Preface

1. Customer & TESS Definition

TESS Innovation Sdn Bhd is hereinafter referred as “TESS” of the other part in this document.

2. Document Confidentiality

This document contains information that is proprietary to TESS and The Customer. This document, or any part thereof, shall not be copied, reproduced, translated or reduced to any electronic medium or machine readable form or disclosed to any third party without the prior written consent or authorization of TESS and the Customer.

3. Purpose of Document

The purpose of this document is to clearly guide user to perform day by day operation

4. Intended Audience

- Project team from TESS
- Project team from The Customer

5. Document Control

This document is subject to change control. All changes to this document shall be documented and distributed as “Release Version”. It will consist of the following:-

- Full replacement of the document; or
- Full replacement of a section in the document; or

- An addendum to the document.

Each revision will be assigned with a unique “Release Version” number and date. All pages distributed within a Document Release Notice will have the appropriate Release Version and Release Date indicated.

6. Screenshots

All sample screenshots as attached are for the reader’s viewing purpose only. The actual screen displayed in the [iSEM.ai](#) system shall be based on the specification of The Customer’s as agreed upon.

7. Disclaimer

- All advice given or recommendations made in this document are made in good faith on the basis of the information provided and otherwise generally available or known to TESS at the time of writing.
- No advice given or statements or recommendations made shall be in any circumstances constitute or be deemed to constitute warranty by TESS as to the accuracy of such advices, statement and recommendations.
- Subject to the contents of the Supply of Software, Licensing and Service Agreement executed, TESS shall not be liable for any loss, expense, damage or claim arising out of the advice given or not given or statements made or omitted to be made in connection with this document.
- **This document is **subject to updates**. Please note that it may be revised periodically within the same version to reflect any changes.

8. Product Version

This document is based on product version 1.3. Any other product version may not be relevant to this specific document content and its information.

Overview of Watchlist Maintenance

1. About Watchlist Maintenance

This section outlines where user able to immediately select which type of maintenance to be performed on the Watchlist module.

1.1 Apps Process Flow to Manage Watchlist Maintenance

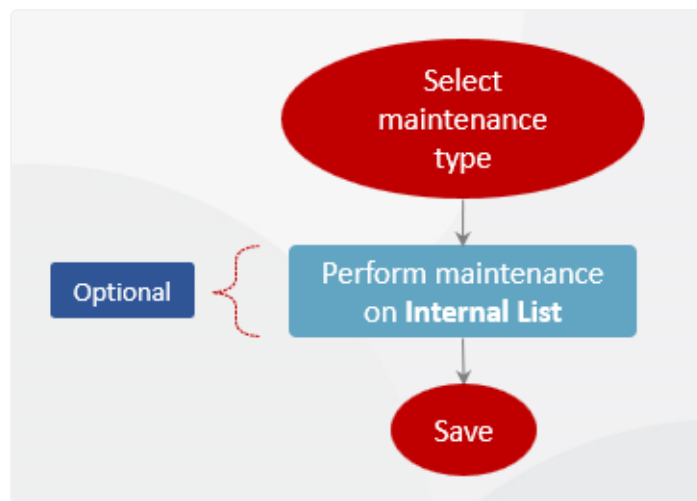

Figure 1.0: Apps Process Flow to Manage Watchlist Maintenance

2. Maintenance

2.1 Maintenance □ Maintenance Details

1. There will be 9 types of maintenance and each maintenance features different from one another:
 - a. Internal List
 - b. Whitelist
 - c. Exposure
 - d. Country List
 - e. Category
 - f. Upload Source
2. Each of the maintenance will have a set of wizard step accordingly and selection of the maintenance is considered under **Step 1 - Maintenance Type**.

2.2 Maintenance Details □ Select Maintenance Type

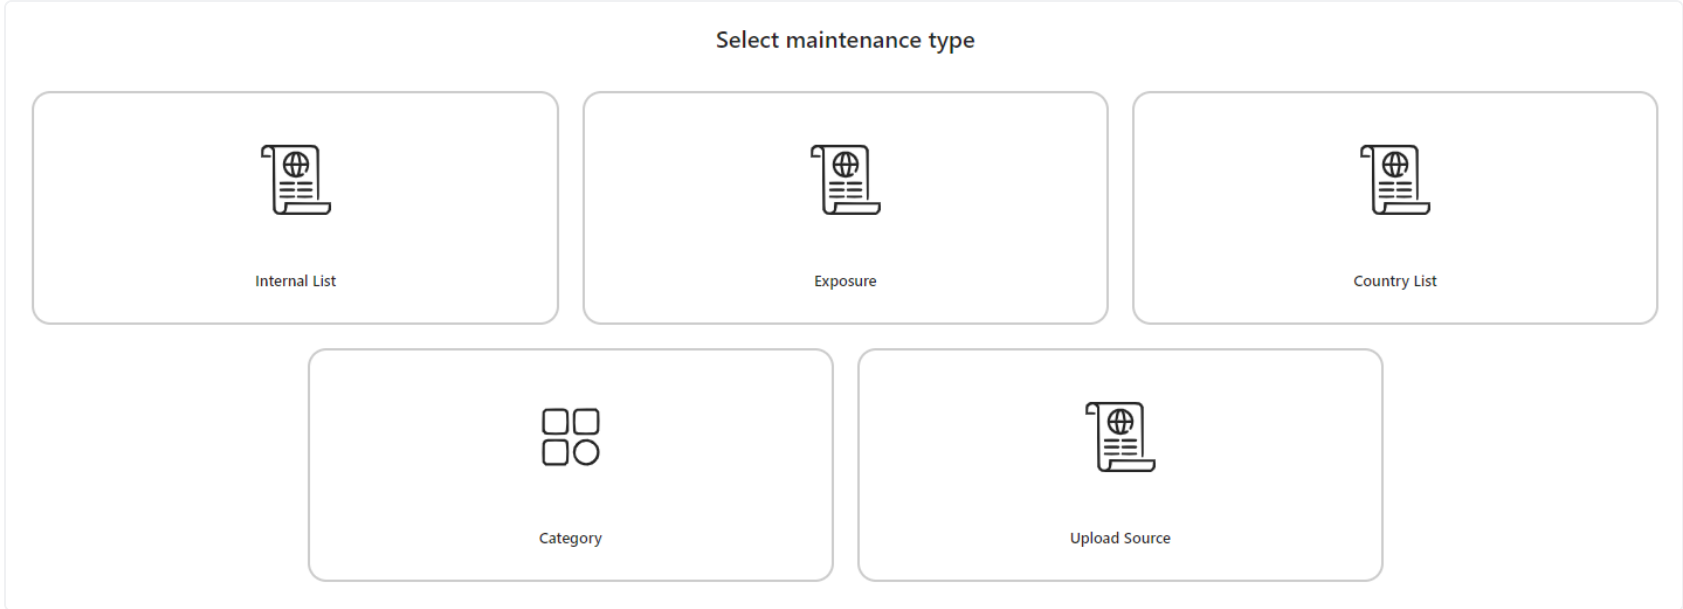

Figure 2.0: Select Maintenance Type

2.3 Select Maintenance Type ▯ Internal List

2.3.1 How to Maintain Internal List (Public & Internal Watchlist)?

This section allows users to search the entity record to update either using entity ID, name, ID reference to retrieve specific records or search the entire list through Infor Source selection.

The screenshot shows the "Select maintenance type" interface with the "Internal List" option selected. A "Search Record" modal is open, allowing users to search by Entity ID, Name, ID Reference, or Info Source. A table of entity records is displayed on the right, with columns for Entity ID, Source, Name, ID Reference, Type, Category, Country, Gender, Created, and Updated. The table contains five records. A "Pencil" icon in the last column of each row allows for updating the record, and a "Trash" icon allows for deleting the record.

ENTITY ID	SOURCE	NAME	ID REFERENCE	TYPE	CATEGORY	COUNTRY	GENDER	CREATED	UPDATED
DJ123456789	DOW JONES	TAN SWEE JYE	DJ123456789	INDIVIDUAL	PEP	MALAYSIA	MALE	2021-07-24	2022-07-24
DJ123456789	DOW JONES	TAN SEW JYE	DJ123456789	INDIVIDUAL	SOE	SINGAPORE	MALE	2021-07-24	2022-07-24
DJ123456789	BLACKLIST	TAN SWEE JYE	DJ123456789	INDIVIDUAL	PEP	MALAYSIA	MALE	2021-07-24	2022-07-24
DJ123456789	DOW JONES	TAN BEE JYE	DJ123456789	INDIVIDUAL	PEP	MALAYSIA	MALE	2021-07-24	2022-07-24
DJ123456789	BLACKLIST	TAN SHOE JYE	DJ123456789	INDIVIDUAL	PEP	MALAYSIA	MALE	2021-07-24	2022-07-24

"Search Record" allow to user to search the entity record that want to be update either using Entity ID, Name, ID Reference to retrieve the specific record OR can search the entire list via Info Source selection.

"Pencil" allows to update information inside the record such as general KYC information, name aliases, and ID reference (passport, ID card, etc.)

"Trash" allows to delete record from the list

Figure 2.1: How to Maintain Internal List

1. The blacklist features are applicable to both watchlist and onboard modules.
2. **Step 1: Search Record** - To search for the internal list record.

The screenshot shows a web interface for searching internal watchlist records. At the top, there are three navigation links: 'Search Record' (with a magnifying glass icon), 'Update Record' (with a pencil icon), and 'Validation' (with a checkmark icon). Below these is a form titled 'Search Internal Watchlist'. The form contains four input fields: 'Entity ID' (labeled 1), 'Name' (labeled 2), 'ID Reference' (labeled 3), and 'Info Source' (labeled 4, which is a dropdown menu with 'Please Select' as the current selection). There is an 'or' separator between the 'ID Reference' and 'Info Source' fields. At the bottom right of the form is a red 'Search' button (labeled 5).

Figure 2.2: To Search for Internal List Record

The display information is as shown in the table below:

#	Name	Description
1	Entity ID	Allow to input he entity ID to search the record.
2	Name	Allow to input the name to search the record.
3	ID Reference	Allow to input the ID number, passport number, corporate registration number, etc. to search the record.
4	Info Source	Allow to select one of the info sources lists to search all the record within the list.
5	Search button	Accepts user input to be searched for in database.

4. **Step 1a: Search Record** - To select the result of internal list record after search.

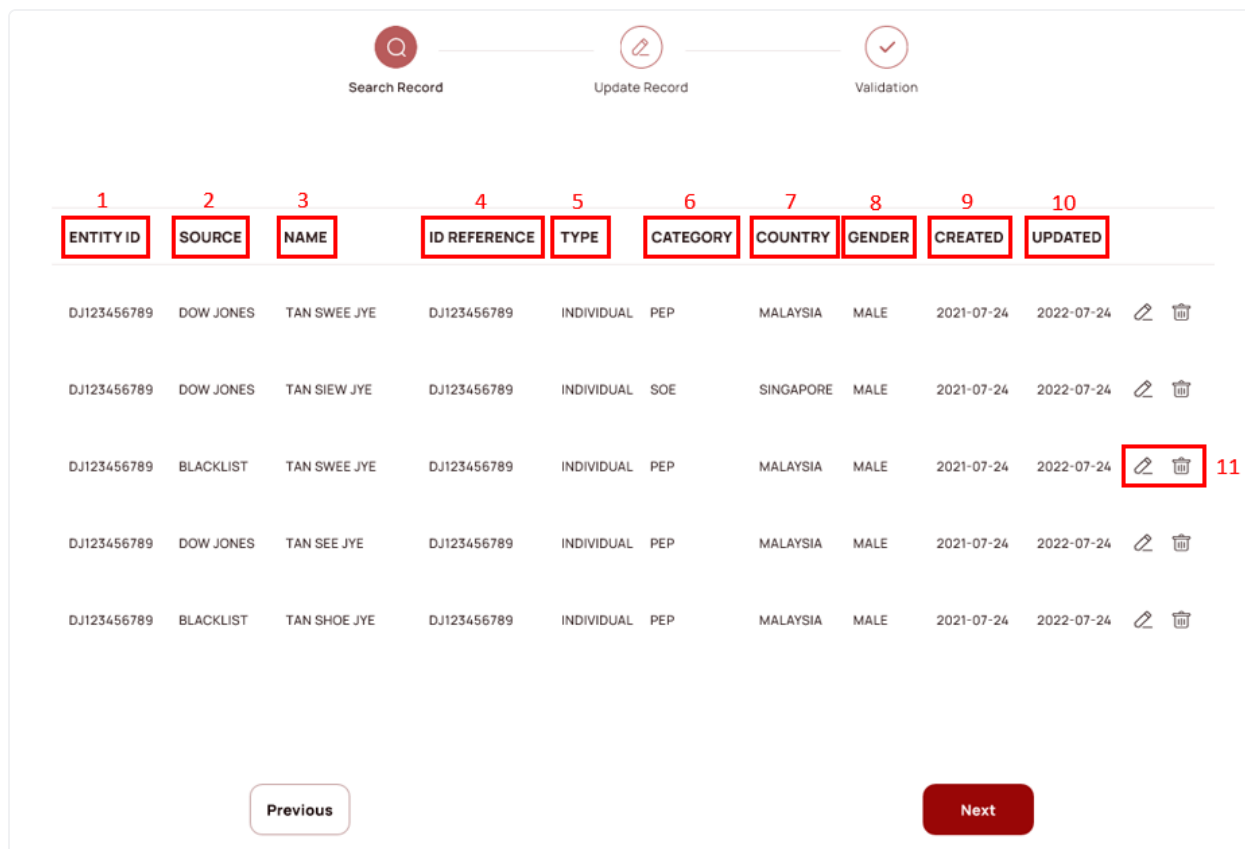

Figure 2.3: To Select the Result of Internal List Record After Search

The display information is as shown in the table below:

#	Name	Description
1	Entity ID	Display the entity ID.
2	Source	Display the watchlist information source provider: 1. Dow Jones 2. World Check 3. Lexis Nexis 4. Acuris 5. HM 6. OFAC 7. UN Internal Watchlist (Subject to the configuration to display its information)
3	Name	Display the entity name.
4	ID Reference	Display the entity ID reference number.
5	Type	Display the entity type: 1. Individual 2. Corporate/Non-Individual

6	Category	Display the entity category type.
7	Country	Display the entity nationality.
8	Gender	Display the entity gender: 1. Male 2. Female 3. None: For Corporate/Non-Individual
9	Created	Display the date that this record is created by the user.
10	Updated	Display the date that this record was updated by the user.
11	Action	1. Update: Allow to perform update on the internal watchlist record 2. Delete: Allow to delete the internal watchlist record individually

6. **Step 2: Update Record** - Click the Update action button to update on the internal watchlist record.

The display information is as shown in the table below:

#	Name	Description
1	+ Add New	1. Allow to update more aliases name on the record. 2. Allow to have a maximum total of 10 aliases name.
2	Name	Display alias name.
3	Action	1. Update: Allow to update alias name. 2. Delete: Allow to remove alias record.

• ID Reference

The screenshot shows the 'ID Reference' interface. At the top right, there is a red button labeled '+ Add New' (callout 1). Below this is a table with four columns: 'No.', 'ID Type' (callout 2), 'ID No.' (callout 3), and 'Action'. The first row of the table contains the values '1', 'NRIC', '000101010101', and two icons: a pencil (callout 4) and a trash can (callout 5). At the bottom right of the interface, there is a pagination control showing '1 record(s)' and navigation buttons, with the number '1' highlighted in a blue box.

Figure 2.6: ID Reference - To Update on the Internal Watchlist

The display information is as shown in the table below:

#	Name	Description
1	+ Add New	1. Allow to add ID reference record. 2. Allow to have a maximum total of 2 ID reference.
2	ID Type	Display the type of ID reference type.
3	ID No.	Display the ID no of the ID reference.
4	Update button	Allow to update ID reference record.
5	Delete button	Allow to remove the ID reference record.

5. **Step 3: Validation** - System to notify whether the maintenance setup is successfully updated or failed.

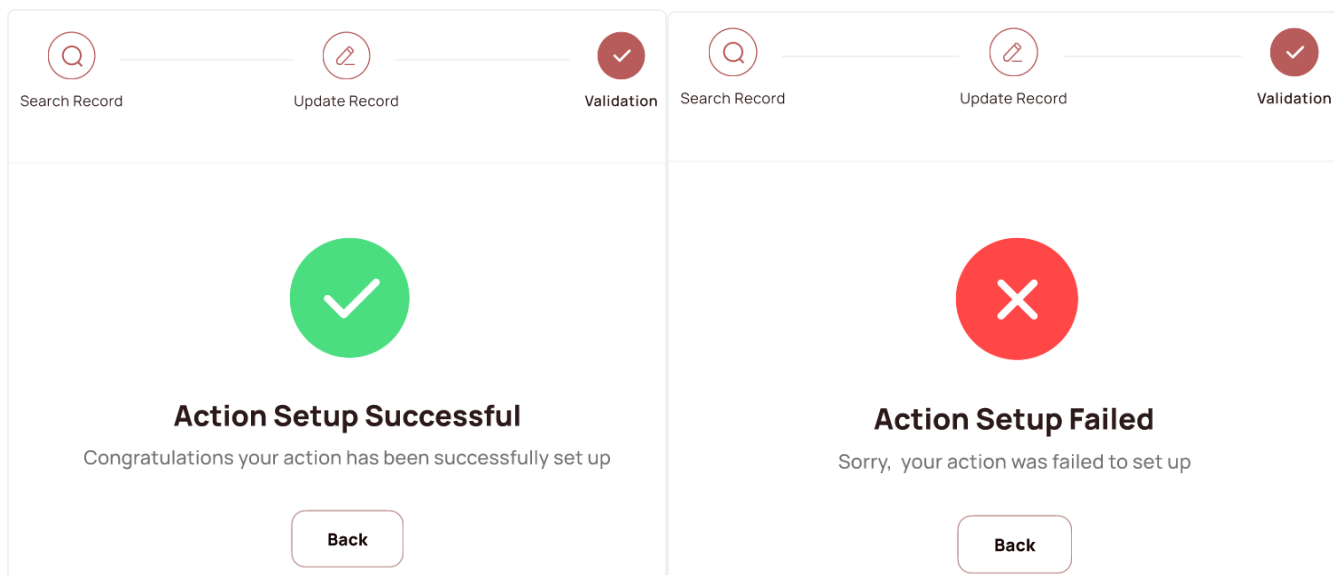

Figure 2.7: Action Validation

6. The 3-step wizard can continue to the next page without any update or back to previous page.
7. Each of the configuration during update will update to database directly when click save.

2.4 Select Maintenance Type □ Exposure

2.4.1 How to Manage Exposure for Watchlist Post-Monitoring EOD?

This section outlines how users can manage exposure for watchlist post-monitoring EOD.

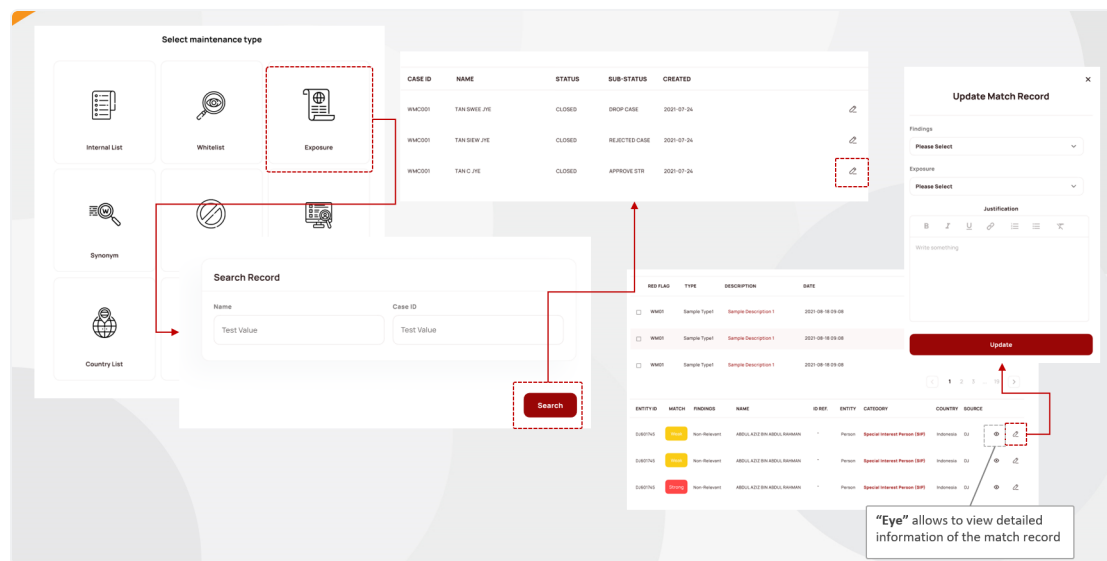

Figure 2.8: How to Manage Exposure for Watchlist Post-Monitoring EOD

1. The category filtering features in Watchlist module is only applicable for watchlist post monitoring EOD only.
2. **Step 1: Search Record** – To search for the exposure record.

Figure 2.9: To Search for Exposure Record

The display information that allows to be searched:

#	Name	Description
1	Name	Allow to input the name to search the record.
2	Case ID	Allow to input the case ID.
3	Search button	Accepts user input to be searched for in database.

3. **Step 1a: Search Record** - To select result of the search record to update the exposure of.

1 CASE ID	2 NAME	3 STATUS	4 SUB-STATUS	5 CREATED
