Preface

1. Customer & TESS Definition

TESS Innovation Sdn Bhd is hereinafter referred as “TESS” of the other part in this document.

2. Document Confidentiality

This document contains information that is proprietary to TESS and The Customer. This document, or any part thereof, shall not be copied, reproduced, translated or reduced to any electronic medium or machine-readable form or disclosed to any third party without the prior written consent or authorization of TESS and the Customer.

3. Purpose of Document

The purpose of this document is to clearly guide user to perform day by day operation.

4. Intended Audience

- Project team from TESS
- Project team from The Customer

5. Document Control

This document is subject to change control. All changes to this document shall be documented and distributed as “Release Version”. It will consist of the following: -

- Full replacement of the document; or

- Full replacement of a section in the document; or
- An addendum to the document.

Each revision will be assigned with a unique “Release Version” number and date. All pages distributed within a Document Release Notice will have the appropriate Release Version and Release Date indicated.

6. Screenshots

All sample screenshots as attached are for the reader’s viewing purpose only. The actual screen displayed in the [iSEM.ai](#) system shall be based on the specification of The Customer’s as agreed upon.

7. Disclaimer

- All advice given or recommendations made in this document are made in good faith on the basis of the information provided and otherwise generally available or known to TESS at the time of writing.
- No advice given or statements or recommendations made shall be in any circumstances constitute or be deemed to constitute warranty by TESS as to the accuracy of such advice, statement and recommendations.
- Subject to the contents of the Supply of Software, Licensing and Service Agreement executed, TESS shall not be liable for any loss, expense, damage or claim arising out of the advice given or not given or statements made or omitted to be made in connection with this document.
- **This document is **subject to updates**. Please note that it may be revised periodically within the same version to reflect any changes.

8. Product Version

This document is based on product version 1.3. Any other product version may not be relevant to this specific document content and its information.

9. Abbreviation & Definitions

Abbreviation	Definition
OM	Onboard Monitoring
KYC	Know Your Customers
STR	Suspicious Transaction Activity

Overview of Onboard

1. About Onboard □ Case Workflow

About: Each user will have cases that are directly generated without going through Portfolio stage to investigate suspicious activities. Users can view details, perform investigations, and raise an STR if the client is deemed suspicious.

1.1 Apps Process Flow to Manage Onboard Case Workflow

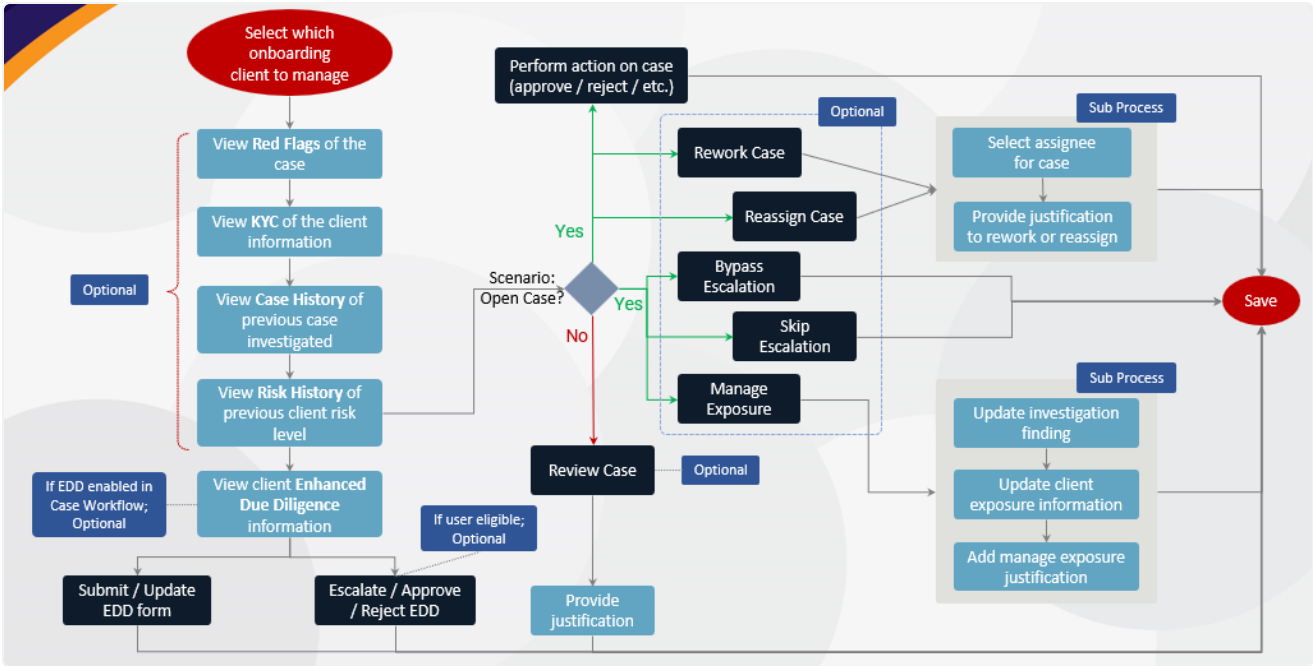

Figure 1.0: Apps Process Flow to Manage Onboarding

The figure above describes in general the case workflow features and function.

1. Each client is based on their master number and primary number (CIF number, ID number or unique identifier, etc.).
2. The case workflow list consists of two filtering tabs:
 - a. **My Cases** - Only displays cases assigned to the logged-in user.
 - b. **All Cases** - Displays all cases available in the organization.
3. The case workflow table has a "**Columns**" button which allows users to choose which columns to display and which not to.

2. Case Workflow

2.1 Case Workflow □ My Cases and All Cases

2.1.1 How to View Onboard Cases List?

This section outlines how users can view the onboard cases list assigned to both themselves and in the organization overall.

Steps to View Onboard Cases List:

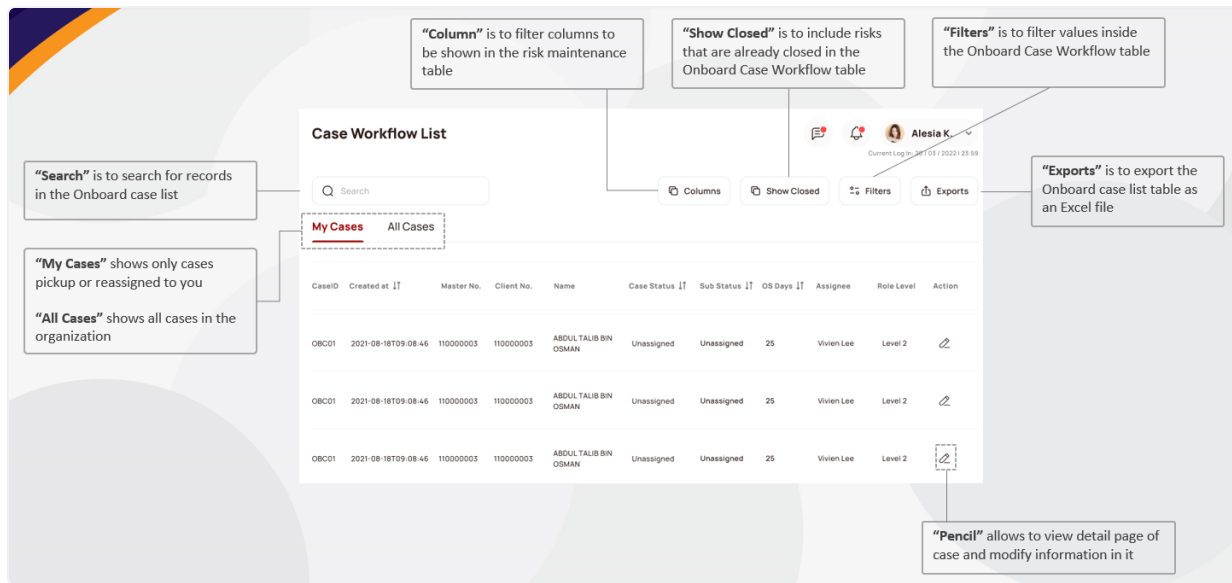

Figure 2.0: How to View Onboard Cases List

1. In this section, users can click **"My Cases"** tab to view all the onboard cases list picked up or reassigned to the user themselves.
2. Users can click **"All Cases"** tab to view all the onboard cases list in the organization.
3. If users want to filter columns of cases, click **"Columns"** tab to filter the searches.
4. If users want to include risks that are already closed in the onboard case together with the rest of the cases in the organization, click **"Show Closed"** tab.
5. If users want to filter values inside of onboard cases, click **"Filters"** tab to filter the searches.
6. If users want to export the onboard case list as an Excel file, users can click the **"Exports"** tab.
7. For further information about onboard case details, users can click on the **"Pencil"** button.

i. My Cases

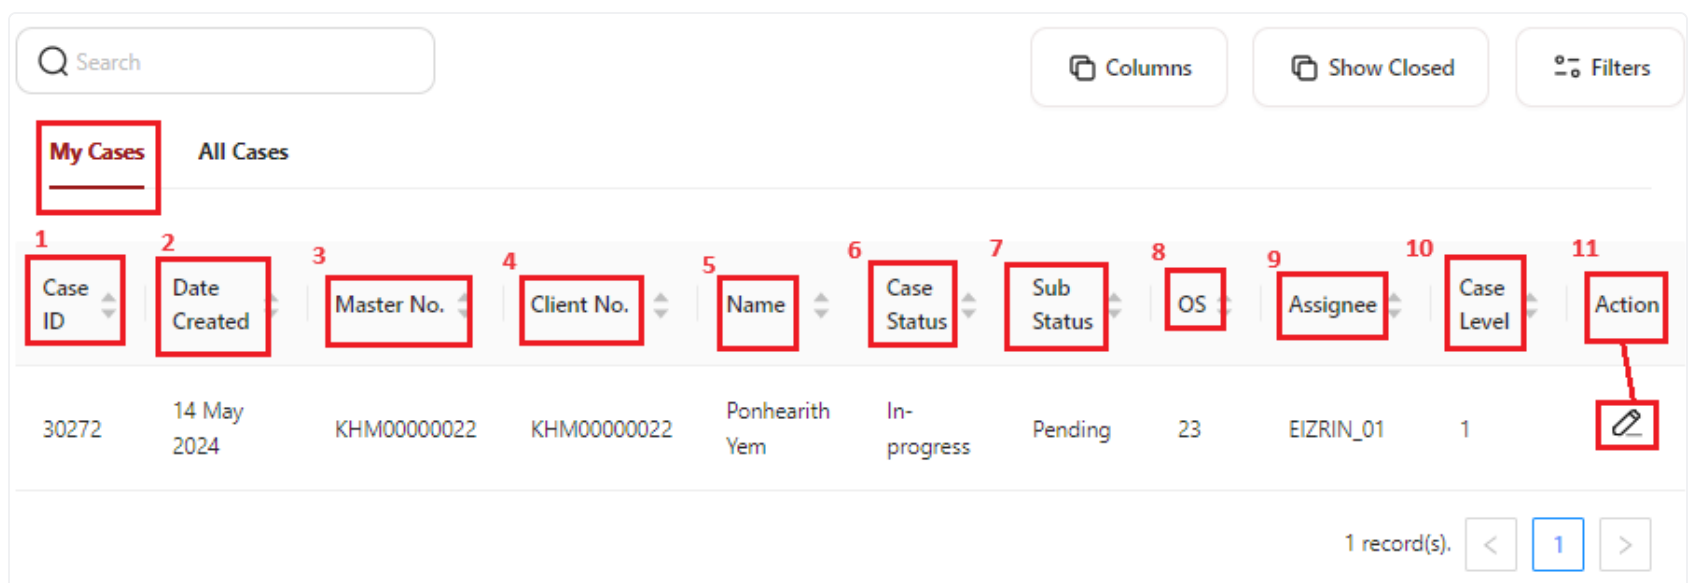

Figure 2.1: Display of 'My Cases' under Case Workflow List

This section only displays cases assigned to the logged in user.

#	Name	Description
1	Case ID	Module case primary key ID number.
2	Date Created	The date that the case first created and escalate for review.
3	Master No.	Display the primary number (CIF number, ID number, etc.).
4	Client No.	Display the client CIF ID or other golden unique number.
5	Name	Display the client's full name.
6	Case Status	The final status of the case.
7	Sub Status	The final sub status of the case.
8	OS	Display total days of the red flag is open and outstanding.
9	Assignee	Display the user's name who are investigating the case.
10	Case Level	Display the user's case workflow level.
11	Action	Pencil: Allow users to update the case and perform investigation to escalate the case.

All Cases:

My Cases

All Cases

1	2	3	4	5	6	7	8	9	10	11

Figure 2.2: Display of 'All Cases' under Case Workflow List

The table below displays all cases available in the organization:

#	Name	Description
1	Case ID	Module case primary key ID number.
2	Date Created	The date that the case first created and escalate for review.
3	Master No.	Display the primary number (CIF number, ID number,

		etc.).
4	Client No.	Display the client CIF ID or other golden unique number.
5	Name	Display the client's full name.
6	Case Status	The final status of the case.
7	Sub Status	The final sub status of the case.
8	OS (Outstanding)	Display total days of the red flag is open and outstanding.
9	Assignee	Display the user's name who are investigating the case.
10	Case Level	Display the user's case workflow level.
11	Action	Pencil: Allow users to update the case and perform investigation to escalate the case.

Functions of navigation buttons on Case Workflow page:

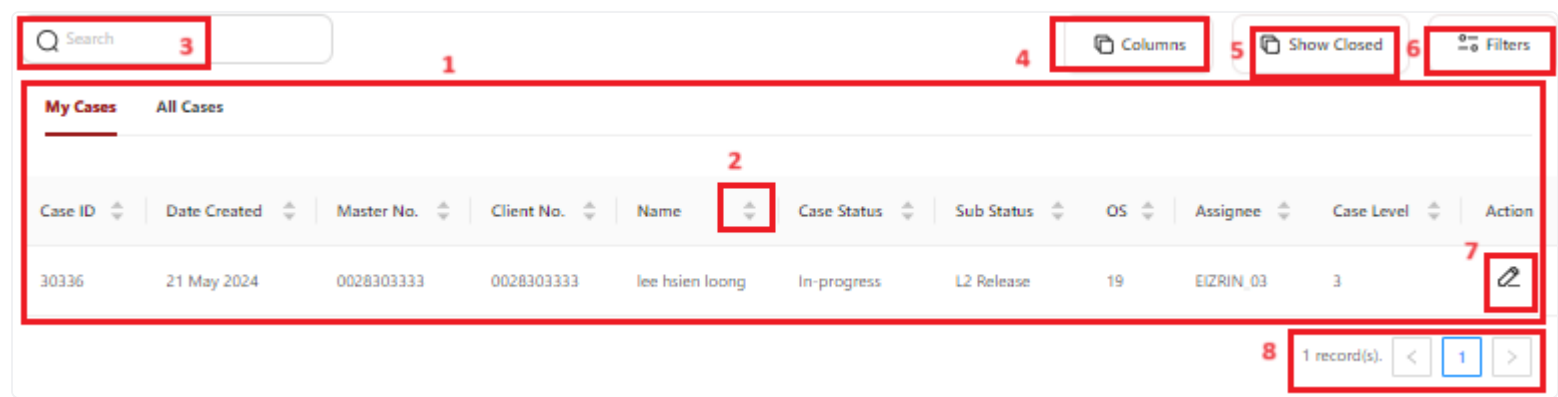

Figure 2.3: Display of general info panel located at the top of Case Workflow List page

The figure above explains each of the buttons and search functions at the Case Workflow List page screen:

#	Name	Description
1	Case workflow info	Displays the general information about the cases:
2	Sorting button	Click to sort based on ascending/descending format for each table's columns.
3	Search bar	Accepts user input to be searched for in database.
4	Columns	To show/hide columns of portfolio list of tables as desired.
5	Show Closed / Show Open	Allow users to display cases when click in the options of: - Show Closed : Display the list of closed cases - Show Open : Display the list of open / in progress cases
6	Filters	To search any information related to the table's column data.

		• Can combine multiple data column using AND • The filtering should display the item description instead the operator type. • Condition for filtering item type: =, >, <, >=, <=, <>
7	Action button	Allow the user to update the case and perform an investigation to escalate the case.
8	Pagination	• Can display 10/20/50/100 records of the client's portfolio per page. • Can Click the button to search for the next or previous page of records.

2.2 Case Workflow □ Case Workflow Detail

This section allows users to view the details of the onboard case workflow generated.

2.2.1 How to View Onboard Cases Workflow Information?

This section outlines how compliance users can view case workflow information under Onboard Monitoring.

Steps to View Onboard Cases Workflow Information:

The screenshot displays the 'Case Info' and 'Red Flags' sections of the Onboard Cases Workflow Information interface. Callouts provide detailed explanations of the various components and actions available to the user.

- Case Info:** Displays general case details for 'ABDULAZIZ BIN ABDUL RAHMAN'. It includes fields for Case Status (Unassigned), Sub-Status (Unassigned), Case ID (OBC01), Assignee (A002), Client No. (1001001001), Master No. (1001001001), and Created at (2021-08-16). Actions like 'Rework' and 'Reassign' are available.
- Red Flags:** A table displaying red flags triggered during the onboarding process. The table has columns: RED FLAG, TYPE, DESCRIPTION, DATE, and OUTSTANDING. It shows three entries with details like 'WM01', 'Sample Type1', and 'Sample Description 1'.
- KYC:** Displays the client's information from CIF, Account, UBOs etc.
- Case History:** Displays the previous created case and investigated on the client.
- Risk History:** Displays the previous client risk level generated by system and manual change.
- Activity Log:** Shows all changes and activities done to the case in chronological order. It includes an 'Add Case Justification' button and a list of activities like 'CorallSem Alert' and 'A003'.
- Files:** A section for managing attachments, including 'Add File' and 'Download all' buttons. It shows two files: 'Client's Bank Statements Feb 2021'.
- Buttons:** 'Manage Exposure', 'Draft Report', and 'Approve' buttons are visible at the top right.

For OB-Case Workflow

Figure 2.4: How to View Onboard Cases Workflow Information

1. **Red Flag:** Allow users to view the details of red flags generated. Can also be displayed based on the Red Flags match record, which allow users to view details of the red flags match results hit against which watchlist record.
2. **KYC:** Allow users to view the client's information.

3. **Case History:** - Case History summary - case history table.
4. **Risk History:** Allow users to view any past risk changes history built on the client's portfolio.

2.3 Case Workflow List ▯ Draft Report

2.3.1 How to Submit Draft Report Manually?

This section outlines how compliance users can submit draft reports manually.

Steps to Submit Draft Report Manually:

The screenshot displays the 'Draft Report for TMC' interface. On the left, the 'Case Justification' section includes a 'Category' dropdown, an 'Assign Case To' dropdown (set to 'All Branch'), and a 'Write Something' text area. Below this is an 'Upload Attachments' section with a 'Drop files browse through your machine' button. The main 'Draft Report' section features a progress bar at the top with three steps: 'Case Details', 'Draft Report' (current), and 'Case Submitted'. Below the progress bar is a 'Report History' table with columns for 'CASE ID' and 'DATE'. A '+ Add New' button is located next to the table. A callout box explains: '"Add New" allow to add new record for the reporting purpose. Each record come with a set of client, account, transaction information to be fill in. Existing client information will be auto-populate however for walk-in client require manual input'. Below the table is a 'Next' button. A callout box explains: '"Next" allows to go the 2nd-wizard step to draft and submit report'. The 'Next' button is highlighted with a red dashed border and a red arrow points to it from the callout box.

Figure 2.5: How to Submit Draft Report Manual

1. The update case detail page allows users to draft report such as Suspicious Transaction Report (STR). The draft report type to display can be configured under **Setting – TM: Rule Parameter** while the workflow can draft a report can be configured under **Setting – TM: Case Workflow**.
2. The draft report allows users to add a new report by clicking on the "+ Add New" if the case does not have any drafted reports before. The draft report displays the following information:

Figure 2.9: Display of 'Case Info' under each case

The general case information panel is on the left side of the page. The information is displayed in the table below:

#	Name	Description
---	------	-------------

1	Outstanding Days (OS Days)	Display total days of the red flag is open and outstanding. Present date minus date red flag is generated.
2	Full Name	Display the client's full name.
3	Case Status	Display the final status of the case.
4	Sub Status	Display the final sub status of the case.
5	Case ID	Display module case primary key ID number. Each module is unique with a prefix. Watchlist monitoring: WMC[Number]
6	Assignee	Display the user's name who is investigating the case.
7	Client No.	Display the client's CIF ID or other golden unique number.
8	Master No.	Display the primary number (CIF number, ID number, etc.).
9	Created on	Display the date that the case was first created and escalated for investigation.
10	Rework button	- Only available for escalated cases. Allow the user to de-escalate the case to rework the case information. - Can be configured whether the workflow can rework the case under Setting – WM: Case Template.
11	Reassign button	Allow the user to save the reassigned case to a different assignee.

2.4.1 How to Rework and Reassign Case?

This section outlines how compliance users can rework and reassign cases while investigating red flags.

Steps to Rework and Reassign Case:

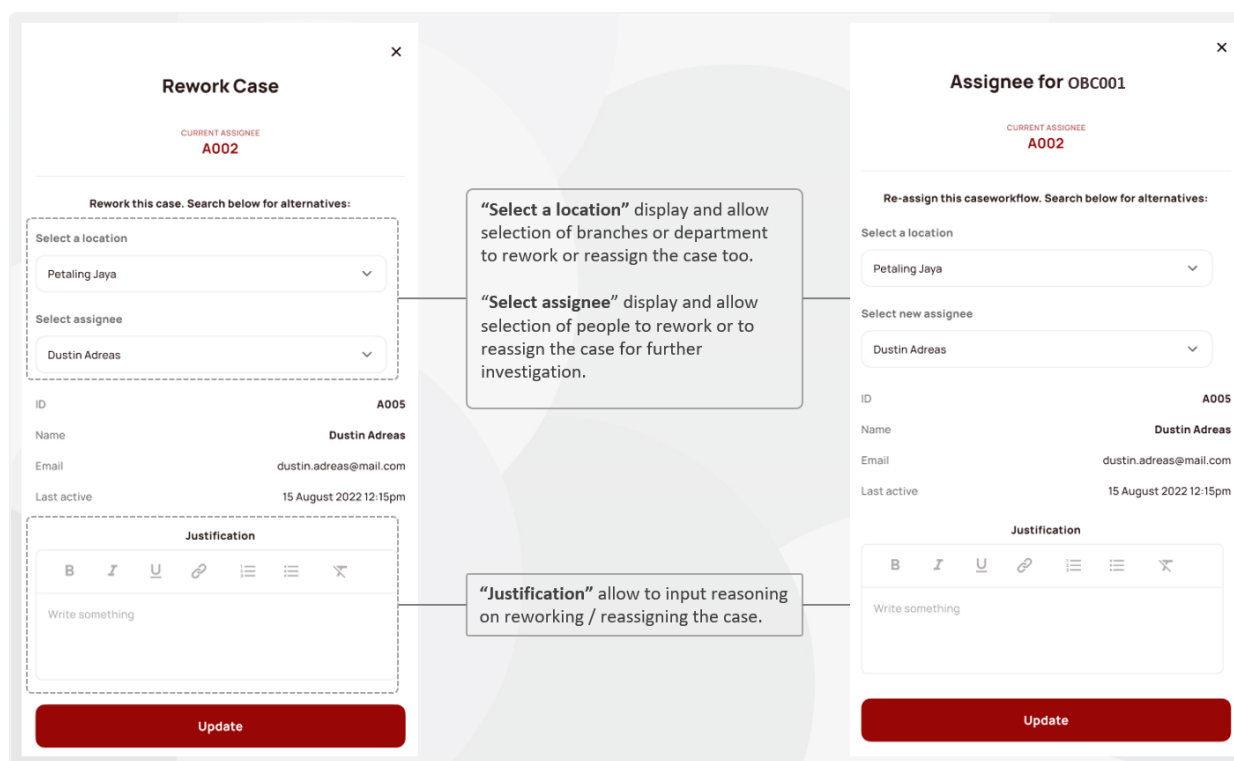

Figure 2.10: How to Rework and Reassign Case

1. Users can navigate to the **"Rework Case"** and **"Reassign Case"** pop-up screen by clicking the **"Rework"** and **"Reassign"** buttons respectively.
2. To rework or reassign a case, user needs to select a location where case is being reworked or reassigned and then select an assignee to the case.
3. The assignee's information will be displayed, alongside the date the assignee was last active.
4. Users can input the reasoning on reworking or reassigning a case in the **"Justification"** bar.
5. Once users are done, click on the **"Update"** button to save and update the information to rework or reassign the cases.

2.3.2 Why do we need to Rework and Reassign Case?

Reworking and Reassigning cases are common practices to ensure the effectiveness and efficiency of the compliance process. Further explanation for some scenario on rework and reassign case are displayed as below:

Rework

1. **Error Correction:** To correct errors or false positives generated by automated AML systems.
2. **Enhanced Investigation:** To conduct a more in-depth investigation or analysis of a suspicious activity.
3. **Quality Assurance:** To ensure that the compliance process is effective, and decisions are accurate.
4. **Regulatory Compliance:** To address cases that become relevant due to new information or regulatory updates.

5. **Timeliness:** To meet time-requirements or deadlines.
6. **Skill Development:** To provide training and skill development opportunities for compliance officers.
7. **Auditing and Oversight:** To review and assess previous decisions for compliance with policies and regulations.
8. **Lack of Information:** The information given by clients is incomplete and/or unclear.
9. **Attachments:** Uploaded attachments are unclear and/or obscure.

Reassign

1. **Workload Distribution:** To evenly distribute the caseload among compliance officers.
2. **Risk Management:** To prioritize high-risk cases and allocate resources effectively.
3. **Expertise Matching:** To assign cases to specialists or investigators with the right expertise.
4. **Resource Optimization:** To make sure that resources are allocated efficiently.
5. **Timeliness:** To ensure cases are reviewed and resolved within the required timeframe.
6. **Training and Skill Development:** To provide exposure to different aspects of AMLA for skill development.
7. **Auditing and Oversight:** To review and assess the decisions made by compliance officers in light of institutional policies and regulatory requirements.
8. **Assignee Availability:** There are no assignees working a case.

2.4.2.1 Rework Pop-up Screen

Rework Pop-up Screen

The information display in the Rework pop-up screen:

The screenshot shows a 'Rework Case' pop-up window. At the top, it displays 'Rework Case TM30359' (1). Below this, the 'CURRENT ASSIGNEE' is 'A002' (2). The 'CURRENT CASE TEMPLATE & WORKFLOW' is 'Template 4 - L2 AML CO Supervisor - Level 2' (3). A section titled 'Rework this case. Search below for alternatives:' (4) contains three dropdown menus: 'Select a location', 'Select case template & workflow', and 'Select assignee'. Below these are fields for 'ID' (5), 'Name' (6), 'Email' (7), and 'Last Active' (8). A 'Justification' section (9) has a text area with the placeholder 'Write something...'. At the bottom is a red 'Update' button (10).

Figure 2.11: Rework Pop-up Screen Information Display

Explanation of the attributes displayed in the Rework Pop-up Screen:

#	Name	Description
1	Case ID	Display the module case primary key ID number.
2	Current Assignee	Display the user's name who are investigating the case.
3	Current Case Template & Workflow	Display the current case template & workflow used by the user.
4	Rework details	1. Location - Allow to select the location to rework. 2. Case Template & Workflow - Allow to select the case template & workflow to filter the specific's user case template. 3. Assignee - Allow to select user list based on the case template & workflow

5	ID	Display the new assignee's ID.
6	Name	Display the new assignee's name.
7	Email	Display the new assignee's email address.
8	Last Active	Display the new assignee's last active date.
9	Justification	Allow user to comment/justify reasoning of de-escalating the case for rework purposes.
10	Update button	Allow and confirm to rework the case to new assignee.

2.4.2.2 Reassign Pop-up Screen

Reassign Pop-up Screen

The information display in the Reassign Pop-up Screen:

The screenshot shows a 'Reassign Pop-up Screen' for case 'TM30359'. It includes a header with the case ID, a section for the current assignee, a search area for alternatives, and a list of potential new assignees with their details and a justification field. The 'Update' button is at the bottom.

Figure 2.12: Reassign Pop-up Screen Information Display

Explanation of the attributes displayed in the Reassign Pop-up Screen:

#	Name	Description
1	Case ID	Display the module case primary key ID number.

2	Current Assignee	Display the user's name who are investigating the case.
3	Reassign details	1. Location - Allow to select the location to rework. 2. Case Template & Workflow - Allow to select the case template & workflow to filter the specific's user case template. 3. Assignee - Allow to select user list based on the case template & workflow
4	ID	Display the new assignee's ID number.
5	Name	Display the new assignee's name.
6	Email	Display the new assignee's email address.
7	Last Active	Display the new assignee's last active date.
8	Justification	Allow user to comment/justify reasoning of de-escalating the case for reassigning purposes.
9	Update button	Allow and confirm to rework the case to new assignee.

2.5 Case Work Detail □ Review Closed Cases

2.5.1 How to Review Closed Cases?

In the Case Workflow Detail page, users are given a navigation button to review closed cases as shown in the figure below.

Steps to Review Closed Cases:

The screenshot displays the 'Case Info' page for a case with status 'Closed'. A red 'Pre-requisite' label points to the 'Closed' status. A 'Review' button is highlighted with a red dashed box. A callout box explains: 'The red flags, KYC, case history, and risk history of cases with Case Status: Closed can still be reviewed, but no change can be made to the information inside them'. Another callout box states: 'Review allows to add comment / justification to a closed case'. A modal titled 'Review Case - OBC01' is open, showing a 'Justification' text area and a 'Submit' button. The background shows a table of case details and an 'Activity Log' section.

Figure 2.13: How to Review Closed Cases

1. This button option can be found on the top right of the Case Workflow Detail page.
2. If users click on the **"Review"** button, a review case pop-up screen will appear.
3. This section allows users to review cases that have been closed to see the quality of the investigation.
4. To review a case, users can add comments or justify in the empty section given before submitting reviews.
5. If user has completed reviewing a case, click the **"Submit"** button to save it into the system for other users to see the quality of the investigation.
6. The users cannot use any action features in the page except viewing the five (5) tab information and commenting/justifying on the case. This can be configured whether the user can review cases under Setting – OB: Case Template.

2.6 Case Work Detail ▯ Red Flag Details

This section allows users to view the details of red flags generated.

Red Flags		Case History		
RED FLAG	TYPE	DESCRIPTION	DATE	OUTSTANDING
101937	9	Manual Onboard Case	26 Feb 2024 10:08am	2

Figure 2.14: Red Flag Details

The display information is in the table below:

#	Name	Description
1	View	Allow to select red flag to display red flag match record.
2	Red Flag ID	Display the module red flag primary key ID number.
3	Type	Display the onboard rule scenario type: • Depending on the onboard rule type, the detailed record will display differently • Type: a. Check Watchlist & sanction country b. Check Risk profile

		c. Check passport d. Check watchlist, sanction country, risk profile, passport e. Check Identification no
4	Description	Display the onboard rule scenario full description.
5	Date	Display the date that red flag is generated.
6	Outstanding	Display the total days of red flag open & outstanding.

2.6.1 How to View Red Flag Details?

This section outlines how the users can view all the match records of the specific red flags selected.

Steps to View Red Flag Details:

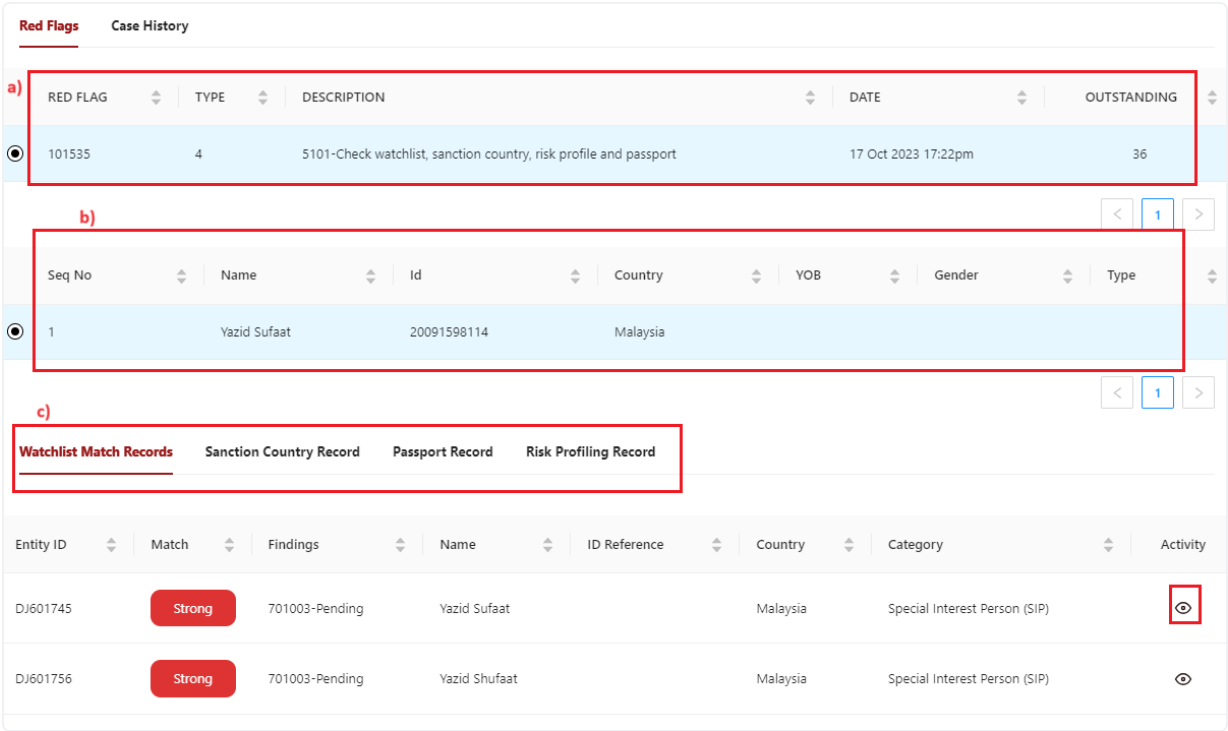

Figure 2.15: How to View Red Flag Details

1. Users navigate to the **"Red Flags"** tab in the **"Case Workflow Detail"** page.
2. Users will be able to view the red flags details, and then select the **"Radio"** button on the specific red flags to view on the Figure 2.15 (a) above.
3. Users will be able to view the list of screening results on the Figure 2.15 (b). As when user wants to further investigate on each client as desired, the users need to click on any box in the list and the information on Figure 2.15 (c) will be displayed.
4. Figure 2.15 (c) will be displayed based on the onboard rule scenario type that has been chosen. For example, for service type of 4, there will be shown all tabs such as **Watchlist Match Records, Sanction Country Records, Passport Record and Risk Profiling Record.**

5. Users can click on the **"Eye"** button to view further Match Record details for each of the client.
6. The users can also click on other tabs to see other match record details based on that tab entities.

2.6.1.1 Watchlist Match Record

Allow users to view details of the red flags match result hit against which watchlist record.

The information as *Figure 2.15 (c) above* display in the tab:

#	Name	Description
1	Entity ID	Display the watchlist entity ID: • Various watchlist provider • Self-generated for internal watchlist upload
2	Match	Display the accuracy of the watchlist result. • Strong • Weak
3	Findings	Displays the status based on the match record.
4	Name	Display the watchlist individual/corporate name that hits against the client's name
5	ID Reference	Display the watchlist individual/corporate (ID number, corporate registration number etc.)
6	Country	Display the watchlist individual/corporate nationality or country incorporated
7	Category	Display the watchlist individual/corporate category, subject to each various watchlist provider
8	Activity (View)	Allow to view watchlist details by the watchlist provider data feed in a side panel display. 1. Comparison Data 2. Biography 3. Profile Notes 4. Sanction Info 5. Relationship 6. Sources

WATCHLIST DETAILS

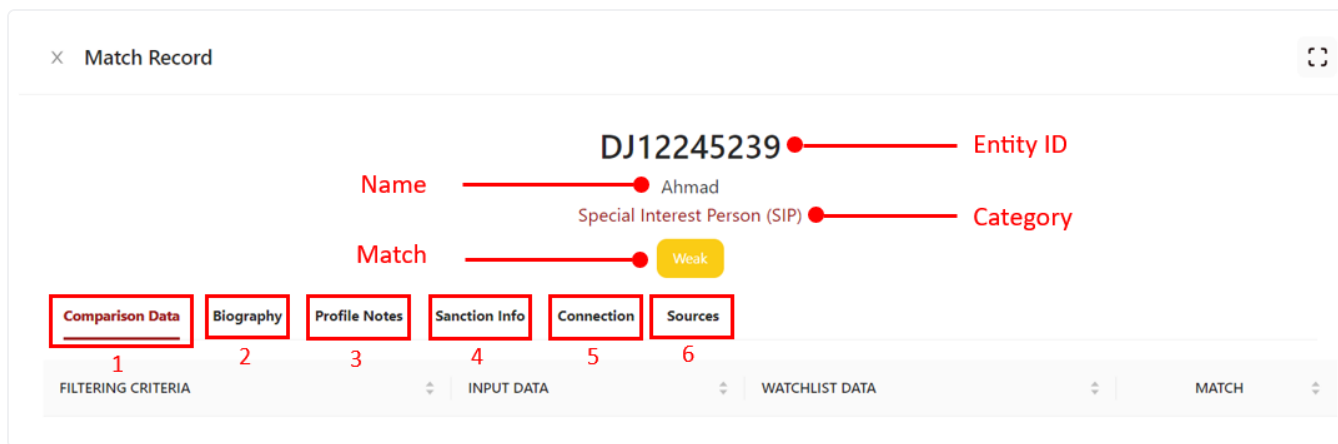

Figure 2.16: Match Record

Watchlist information will display the "**Match Record**" contains six (6) panels whereby each one of them also contains their own set of information, as listed below:

#	Name	Description
1	Comparison Data	Comparison Data displays the module red flag primary key ID number. It consists of four (4) panels: 1. Filtering Criteria. 2. Input Data. 3. Watchlist Data. 4. Match.
2	Biography	Biography displays the transaction rule scenario type. It consists of eight (8) panels: 1. Master Information. 2. General Information. 3. Name Information. 4. ID Information. 5. Description Information. 6. Date Information. 7. Country Information. 8. Address Information.
3	Profile Notes	Profile Notes displays the transaction rule scenario full description. It consists of three (3) panels: 1. Keyword searches. 2. People mentioned. 3. Profile description/information.
4	Sanction Info.	Sanction Info. displays the date that red flag is generated. It consists of three (3) panels:

		1. From Date. 2. To Date. 3. Reference.
5	Connection	Connection displays the total days of red flag open and outstanding. It consists of three (3) panels: 1. Associate Entity. 2. Name (Full name of associate). 3. Relationship.
6	Sources	1. It displays the source name. 2. It contains the name, date, and website link of the sources. 3. Allows user to toggle and click on the eye toggle button to show hidden information, or to navigate to the next page/link.

2.6.1.2 Sanction Country Record

This section allows user to view details of the sanction country checking result.

#	Name	Description
1	Country	Display the country data input from AMLWS send by third-party apps.
2	Result	Display the input data vs sanction country to see country is under sanction.

2.6.1.3 Passport Record

This section allow users to view the details of the passport verification result.

#	Name	Description
1	Passport No.	Display the passport number data input from AMLWS sent by third-party apps.
2	Passport Security No.	Display the passport security number data input from AMLWS sent by third-party apps.
3	Expiry Date	Display the passport expiry date data input from AMLWS sent by third-party apps

4	Expiry Date Security No.	Display the passport expiry date security number data input from AMLWS sent by third-party apps
5	Result	Display the input data vs passport verification to see passport is genuine or counterfeit.

2.6.1.4 Risk Profiling Record

1. This section allows users to view details of the risk factors result based by the risk assessment. The information display in the table:

#	Name	Description
1	Risk Factors	Display the risk factors based by the setting set under Setting: RP – Rule Assessment
2	Input Data	Display the risk parameter input data input from AMLWS send by third-party apps.
3	Match Data	Display the input data vs risk parameter data to see which data match one another.

2.7 Case Work Detail □ KYC Details

This section allow users to view the client's information. The client information availability is **subject based by:**

- Data provided by the organization
- Data mapping configuration setup under General setting

2.7.1 How to View KYC Information?

The following are a few tabs of KYC details, shown and explained below as examples of configured data mapping.

Steps to view KYC Information:

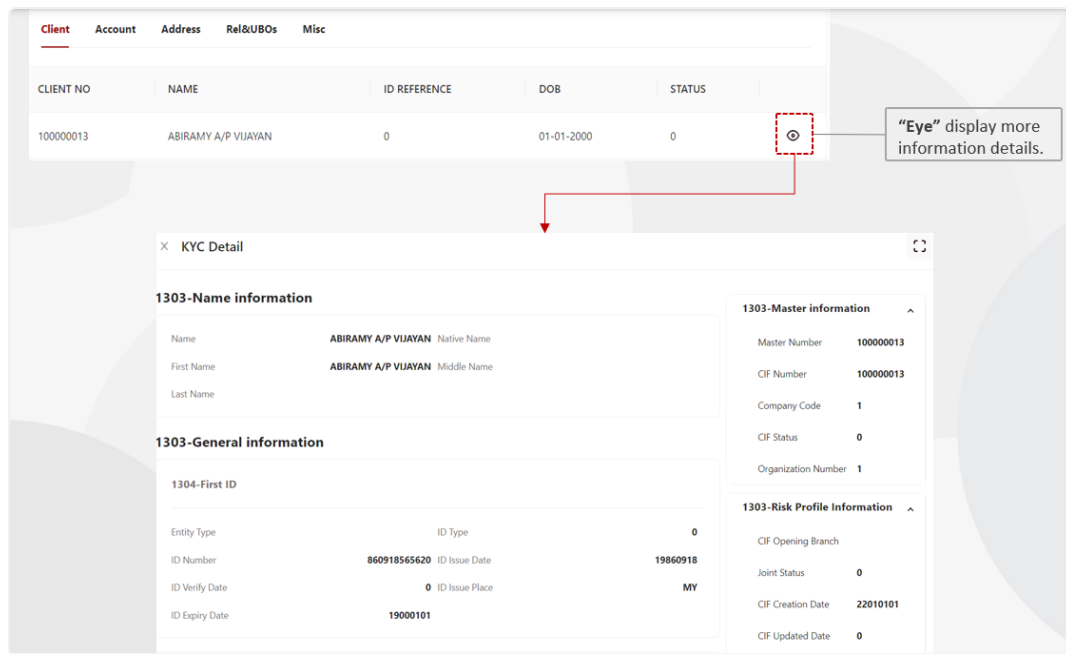

Figure 2.17: How to View KYC Information

1. To view KYC information, users can click on the **"KYC"** tab.
2. Under this tab, it displays five (5) panels whereby each one of them also contains their own set of information (refer to Figure 2.18 for further information):

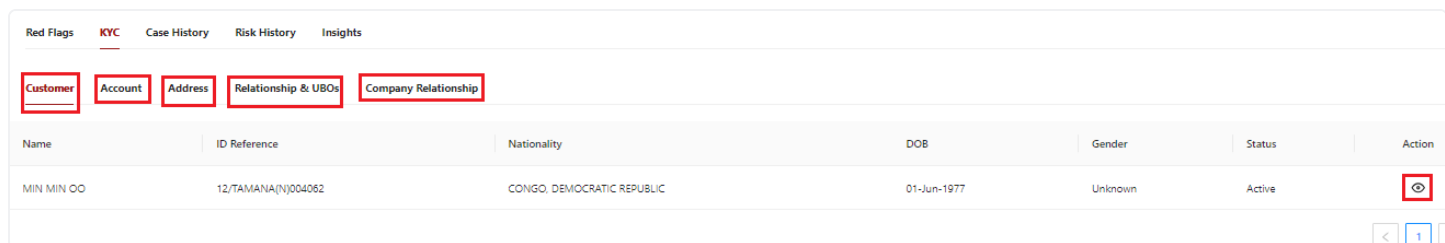

Figure 2.18: KYC Details

3. Only certain panels contain the **"Eye"** button to display more information regarding KYC details.

2.7.2 KYC Details □ Customer

This section outlines how the compliance user can investigate and view client KYC detail information while investigating the transaction red flag.

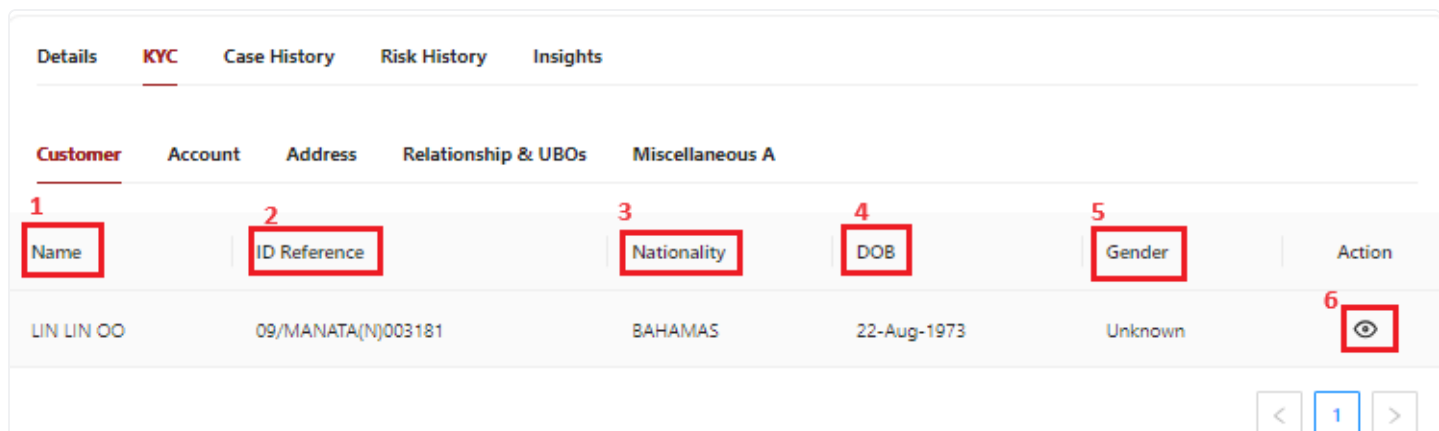

Figure 2.19: KYC - Customer Information Detail

The display information is in the table listed below:

#	Name	Description
1	Name	Display the Client's full name.
2	ID reference	Display the red flags individual/corporate (ID number, corporate registration number etc.).
3	Nationality	Display the client's nationality or country incorporated.
4	DOB	Display the Client's birthdate.
5	Gender	Display the client's gender type.
6	Eye (View) - KYC Details	Display the client's KYC detail information segregated by section: For Client: • Master Information • Risk Profile Information • False Positive Information • Name Information • General Information • Address Information • Flag Information • Employer Information • FATCA Information • Other Information For Transaction: • Master Information • Amount Information • General Information • Other Information

2.7.3 KYC Details □ Account

This section will list all the accounts associated with the client. This enables the user to investigate the client's other account information and have a holistic view of the customer's accounts.

2.8 Onboard Case Workflow □ Case History

2.8.1 How to View Case History Information?

This section allows how users can view and manage case history information.

Steps to Manage Case History

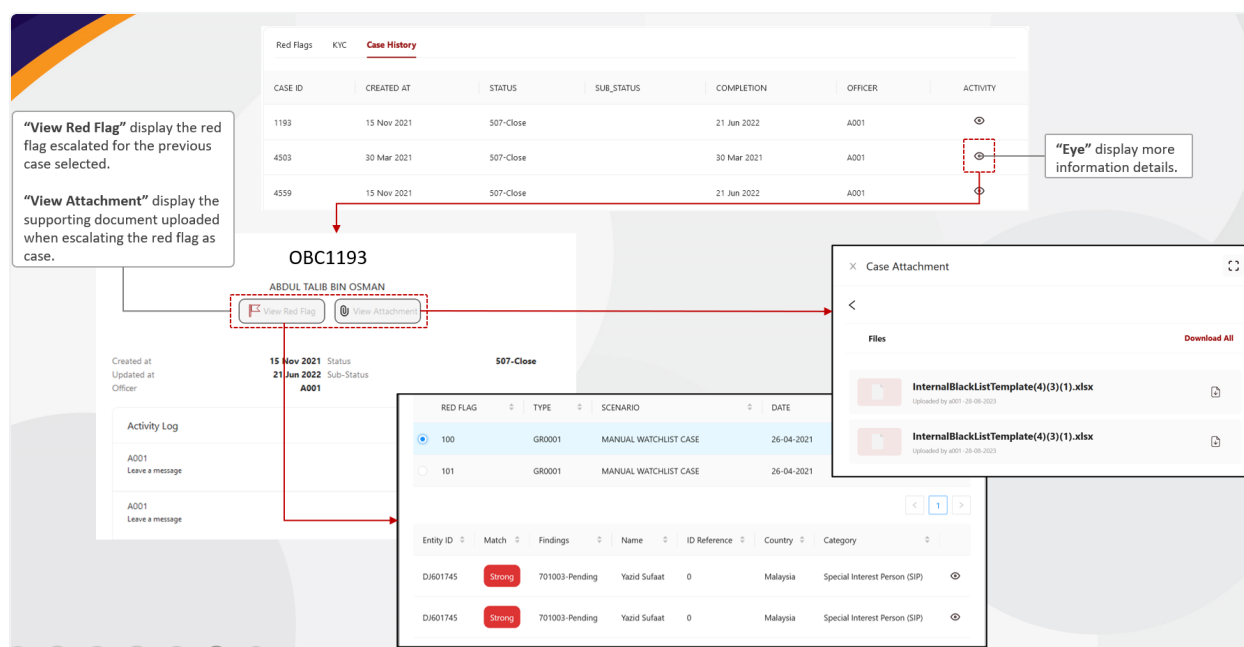

Figure 2.24: Case History Process Flow

1. Click on the **"Eye"** icon to view more detailed information regarding the history of red flag cases associated with the Watchlist.
2. The case history activity screen will appear when the user clicks to manage the case for Watchlist. In this screen, the user has the option to view the red flag cases or view case attachments.
3. **View Red Flag Cases:** Clicking the **"View Red Flag"** button will display the red flags that were escalated in the previously selected case.
4. **View Attachments:** If the user wishes to view supporting documents related to the escalation of red flag cases, they can click on **"View Attachment"**, and all case attachments with supporting documents will be displayed.

1. This section allows users to view the client's past history cases build on their portfolio.

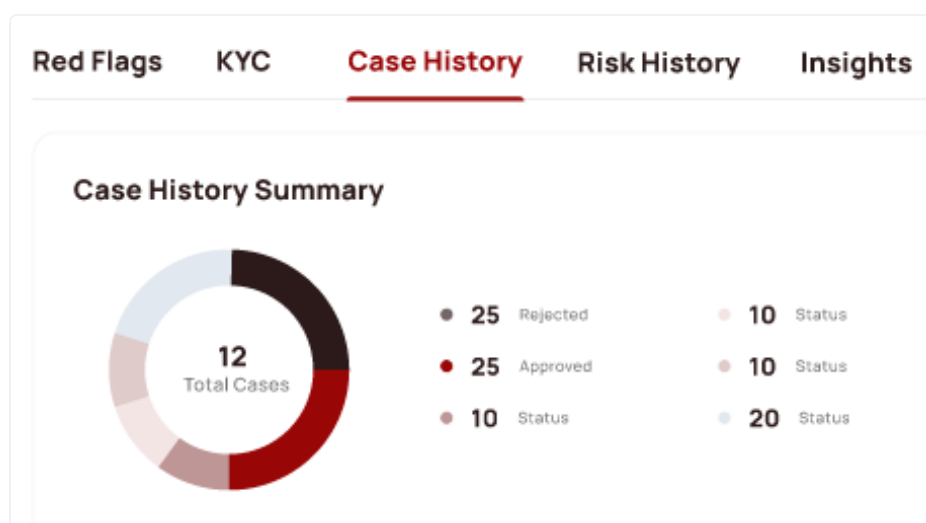

Figure 2.25: Doughnut Chart of Case History Summary

The information displayed is in the table below:

#	Name	Description
1	Case History Summary	Display total case based on status: - Unassigned - In-progress - Closed
2	Total Cases	Display the number of total cases.
3	Total Pending Cases	Display the number of total pending cases.
4	Total Cases by Status	Display the number of total cases in each status: - Unassigned - In-progress - Closed

2. This section allows users to view the case history table about transactions.

2.10 Onboard Case Workflow ☐ Manage Exposure

In the Case Workflow Detail page, there are section to Manage exposure that can be found on the top right of the page.

2.10.1 How to View and Manage Exposure?

This section allows users to tag the watchlist record for any relevancy on the client as part of client exposure to the watchlist. It is also used as part of the process automation to reduce future red flags. It has two functionalities:

- Update multiple red flag – Allow to select multiple red flag and select multiple match record in each of the red flag to update the same findings and exposure.
- Update single red flag – Allow to select a single red flag and select multiple match record to update the same findings and exposure.

Figure below shown the steps on how to view and manage client's exposure for match records.

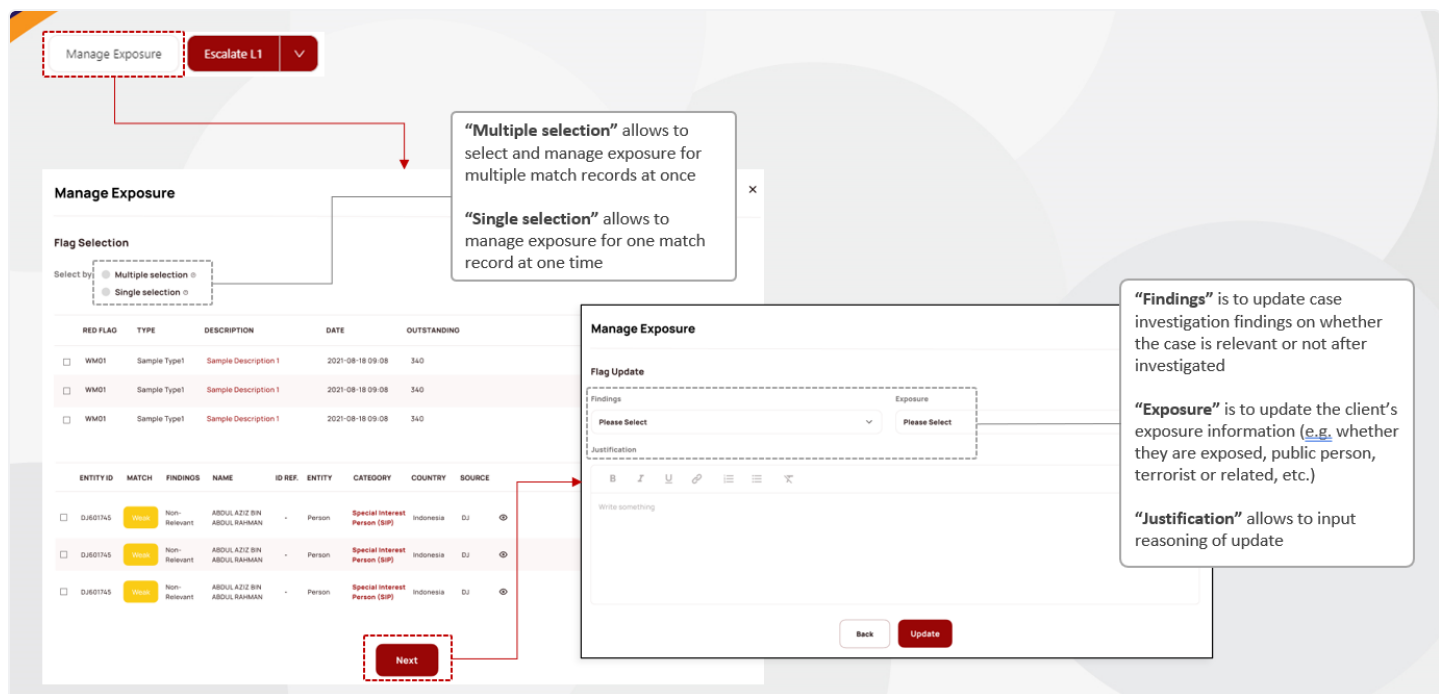

Figure 2.31: How to View and Manage Exposure

Steps on How to Manage Exposure for Single Red Flag Selection

1. Click (a) as shown in the Figure 2.31 below to perform 'Manage exposure' for the red flags under the client's case.

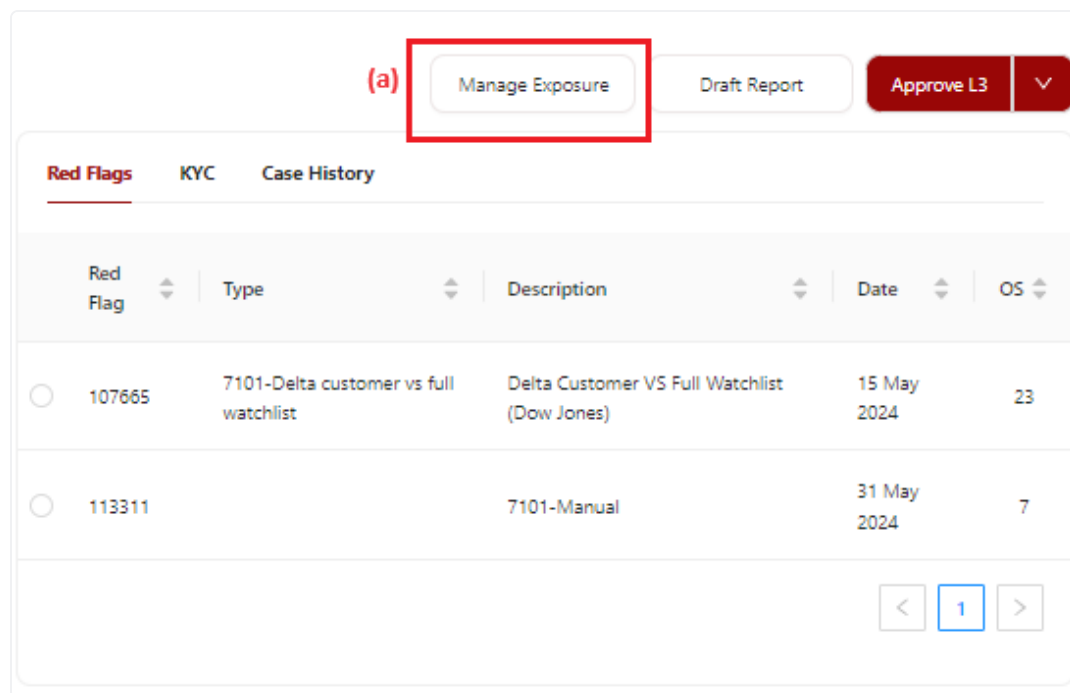

Figure 2.32

2. As shown in the Figure 2.33 below, users click on the 'Single Red flag selection' (b) and user able to view the red flags list (c).

Figure 2.33

3. User click on any red flag as desired to view their match record results and click 'Eye' button to view 'Match Record' (d) as *figure 2.33* above.
4. User click "Next" (e) button as shown in the *Figure 2.33* above to proceed update exposure for the red flag selection.
5. User update the details of exposure and click "Update".

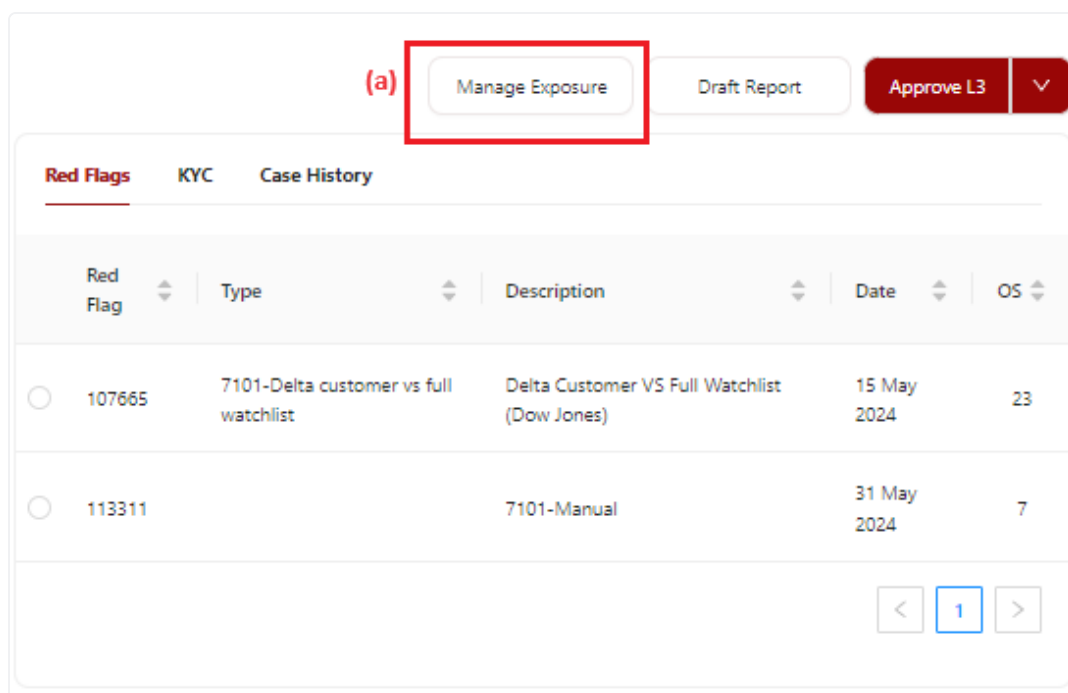

The 'Manage Exposure' dialog box contains the following elements:

- Findings:** A dropdown menu.
- Exposure:** A dropdown menu.
- Text Area:** A large text input field with the placeholder text 'Write something...'.
- Buttons:** 'Back' and 'Update' buttons at the bottom.

Figure 2.34

Steps on How to Manage Exposure for 'Multiple' Red Flag Selection

1. Click (a) as shown in the *Figure 2.35* below to perform 'Manage exposure' for the red flags under the client's case.

The interface shows a 'Red Flags' tab with a table of red flags. A red box labeled (a) highlights the 'Manage Exposure' button in the top right corner.

Red Flag	Type	Description	Date	OS
☐ 107665	7101-Delta customer vs full watchlist	Delta Customer VS Full Watchlist (Dow Jones)	15 May 2024	23
☐ 113311	7101-Manual		31 May 2024	7

At the bottom right, there are navigation buttons: '<', '1', and '>'.

2.11 Case Workflow □ Case Management Actions

Disclaimer: These guidelines are general and may not reflect your institution's specific workflow.

This section outlines the steps for users to perform case management actions using the 'Dropdown' button configurable in Settings. The actions as such of Escalating, De-escalating, Drop case, Recommend case, Recommending STR, and others.

2.11.1 Steps on how to perform case management actions (Dropdown button)

1. **Navigate to Case Workflow:** After the user has investigated across its tab in Case Workflow page, locate and click the 'Dropdown' button positioned at the top right corner of the page as you can see (a) on the *Figure 2.34* below.

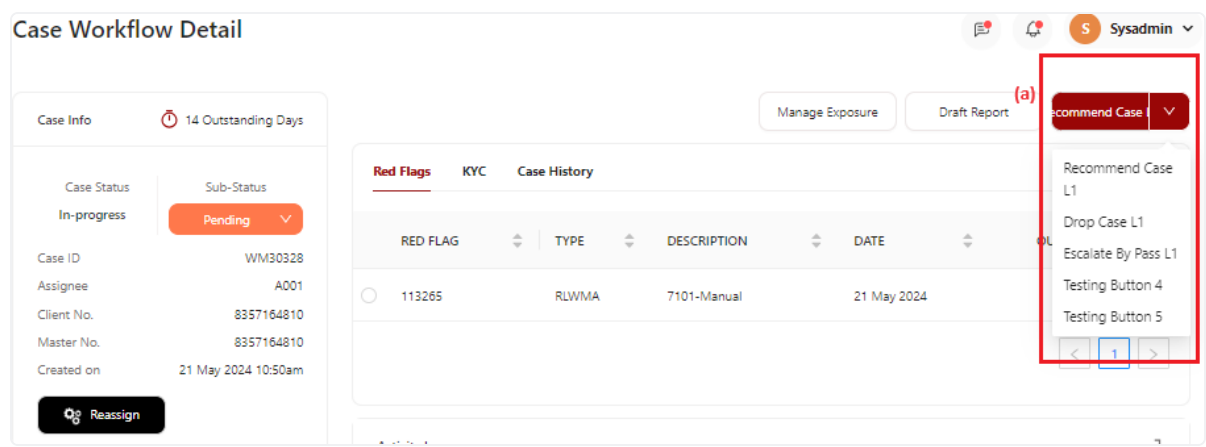

Figure 2.38

2. **Select Action:** From the dropdown menu, users should choose the desired action based on the configured buttons set in Settings to apply the investigated case.

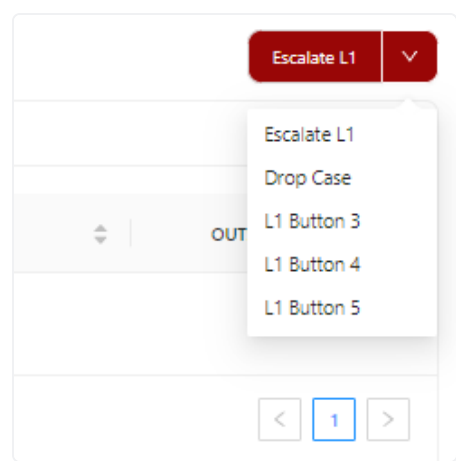

Figure 2.39

3. **Observe Sub-status or status Changes:** User can monitor any changes in the "Sub-status" or "Status" associated with the actions performed on the cases, as shown in the *Figure 2.40 (b)* below.

2.11.2 Steps on how to Bypass Escalation

To allow users to bypass escalation in a case management system within a multi-level workflow when necessary, follows these steps to skip level approval.

Note: This can be configured whether the workflow can enable bypass escalation under Setting – Onboard: Case Template.

1. **Navigate to Case Workflow:** After the user has investigated across its tab in Case Workflow page, locate and click the 'Dropdown' button positioned at the top right corner of the page as you can see (a) on the Figure 2.43 below.

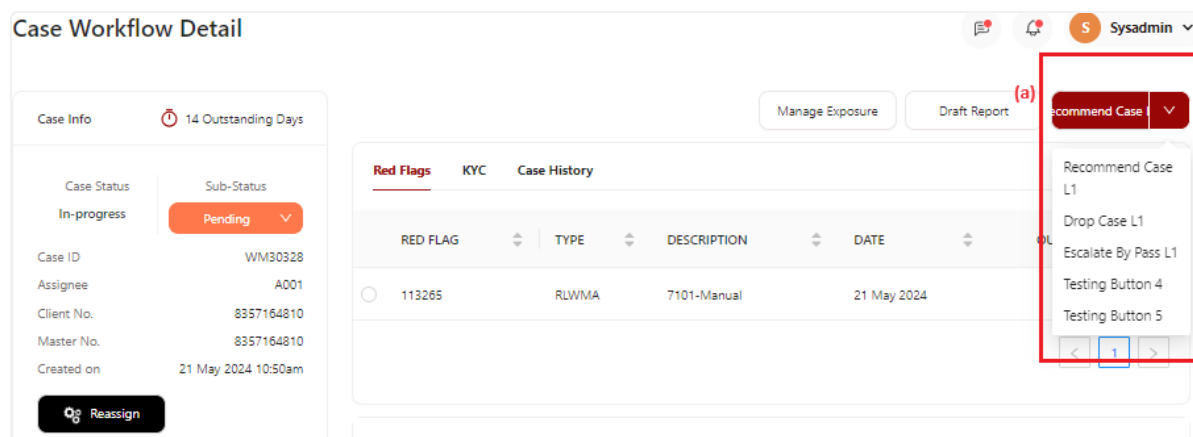

Figure 2.43 Case management action button

2. A pop-up window will appear with the option of "Bypass Escalation" as shown in Figure 2.44 below. Click the checkbox labeled (b) to proceed with bypass escalation of the case to another level. If user decide not to bypass escalation, user may untick the bypass escalation checkbox.

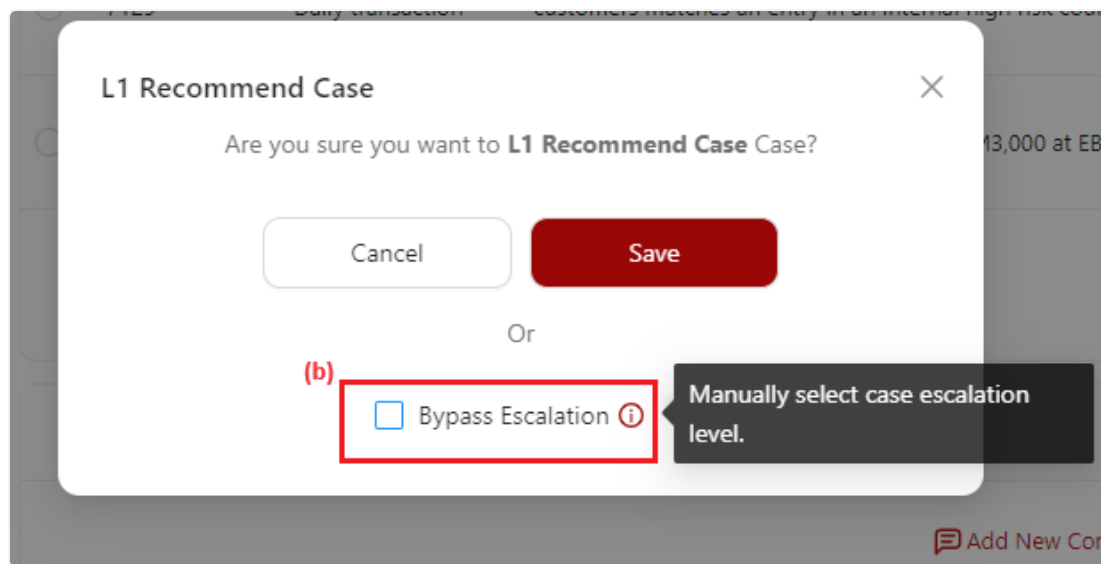

Figure 2.44: Bypass escalation

3. After confirming the option to bypass escalation, the system will navigate to the next pop-up screen where user can select which workflow level to escalate to, as shown in Figure 2.45 (c) below.

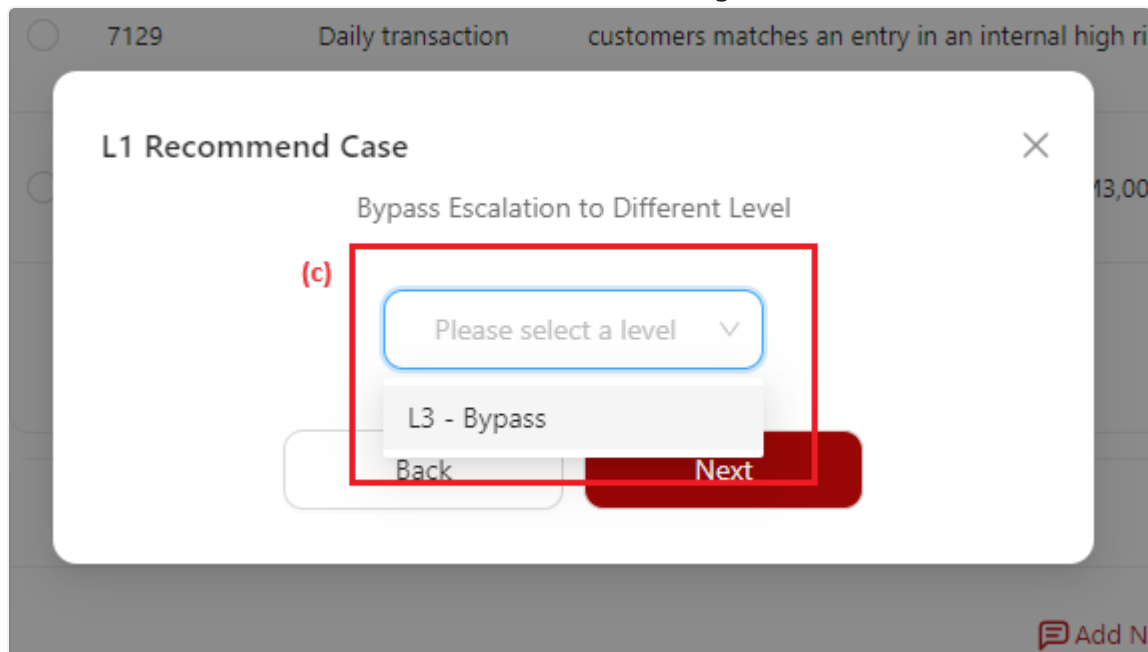

Figure 2.45: To choose level to escalate case

4. Once you have selected the desired workflow level, user will return to the confirmation pop-up window to bypass escalation. Click "Save" to confirm the action or "Cancel" to abort the process.

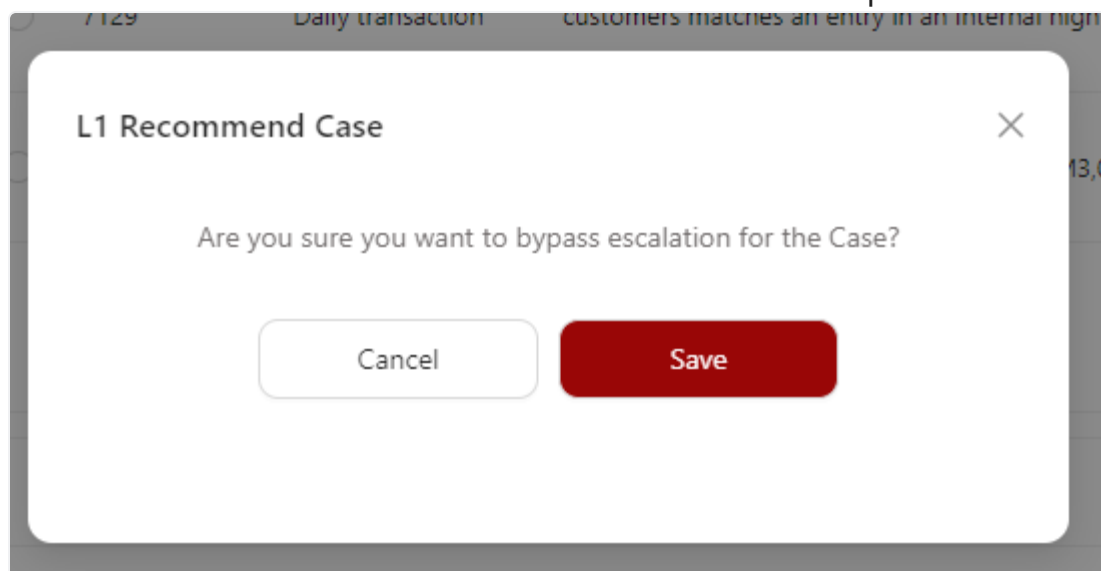

Figure 2.46: Confirmation escalation case

5. The system will auto-refresh indicates that the case has been escalated to another level. User can see the updates on the "Sub-status" under "All Cases" on the Case Workflow page or in the "Activity Log" under the case itself, as shown in the Figure 2.47 below.
