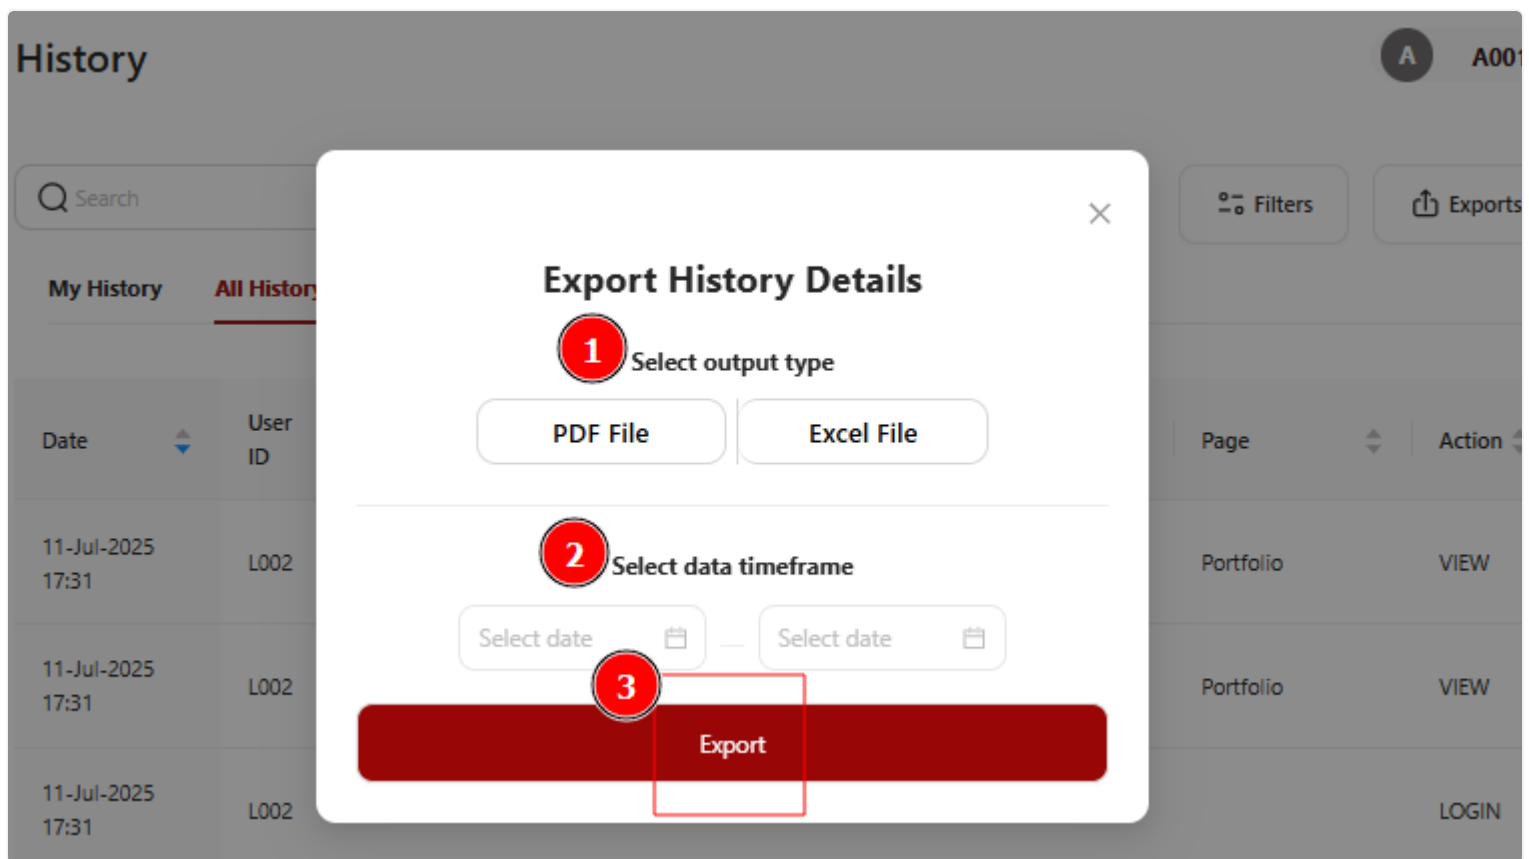

Figure 2.2 : Exports data

1. User able to export all the history details as desired to view the activity history under 'My History' or 'All History' page.
2. User click type of history first then click the "Export" button.
3. A pop up screen of the desired history will shown as above.

The display information is in the table below:

#	Name	Description
1	Output data type	User allow to select for data type on the history details. • PDF File • Excel file
2	Data Timeframe	User able to select data timeframe by set date range from initial to latest date as desired.
3	Export	The system will auto download the output data file and user able to view the history details.
