		2.9	Added a new section on 'Multi Creation of User ID- Batch Upload"

Preface

1. Customer & TESS Definition

TESS Innovation Sdn Bhd is hereinafter referred as “TESS” of the other part in this document.

2. Document Confidentiality

This document contains information that is proprietary to TESS and The Customer. This document, or any part thereof, shall not be copied, reproduced, translated or reduced to any electronic medium or machine readable form or disclosed to any third party without the prior written consent or authorization of TESS and the Customer.

3. Purpose of Document

The purpose of this document is to clearly guide user to perform day by day operation

4. Intended Audience

- Project team from TESS
- Project team from The Customer

5. Document Control

This document is subject to change control. All changes to this document shall be documented and distributed as “Release Version”. It will consist of the following:-

- Full replacement of the document; or
- Full replacement of a section in the document; or

- An addendum to the document.

Each revision will be assigned with a unique “Release Version” number and date. All pages distributed within a Document Release Notice will have the appropriate Release Version and Release Date indicated.

6. Screenshots

All sample screens as attached are for the reader’s viewing purpose only. The actual screen displayed in the [iSE M.ai](#) system shall be based on the specification of The Customer’s as agreed upon.

7. Disclaimer

- All advice given or recommendations made in this document are made in good faith on the basis of the information provided and otherwise generally available or known to TESS at the time of writing.
- No advice given or statements or recommendations made shall be in any circumstances constitute or be deemed to constitute warranty by TESS as to the accuracy of such advices, statement and recommendations.
- Subject to the contents of the Supply of Software, Licensing and Service Agreement executed, TESS shall not be liable for any loss, expense, damage or claim arising out of the advice given or not given or statements made or omitted to be made in connection with this document.
- **This document is **subject to updates**. Please note that it may be revised periodically within the same version to reflect any changes.

8. Product Version

This document is based on product version 1.3. Any other product version may not be relevant to this specific document content and its information.

9. Abbreviation & Definitions

Abbreviation	Definition
Tx	Transaction
TM	Transaction Monitoring
CPM	Client Profile Management

Overview of People Management

1. About People Management

This section enables users to manage different user types that can access the system and its features, including user ID, app settings, module settings, and all compliance-related business functionalities, based on the accessibility of each user type.

Note: Does not allow user from specific organization to view other organization information.

1.1 Apps Process Flow for People Management

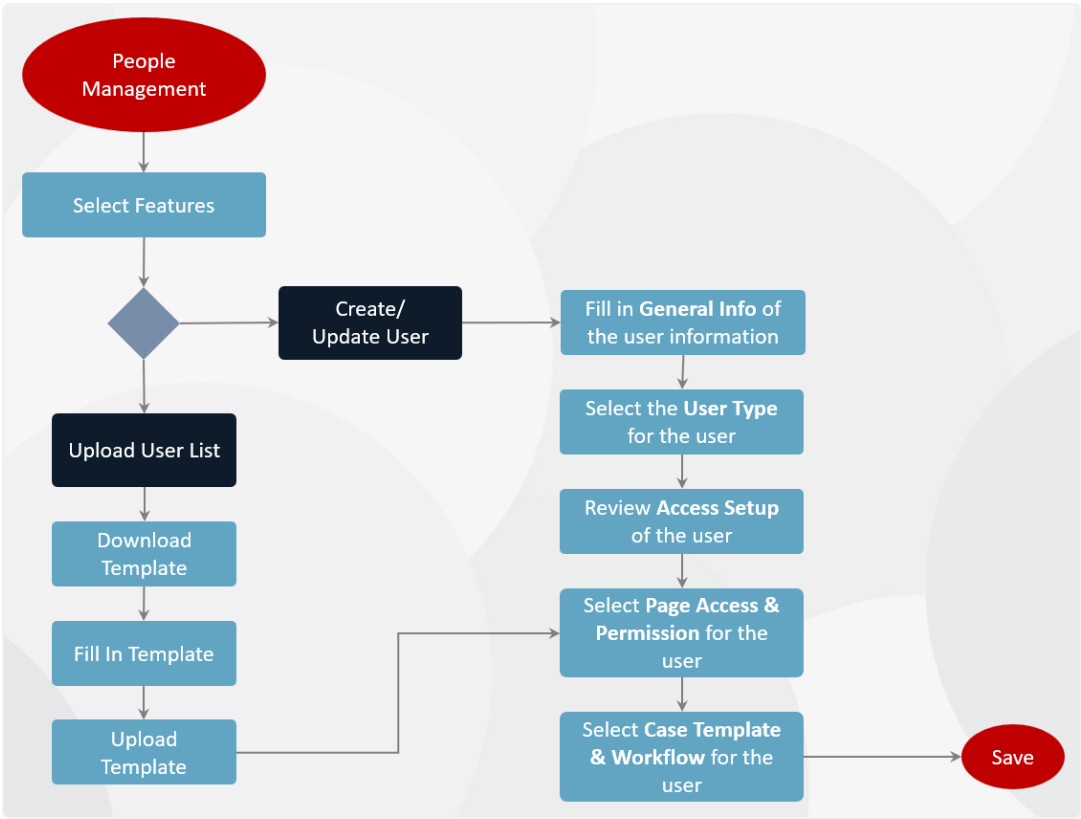

Figure 1.0: Apps Process Flow for People Management

The figure above describes in general the apps process flow for People Management features and functions.

2. Main Page

2.1 Main Page ▯ User List

2.1.1 How to View User List?

This section outlines how users can view user list information under People Management.

Steps to View User List:

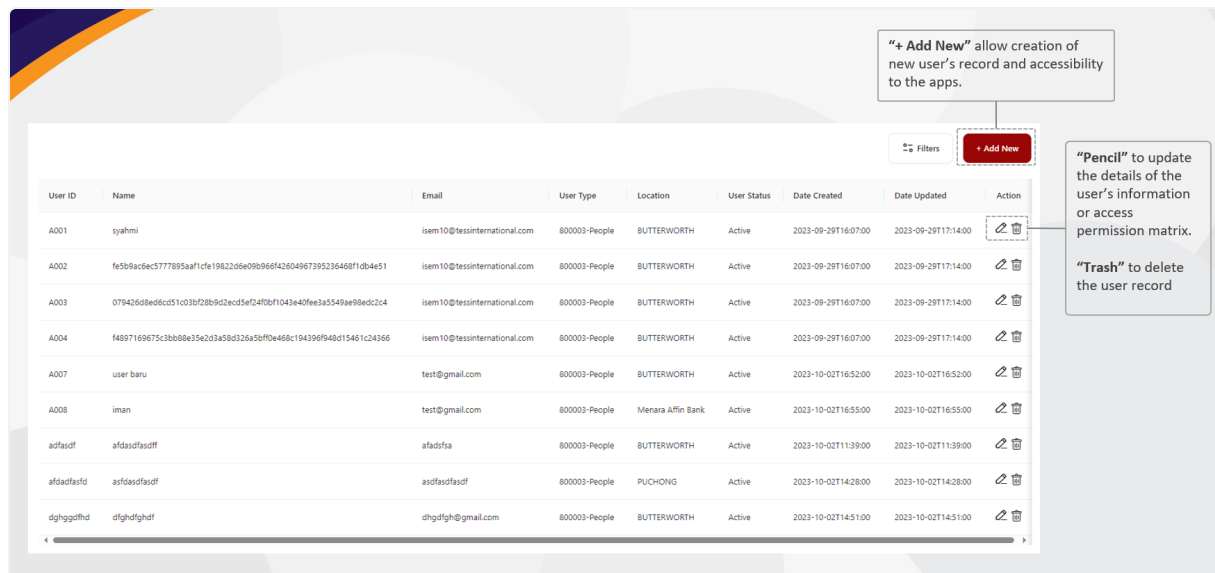

Figure 2.0: How to View User List

1. In this section, users can view the user list during People Management.
2. Users will be able to see user information such as user ID, name, email, user type, location, and more.
3. If users want to create a new user's record and accessibility to the application, they can click on **"Add New"**. By clicking this button, users will be navigated to the user registration page (refer to Figure 2.1 below).
4. If users want to update user information details or access permission matrix, they can click on the **"Pencil"** button.
5. If users want to delete the user record, they can simply click on the **"Trash"** button and the user record will no longer appear in the user list.

2.2 People List Description

2.2.1 People List

The figure below displays the People List and their description.

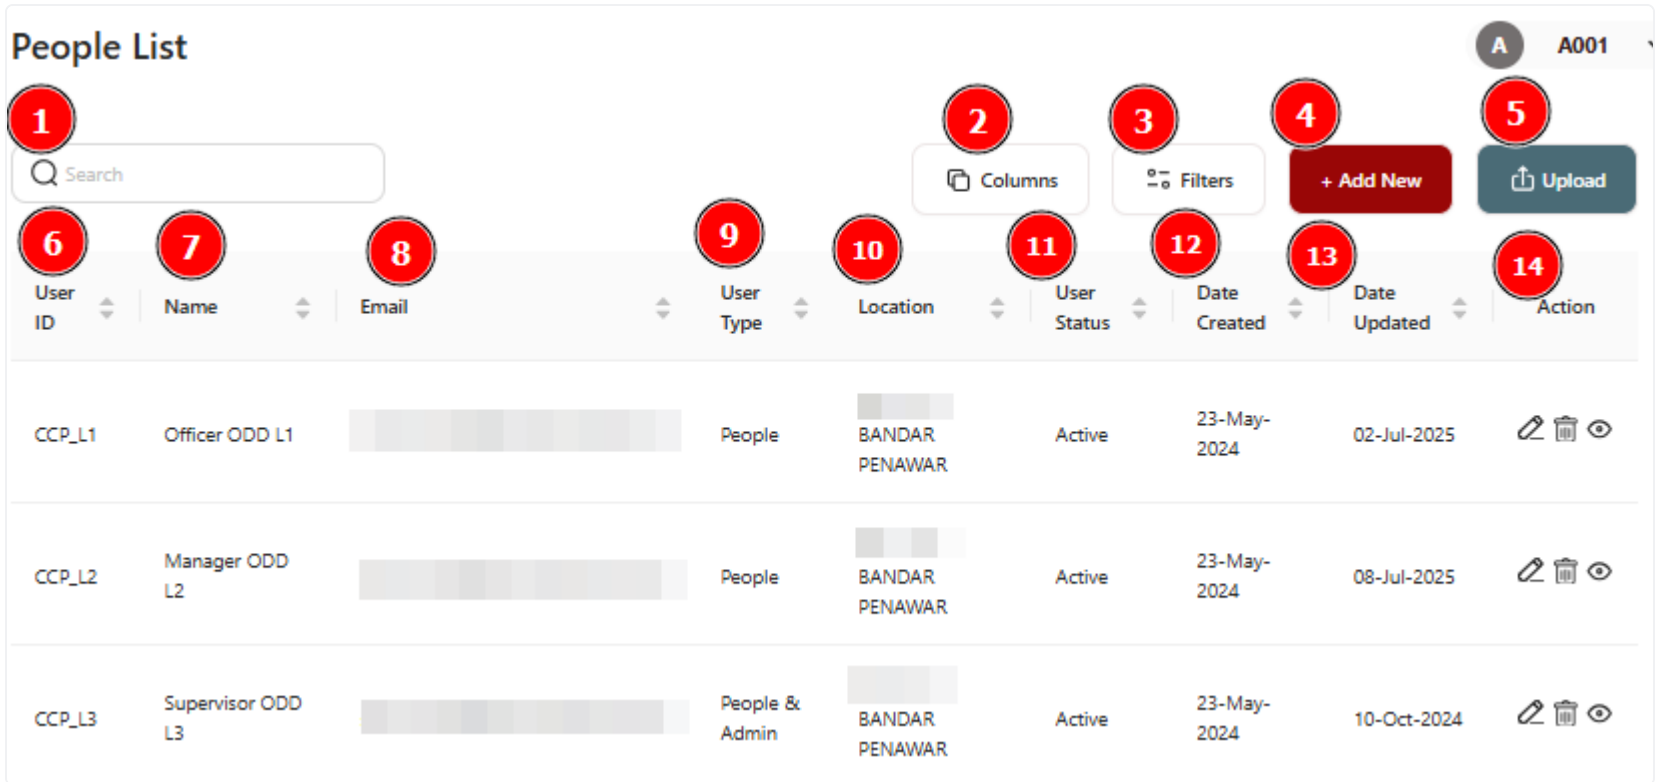

Figure 2.1: User List

The display information is as shown in the table below:

#	Name	Description
1	Search tab	Allow user to search any information related to the table's column data.
2	Columns	Allow user to show/hide which columns to display in the table data.
3	Filters	Display the user ID or other information to filter out specific users in the system.
4	+ Add New	Allow to add new user record into the user list.
5	Upload	Allow user to upload multi creation of user ID per batch upload.
6	User ID	Displays the user ID that is going to be used to access to the system.
7	Name	Displays the user's full name.
8	Email	Displays the user's email account address. <i>Note:</i> All users should have an email address registered for password reset and other functionality of the system.
9	User Type	Displays the type of user registered in the system: • Admin • People & Admin • People

10	Location	Displays the user's location.
11	User Status	Displays the user status on accessibility the system: • Active • Inactive
12	Date Created	Displays the date that this configuration is created by the user.
13	Date Updated	Displays the date that this configuration is updated by the user.
14	Action	1. Update: Allow to update the user record information. 2. Delete: Allow to delete the user record. 3. Preview: Allow to view the user record information in summary (refer People summary below)

2.2.2 User Types

1. The system have three types of users:

- a) **Admin** : Owned by the organization to manage user ID, apps settings, and module setting.
- b) **People & Admin** : Owned by the organization to manage user ID, apps setting, module setting and all compliance business functionality.
- c) **People** : Owned by the organization to use the compliance business functionality.

2. Main features for **People**:

- a) **Create** : Single creation of user ID per entry
- b) **Upload** : Multi creation of user ID per batch upload

2.2.3 User Record Information

This section outlines the summary of information on the registered users in the system.

1. User click 'Preview' icon on any User in the People List and the system will display a pop up screen of user record information.
2. Users can click any tab of "General", "Case template & workflow" or "Access" tab to view the detailed information for the registered user, as refer to *Figure 2.2* below.

2.2.4 Access & Action Permission Matrix

1. The access & action permission matrix is based by the following:

#	Name	Description
1	Full (/)	People with Full access 1. Can add, edit and delete records 2. Can perform all the action in all pages
2	Edit (/*)	People with Edit access 1. Can add, edit and delete records 2. Can perform all the action in all pages except maintenance page 3. Denied access to specific pages
3	Comment (/**)	People with Comment access

		1. Can edit records on review case under the case workflow 2. Can perform actions only on specific page 3. Denied access to specific pages
4	View (/***)	People with View access 1. Can view records under the case workflow only 2. Denied access to specific pages
5	Denied (X)	People with Denied access 1. Denied access to all pages
6	Custom	People with Custom access 1. Can make changes to specific pages and the action without following the standard template of access permission matrix.

Note: This is only applicable for People and People Admin user type

2. The access & permission matrix can refer to below figure (a) and (b) for details and guide in the People Maintenance configuration on wizard "Manage Access".
3. System will display the selected access permission type on the overview page.
4. User is allowed to change the access permission type on the overview page.
5. If user select "Custom", it will pop up the access permission type so user can select any permission action they want to change.
6. User may click on figure (b) below to preview each of the module's access permission matrix.

Figure 2.4: Manage Access - Page Access & Permission

2.3 Single User Creation or Update

This section outlines how users can manage **"People Maintenance"** under **"People Management"**, when user click **"Add New"** or **"Update"** button on any user ID per entry.

Note: Creation of new user are required to be cross-check with the total number of user allow to be created based by the user counter for Essential and Essential+ tier plan.

Under this section, there will be a 5-step wizard of how the maintenance process should be done. A brief description of the processes is as shown below:

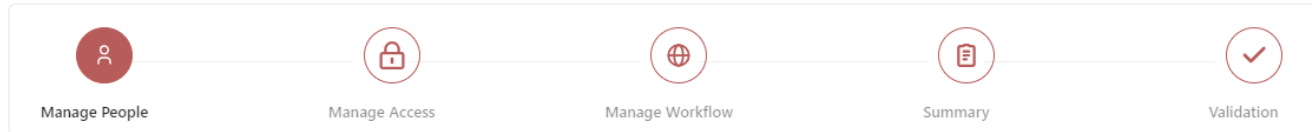

Figure 2.5: People Maintenance

1. Wizard Step 1: **"Manage People"** process allows users to manage user's registration, user type, and their accessibility to the application.
2. Wizard Step 2: **"Manage Access"** process, users are allowed to manage the access matrix and control permissions to a specific page.
3. Wizard Step 3: **"Manage Workflow"** process allows users to set the case template and workflow to investigate and escalate cases.
4. Wizard Step 4: **"Summary"** is just the summary of all processes done.
5. Wizard Step 5: **"Validation"** is to validate whether the process was successful or a failure.

2.4 People Maintenance ▢ Manage People

2.4.1 How to Manage Users Registration?

In order to manage users registration, all of the users' general information and accessibility must be setup in the **"Manage People"** page first.

"Manage People" allow to manage user's ID registration, selection of the user type and user accessibility to the apps.

"Manage Access" allow to manage user's access matrix and control permission to specific page.

"Manage Workflow" allow to set the case template & workflow for the users case investigation and escalation on the specific module.

"Location" allow to set the location of the users branch, department etc. that will be use for case rework and reassign.

"Red Flag Routing" allow to set whether the user are able to view the red flags based on the routing group location.

"User Type" allow to set the user privilege using the apps.
People: Access to all menu except setting
Admin: Access to setting menu only
People & Admin: Access to all menu include setting

"Access Setup" allow to set custom accessibility to the apps for any user needs. By default, it will predefine based by the *Authorization* setting.

The display information is as shown in the table below:

#	Name	Description
1	User ID	1. Allow input on user ID during add people. 2. Do not allow update on user ID during update people. 3. This field is mandatory to be input when adding new people. 4. The user ID must be validated that it is following the minimum and maximum password length set under the Authentication

		setting.
2	Name	1. Allow input on user's full name during add people. 2. Allow update on user ID during update people. 3. This field is mandatory to be input when adding new people.
3	Email	1. Allow input on user's email account address during add people. 2. Allow update on user's email account address during update people. 3. This field is optional to be input when adding new people. 4. The email address must be validated that it is following email address format.
4	User Type	1. Allow selection on user type when add people. 2. Allow update on user type during update people. • Admin • People & Admin • People 3. This field is mandatory to select during add people. 4. Default to "People" when add people.
5	Location	1. Allow selection on user's location such as branch or department during add people. 2. Allow update on user's location during update people. 3. The location list will be retrieved from parameter listing. 4. This field is mandatory to be selected when adding new people.
6	Red Flag Routing	1. Allow selection on where the red flag routing will be route to during add people. 2. Allow update on user's red flag routing during update people. 3. The red flag routing list will be retrieved from the red flag routing list. 4. This field is mandatory to be selected when adding new people.
7	User Status	1. Allow selection on the user status accessibility to the system. 2. Allow update on uses status during update people.

3. This field is default to "Active" when add new people.
4. Allows the status of the users:
 - **Active** - User is actively accessing the system on day-to-day basis
 - **Inactive** - User has not been accessing the system for some time and not able to access the system based by the auto lock age history.

2.4.1.2 Access Setup

This section allows users to set custom access to the application for user needs. But by default, it is predefined by authorization settings.

The screenshot shows the 'Access Setup' configuration page. It includes the following fields and controls:

- 1** **No of Allowed Tries**: A text input field containing the value '10'.
- 2** **Password Change Frequency**: A text input field containing the value '3'.
- 3** **No of Invalid Tries**: A text input field containing the value '0'.
- 4** **Access Date**: A date range selector showing '20-Nov-2023' to '20-Nov-2023'.
- 5** **Access Time**: A time range selector showing '10:01:41 AM' to '10:01:41 AM'.
- 6**: A toggle switch for 'Force user to change password on first login', which is currently disabled.

Figure 2.8: People Management Access Setup

The display information is as shown in the table below:

#	Name	Description
1	No. of Allowed Tries	1. Allow input on the number of password attempt tries when accessing system. 2. The default value shall be retrieved from "Invalid Trial Allowed" under Authentication setting.
2	Password Change Frequency	1. Allow input on the change password frequency before the password expiry. 2. The default value shall be retrieved from "Password Age" under Authentication setting.
3	No. of Invalid Tries	Display the number of password attempts by the users trying to access system before lock out.

4	Access Date	1. Allow input on the access date from and to for the users to access the system. 2. The default value shall be retrieved from "Access Date From & To" under Authentication setting.
5	Access Time	1. Allow input on the access time from and to for the user to access the system. 2. The default value shall be retrieved from "Access Time From & To" under Authentication setting.
6	Radio switch	Enable/disable to force user to change password on first login.

2.5 People Maintenance ▢ Manage Access

2.5.1 How to Manage Access Permission Matrix?

This section allows users to manage access permission matrix under People Maintenance. Refer to "Section 2.9 - Access & Action Permission Matrix" below for further information.

Figure 2.16: Viewing Summary of the Setup

After user has reviewed all of their summary panels (General, Access Setting, Template Workflow) as Figure 2.12 above, they will be able to click the **"Submit"** (a) button at the bottom of the screen.

2.8 People Management ▯ Validation

This section for the system to notified whether the wizard setup update.

After submission, it will show whether the validation was successful or unsuccessful.

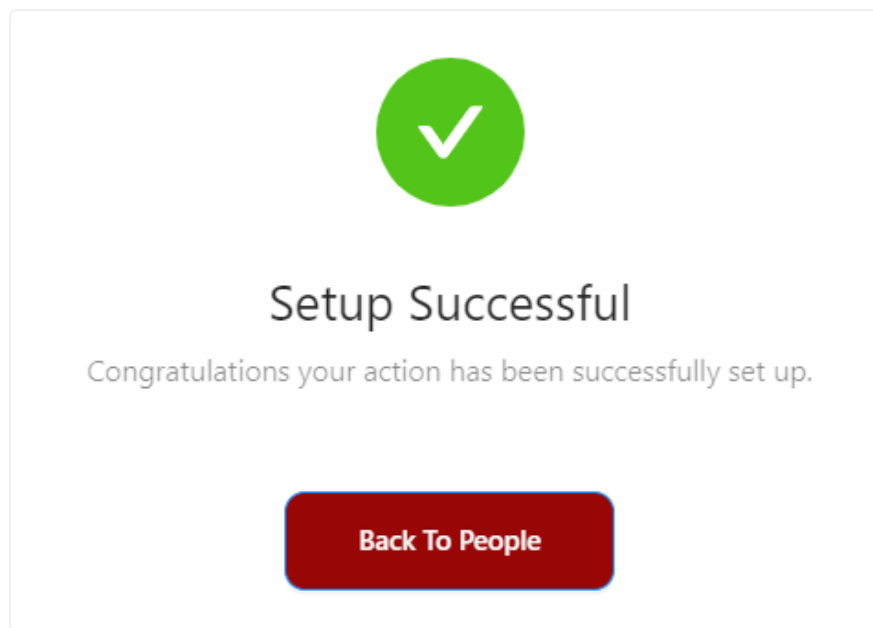

Figure 2.17: Setup Validation

2. Users will be able to navigate back to the home page by clicking the **"Back To People"** button.

2.9 Multi Creation of User ID - Batch Upload

This section is for Multi creation of user ID per batch upload.

1. The "Upload" action button allow user to export People list in the form of Excel file.
Note: The batch upload feature only allows import of General Information from Excel template. Other information including Case Template & Workflow Setup, Access Setup, and Manage access needs to be updated through System.
2. Recommended to upload the excel file according to the user group by batches.
Example: upload only all user on the specific branch and specific case workflow level only.

2.9.1 Manage Batch File

User click (a) as the Figure below to export People list in the Excel form. A pop up window shall appear with four wizard step.

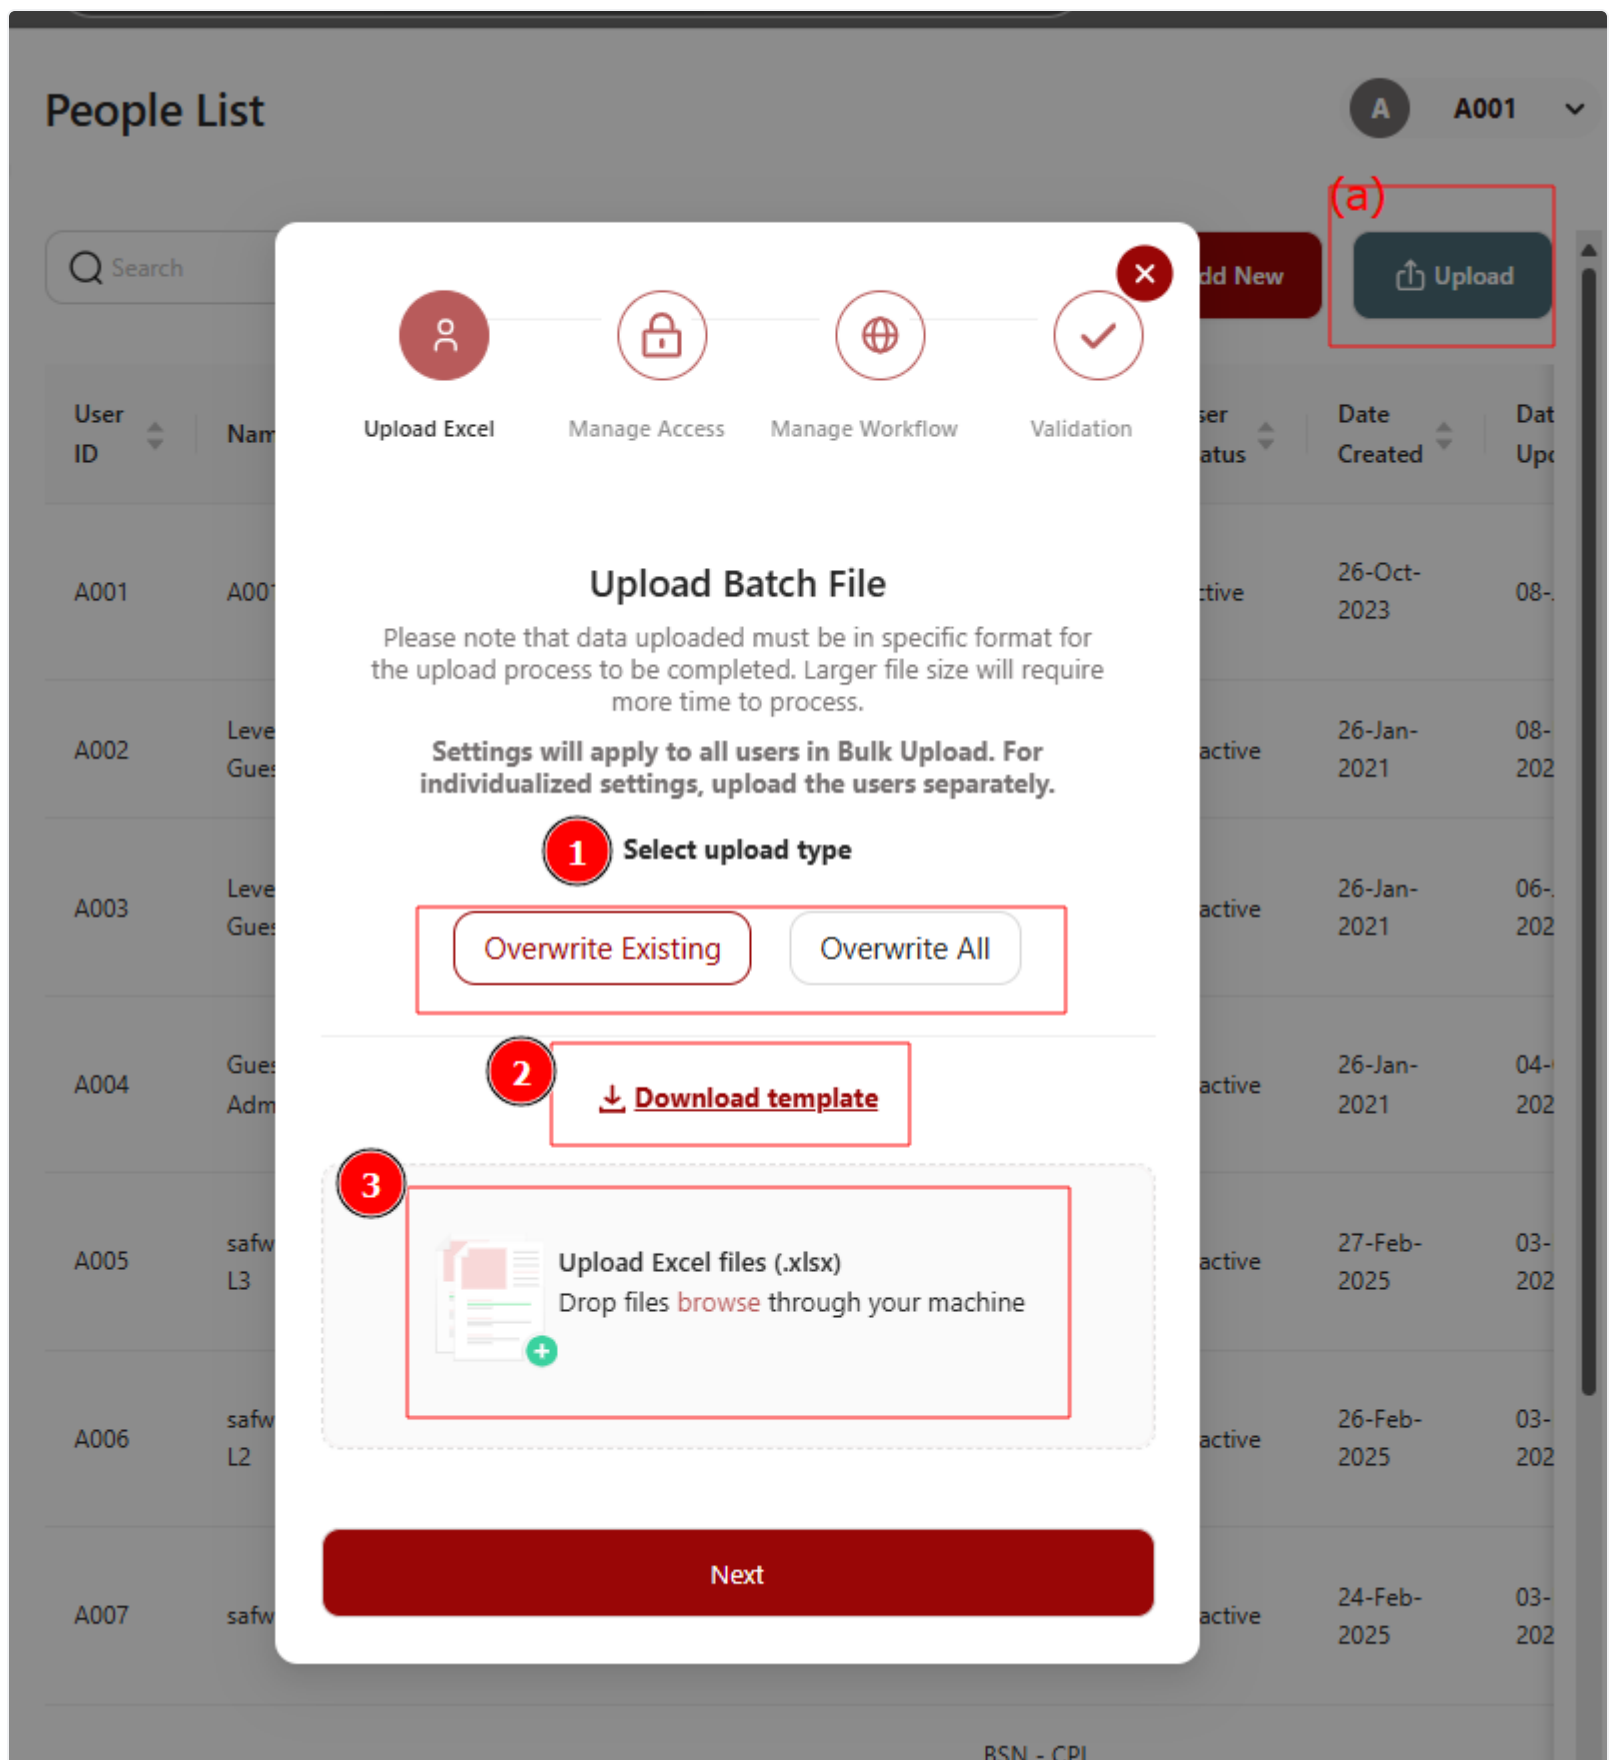

Figure 2.18: Manage Batch File Upload

a) Step 1: Upload Batch File

This wizard allow user to batch upload list of people in the form of excel template.

Note : Data uploaded must be in specific format for the uploaded process to be complete. Larger file size will require more time to be process.

The information to be displayed upon clicking the action button:

#	Name	Description
1	Upload Type	1. Allow user to select the upload type of the batch upload file with two options: a) Overwrite Existing - Existing user ID fill in the template shall be replace while additional ID shall be upload accordingly b) Overwrite All - This function will replace all existing people records with the data provided in the uploaded file. - It will maintain the user record of the uploader, even if their ID is not present in the new uploaded list. - All existing user ID shall be replace and overwrite with the file uploaded. 2. Default the upload type to "Overwrite Existing"
2	Download template	Allow to download the standard template to fill in the template
3	Upload File	Allow to upload internal list file.

b) Step 2: Manage Access Permission

When user click "Next" the system will proceed to the next wizard. This section panel allows configuring the access permission matrix to the page.

		- Onboard - Client - Transaction Monitoring - Transaction Screening - Portfolio - Reports 2. Allow to update during update action 3. Default to "Full" permission type during registration Note: Refer to "View Access Permission options Guide" for further access & permission information
2	Portfolio Red Flag Access	Allow configuring the display red flags information in the Portfolio page. 1. Watchlist Red Flags - Allow to view watchlist monitoring red flag under Portfolio 2. Ongoing Due Diligence Red Flag - Allow to view client's profile ongoing due diligence red flags under Portfolio 3. Transaction Monitoring Red Flag - Allow to view transaction monitoring red flags under Portfolio Note: These modules default to "Allow" during register.
3	Staff Red Flag & Case Access	Allows configuring display clients information who are the organization staff. 1. Red Flag Investigation Note: Only Applicable to Watchlist, Client Profile and TM modules. The client's CIF requires the staff flag indicator. a) Allow to select permission type to view the organization staff's information b) Default to "Staff & Non Staff" during register c) Selection list must be select: - Staff - Non Staff - Staff & Non Staff 2. Case Investigation

Note: Only Applicable to Watchlist, Client Profile and TM modules. The client's CIF requires the staff flag indicator

a) Allow to select permission type to view the organization staff's information
