		2.7.1	Updated new figure and details of Transaction History Details
			Added a new section of 'Link Analysis' under Overview
			Updated new figure of manage red flags

Preface

1. Customer & TESS Definition

TESS Innovation Sdn Bhd is hereinafter referred as “TESS” of the other part in this document.

2. Document Confidentiality

This document contains information that is proprietary to TESS and The Customer. This document, or any part thereof, shall not be copied, reproduced, translated or reduced to any electronic medium or machine readable form or disclosed to any third party without the prior written consent or authorization of TESS and the Customer.

3. Purpose of Document

The purpose of this document is to clearly guide user to perform day by day operation

4. Intended Audience

- Project team from TESS
- Project team from The Customer

5. Document Control

This document is subject to change control. All changes to this document shall be documented and distributed as “Release Version”. It will consist of the following: -

- Full replacement of the document; or
- Full replacement of a section in the document; or
- An addendum to the document.

Each revision will be assigned with a unique “Release Version” number and date. All pages distributed within a Document Release Notice will have the appropriate Release Version and Release Date indicated.

6. Screenshots

All sample screens as attached are for the reader’s viewing purpose only. The actual screen displayed in the [iSE M.ai](#) system shall be based on the specification of The Customer’s as agreed upon.

7. Disclaimer

- All advice given or recommendations made in this document are made in good faith on the basis of the information provided and otherwise generally available or known to TESS at the time of writing.
- No advice given or statements or recommendations made shall be in any circumstances constitute or be deemed to constitute warranty by TESS as to the accuracy of such advices, statement and recommendations.
- Subject to the contents of the Supply of Software, Licensing and Service Agreement executed, TESS shall not be liable for any loss, expense, damage or claim arising out of the advice given or not given or statements made or omitted to be made in connection with this document.
- **This document is **subject to updates**. Please note that it may be revised periodically within the same version to reflect any changes.

8. Product Version

This document is based on product version 1.3. Any other product version may not be relevant to this specific document content and its information.

Overview of Transaction Monitoring (TM) Red Flag

1. About Portfolio Transaction Monitoring (TM) Red Flag

The Portfolio Transaction Monitoring interface will offer an overview of the client's transaction red flags, along with a detailed listing of these red flags. Users can utilize this interface to conduct further investigations on the client. Figure 1.0 below serves as a sample interface for reference. There are 5 sub-sections for the user to view and investigate the Transaction Monitoring Red Flag: Detail, KYC, Case History, Risk History, and Insights.

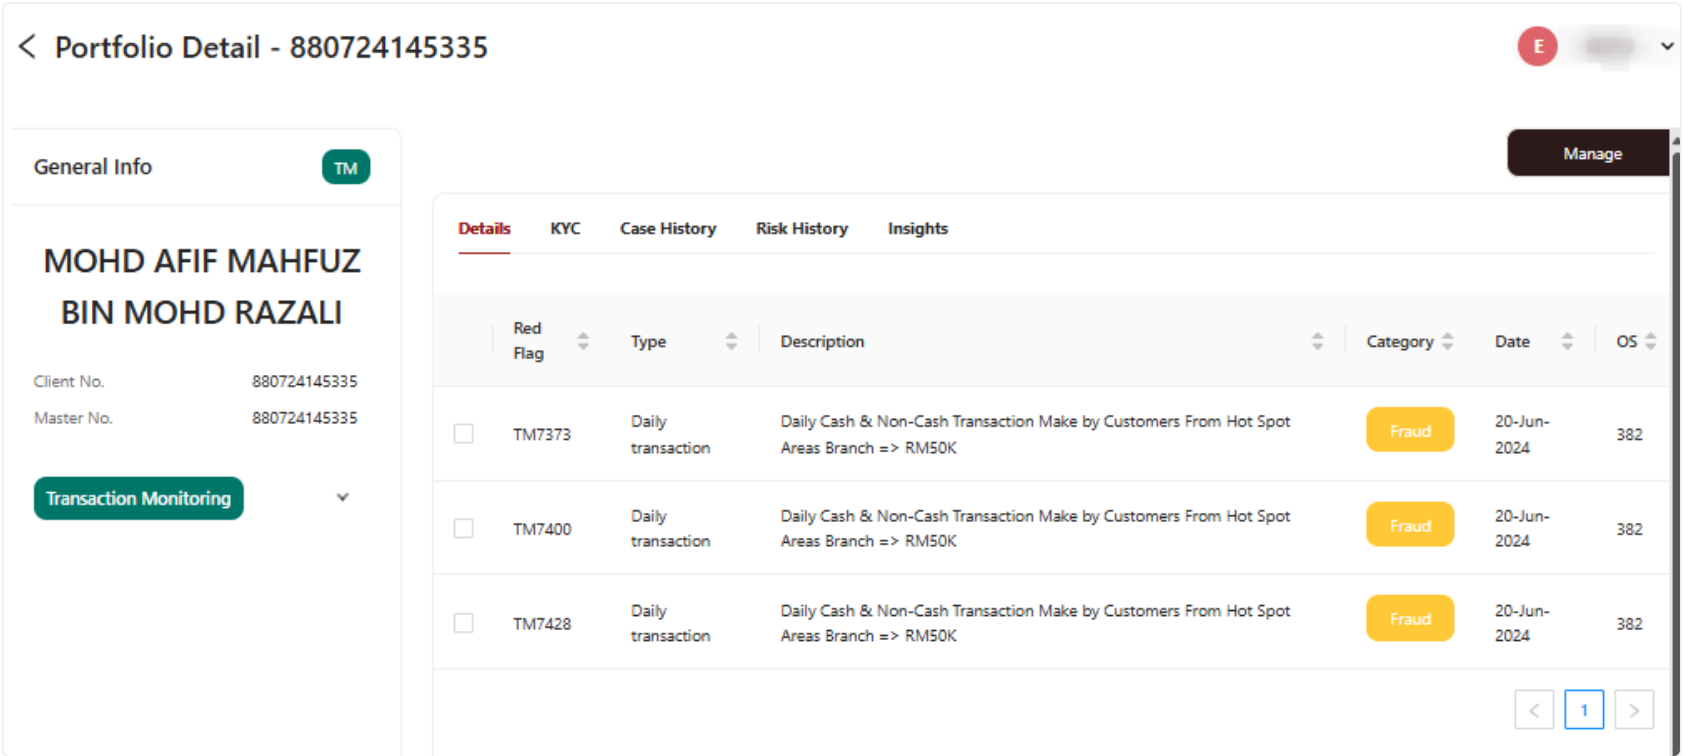

Figure 1.0: TM Red Flag Interface

---	---	---

2.2.2 How to Investigate TM Red Flag?

This section outlines how users can conduct investigations against Transaction Monitoring red flags. It involves reviewing and examining detailed records of red flags.

Steps to Investigate Transaction Record - TM Details

- 1. Click the box for any red flag list (a) as desired in Figure 2.2 below.
- 2. Transaction record list (b) will be popped out and by default, there are seven (7) columns of the information that is known as **"Transaction Record"**.

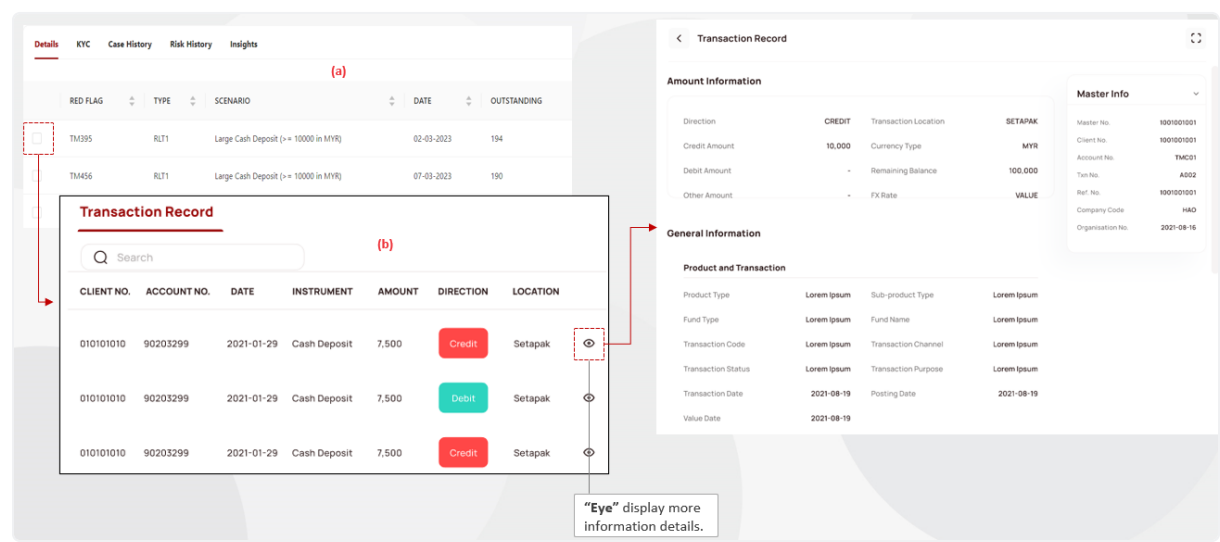

Figure 2.2: Transaction Monitoring Details Process Flow

- 3. If the user clicks the **"Eye"** button, they will get to view the match record in further detail on the pop-up screen as referred to in Figure 2.3 above (c). The user can verify full client transaction details information.

2.2.2.1 Transaction Record

This section is displayed after clicking the **"Select checkbox"** of any red flag to view further details in the transaction record pop-up section. The display information as the figure as shown in the table below:

Transaction Record							
1	2	3	4	5	6	7	8

2.3 Transaction Monitoring Portfolio ☐ KYC

This section allow users to view the client's information. The client information availability is **subject based by**:

- Data provided by the organization
- Data mapping configuration setup under General setting

2.3.1 How to View KYC Information?

The following are a few tabs of KYC details, shown and explained below as examples of configured data mapping.

Steps to view KYC Information:

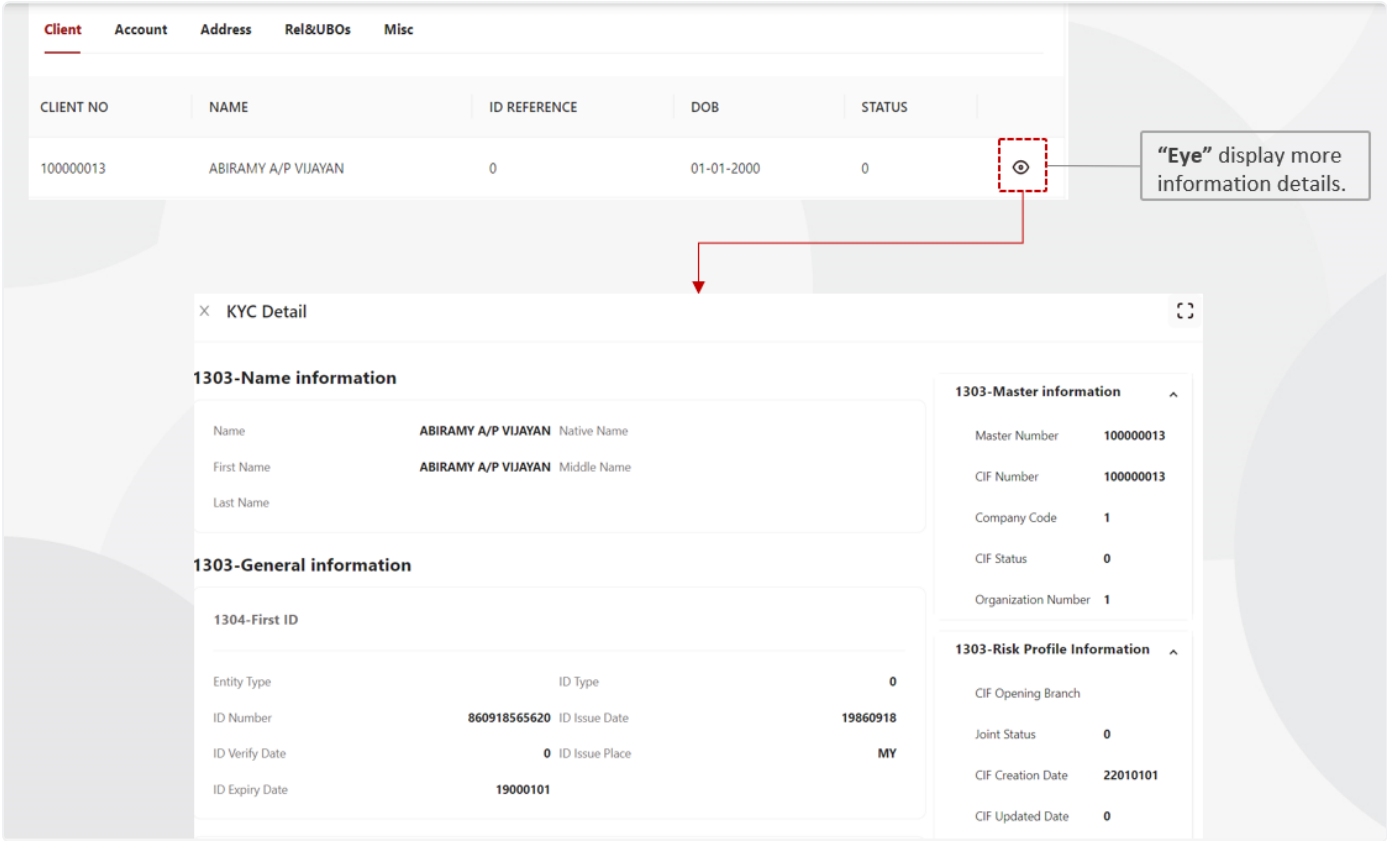

Figure 2.5: How to View KYC Information

- 1. To view KYC information, users can click on the "KYC" tab.
- 2. Under this tab, it displays five (5) panels whereby each one of them also contains their own set of information (refer to Figure 2.19 for further information):

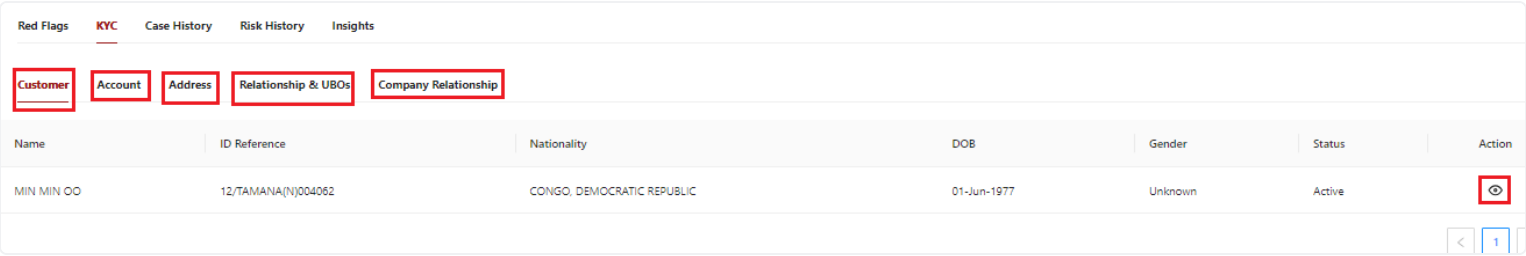

Figure 2.6: KYC Details

- 3. Only certain panels contain the "Eye" button to display more information regarding KYC details.

2.3.2 KYC Details - Customer

This section outlines how the compliance user can investigate and view client KYC detail information while investigating the transaction red flag.

2.4 Transaction Monitoring Portfolio □ Case History

This section allows users to view clients who have had past historical cases built into their portfolio.

2.4.1 Case History

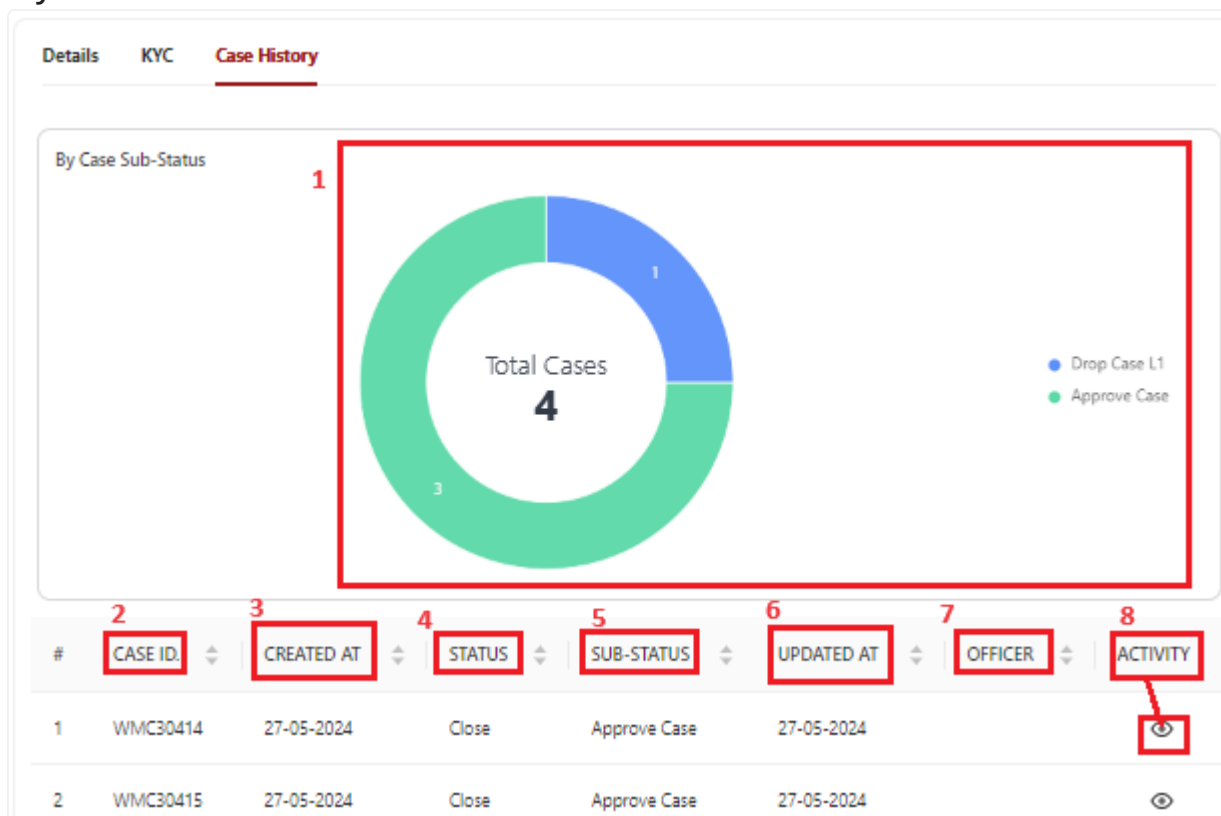

Figure 2.12: Case History Details

The display information is in the table listed below:

#	Name	Description
1	Case History Pie Chart	Display the total number of closed cases. Each module is unique with prefix. Transaction Monitoring: TMC[Number]
2	Case ID	Display module case primary key ID no.

3	Created At	Display the date that the case was first created and escalated for review.
4	Status	Display the final status of the case.
5	Sub-Status	Display the final sub-status of the case.
6	Updated At	Display the case history last changed at.
7	Officer	Display the final person who manages the case.
8	Activity	Display the collective investigation activity surrounding the cases. • "Eye" icon View: Case History Activity. This will be a pop-up windows overlay displaying the Case History Activity

2.4.2 Case History Activity

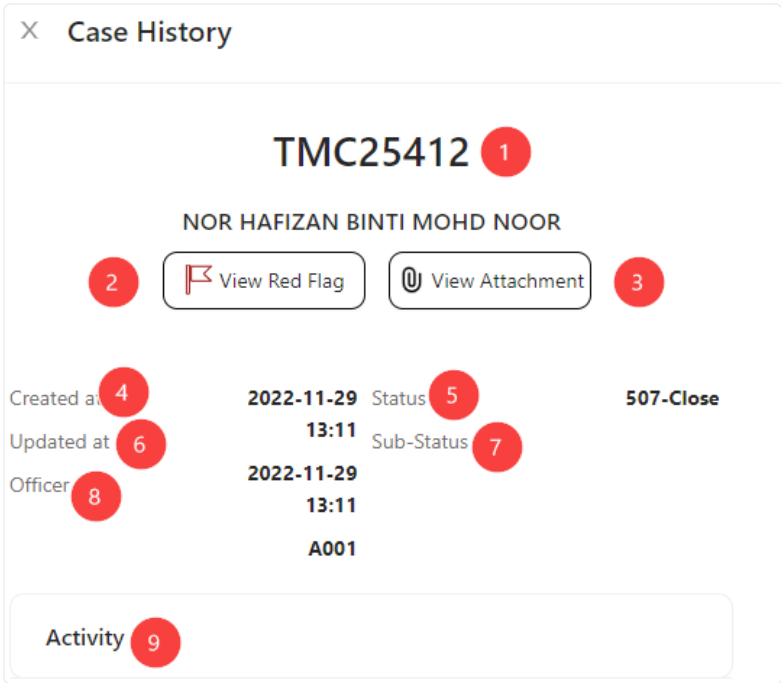

Figure 2.13: Case History Activity

The display information is in the table listed below:

#	Name	Description
1	Client's details	• Display the module case primary key ID number. Each module is unique with a prefix. Transaction monitoring: TMC[Number] • Display the client's name.
2	View red flag	Allow to view red flag cases.
3	View attachment	Allow to view supporting documents of case history.

4	Created at	Display the date that the case was first created and escalate for review.
5	Status	Display the final status of the case.
6	Updated at	Display the date that the case investigation is last updated.
7	Sub-status	Display the final status sub of the case.
8	Officer	Display the final person who manages the case.
9	Activity	Display the activity log of the case.

2.4.3 How to Manage Case History?

This section outlines the steps for the user to perform case historical management during the TM investigation.

Steps to Manage Case History

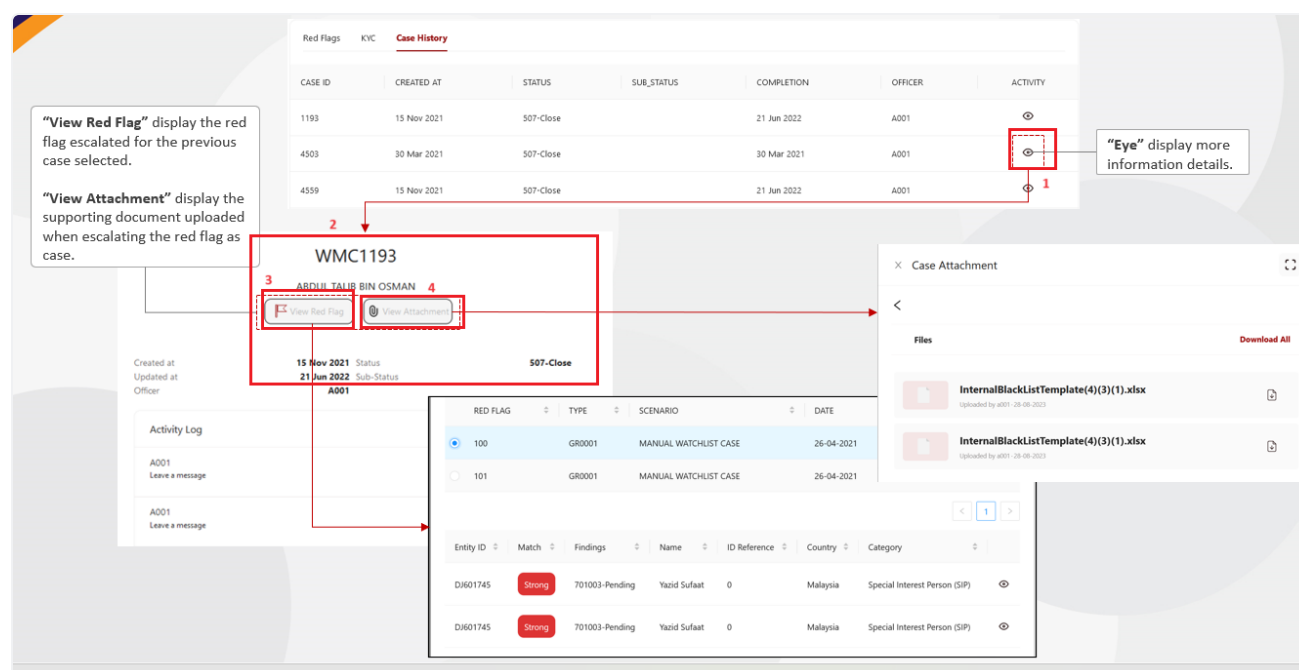

Figure 2.14: Case History Process Flow

1. Click on the "**Eye**" icon to view more detailed information regarding the history of red flag cases associated with the Watchlist.
2. The case history activity screen will appear when the user clicks to manage the case for Watchlist. In this screen, the user has the option to view the red flag cases or view case attachments.
3. **View Red Flag Cases:** Clicking the "**View Red Flag**" button will display the red flags that were escalated in the previously selected case.
4. **View Attachments:** If the user wishes to view supporting documents related to the escalation of red flag cases, they can click on "**View Attachment**", and all case attachments with supporting documents will be displayed.

2.5 Transaction Monitoring Portfolio □ Risk History

This section enables users to view the client have any past risk changes history build on their portfolio.

2.5.1 Risk History

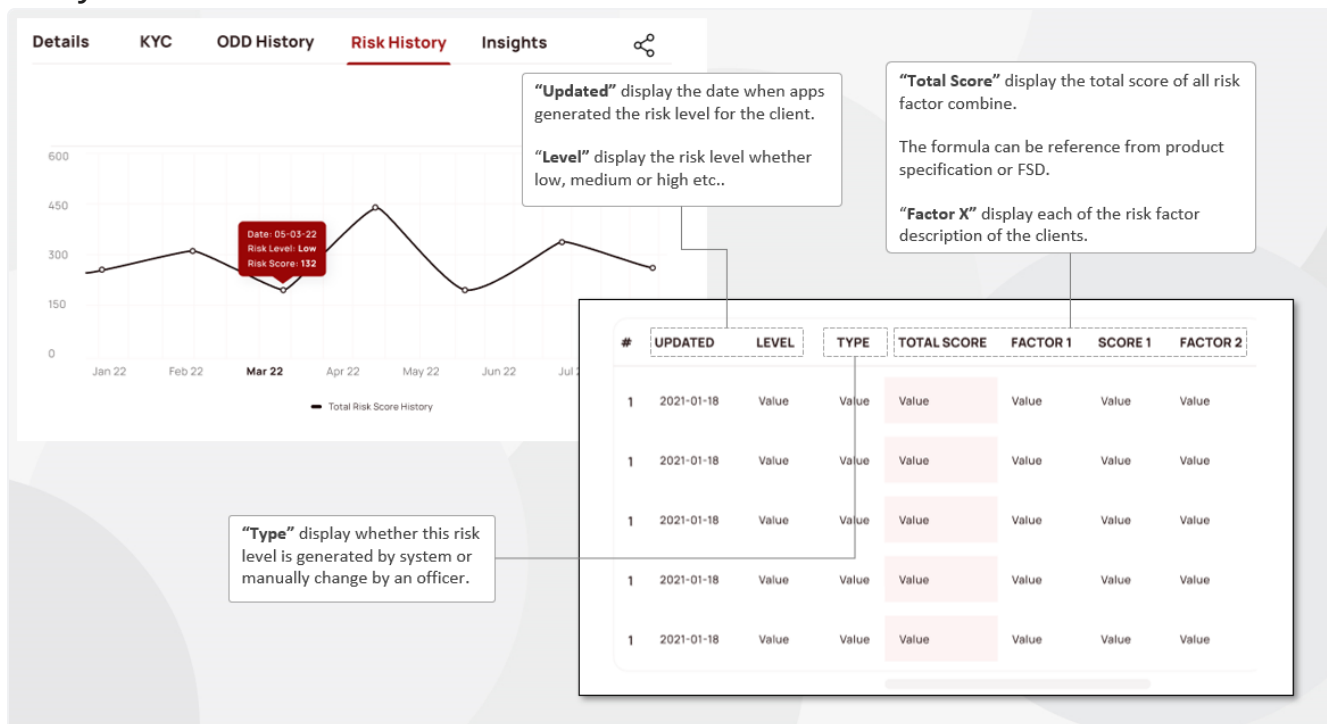

Figure 2.15: Risk History

The display information is in the table listing as below:

#	Name	Description
1	Graph	Display risk level based on risk amount over time. When hovering on a point, show: 1. Date 2. Risk Level 3. Risk Score
2	Last Updated Date	Display the date that risk history last changed.
3	Risk Level	Display the risk level of the client when last changed.
4	Risk Type	Display the method used to change the risk: 1. System rate 2. Manual rate
5	Risk Factors (View Button)	1. Display the risk factors based on the configuration setup 2. In the pop-up, the following information should be displayed in the table, such as: a. Updated date

- b. Risk level
- c. Risk type
- d. Total score
- e. A maximum of 20 columns for risk factors to be included
- f. 20 columns for risk factors score and based on the configuration setup

*Notes: The first three columns of the table (Updated, Risk Level, Risk Type) shall be shown as a frozen panel.

2.5.2 Risk Factors

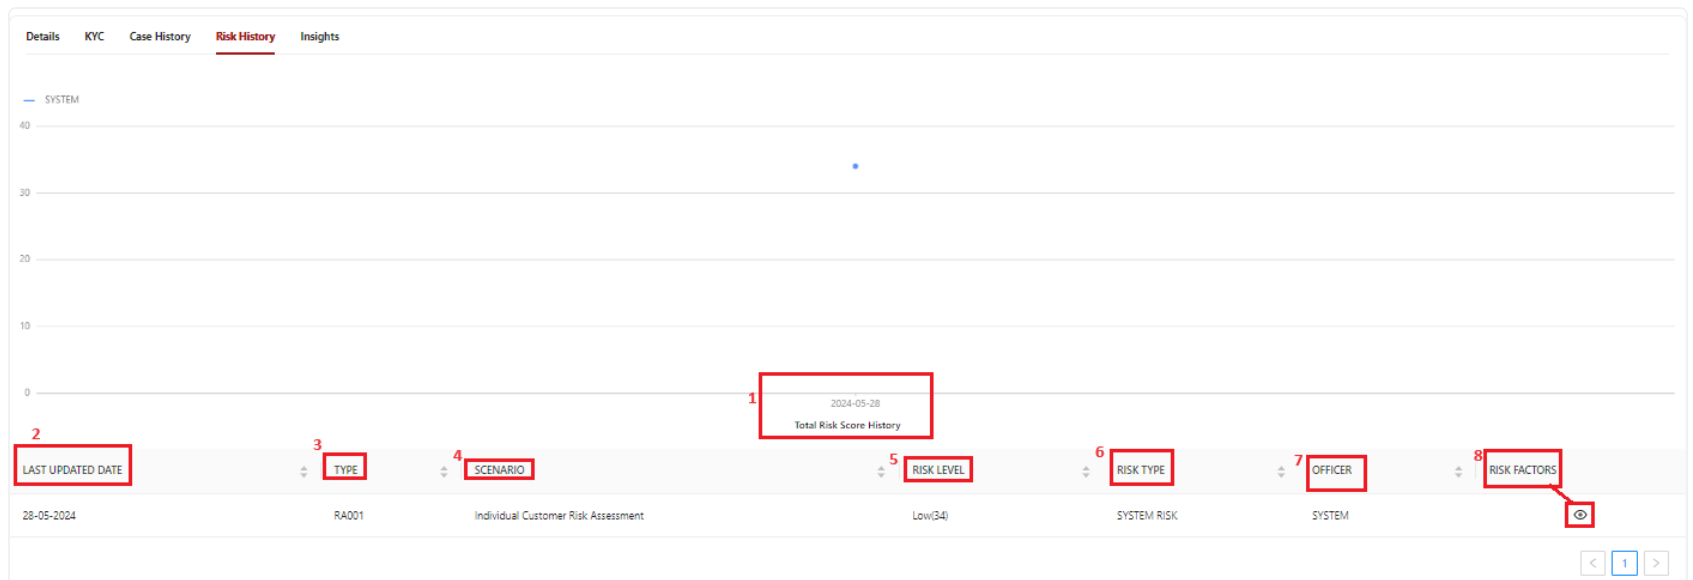

Figure 2.16: Risk Factors

The display information is in the table listed below:

#	Name	Description
1	Risk Score History Graph	Display the risk level based on risk amount over time.
2	Last Updated Date	Display the date that risk history last changed.
3	Type	- System Rate - Manual Rate
4	Scenario	Display the transaction rule scenario's full description. The data will be read from the transaction monitoring rule parameter setting.
5	Risk Level	Display the risk level of the client when the last changes.
6	Risk Type	Display the method used to change the risk.

7	Officer	Display the person who manages the risk history.
8	Risk Factor (View Button)	Display all the risk factors based on the configuration setup .

2.5.3 Risk Factors Details

After clicking on the Risk Factors (Eye view button), Figure 2.17 will be popped out to view in details of the risk factors.

Risk Factor										
1	2	3	4	5	6	7	8	9	10	11
NYEIN CHAN AUNG	UPDATED	LEVEL	TYPE	TOTAL SCORE	EMPLOYMENT STATUS	EMPLOYMENT STATUS SCORE	NATURE OF BUSINESS	NATURE OF BUSINESS SCORE	NATIONALITY	NATIONALITY SCORE
	23-02-2023	High		20	Employee	0		0	MMR	1

Figure 2.17: Risk Factor Detail

The following information should be displayed as listed below:

- Updated Date
- Risk level
- Risk Type
- Total Risk Score
- Maximum of 20 columns for risk factors to be included such as Employment Status, Nature of Business, Nationality, etc.
- 20 columns for risk factors score and based on the configuration setup such as Employment Status Score, Nature of Business Score, Nationality Score, etc.

Note: The first three columns of the table (Updated, Risk Level, Risk Type) shall be shown as a freeze panel.

2.6 Transaction Monitoring Portfolio ▯ Insights

This section enables users to view the client's accumulated transactions since integrated with the application.

Under the "**Insights**" panel, there are two sections which are "**Overview**" and "**Transaction History**" as shown in the figure below:

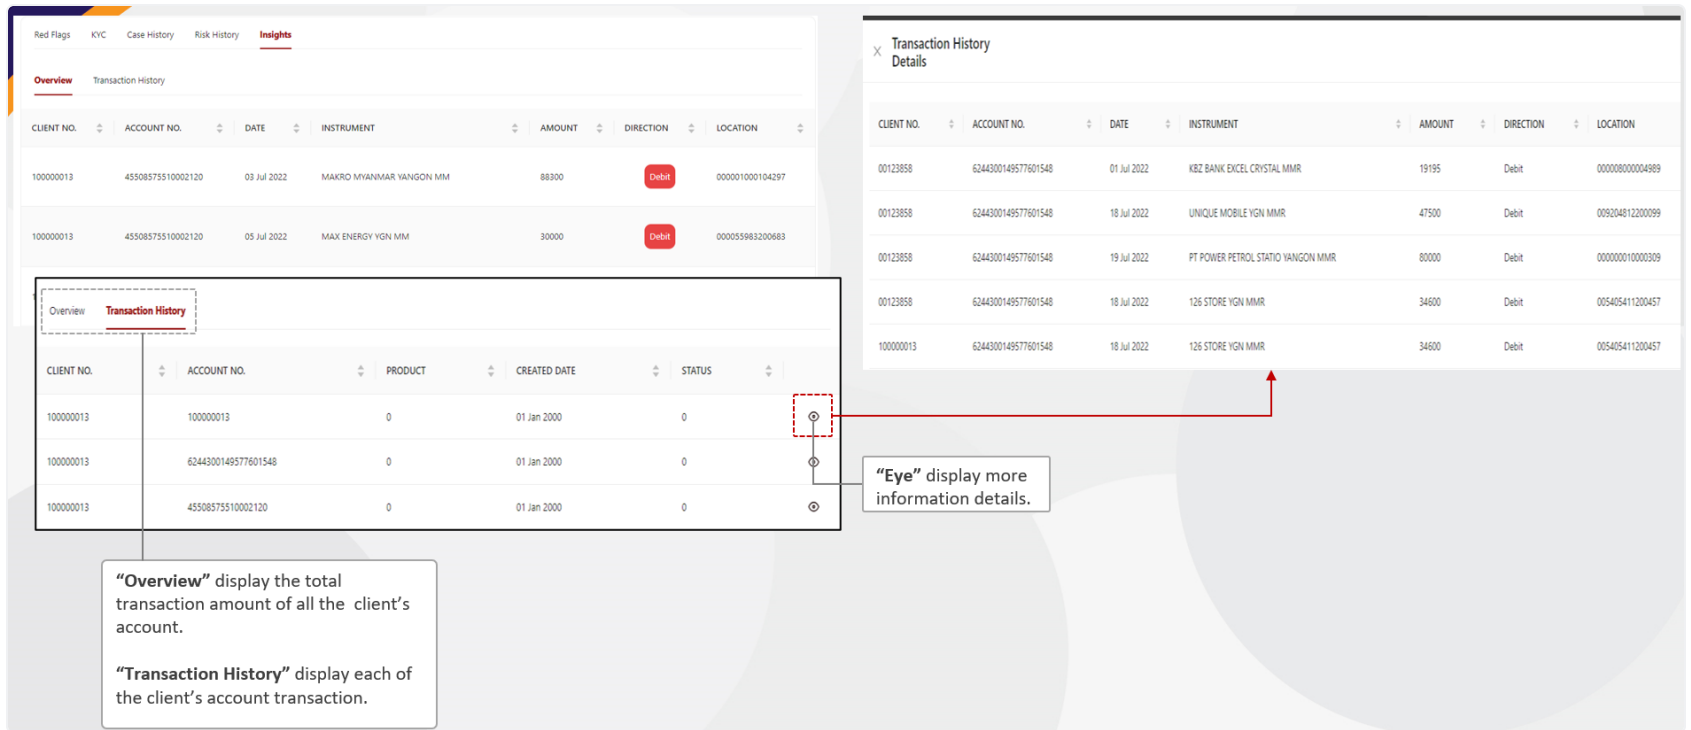

Figure 2.18: Insights Details

Steps to View Insights Information:

1. In the **"Insights"** tab, users are able to view the overview and transaction history of all the client's account.
2. In the **"Transaction History"** tab, users can navigate to view further **"Transaction History Details"** by clicking on the **"Eye"** icon.

2.6.1 Overview

Allow users to view the client's accumulated transactions since integrated with the application.

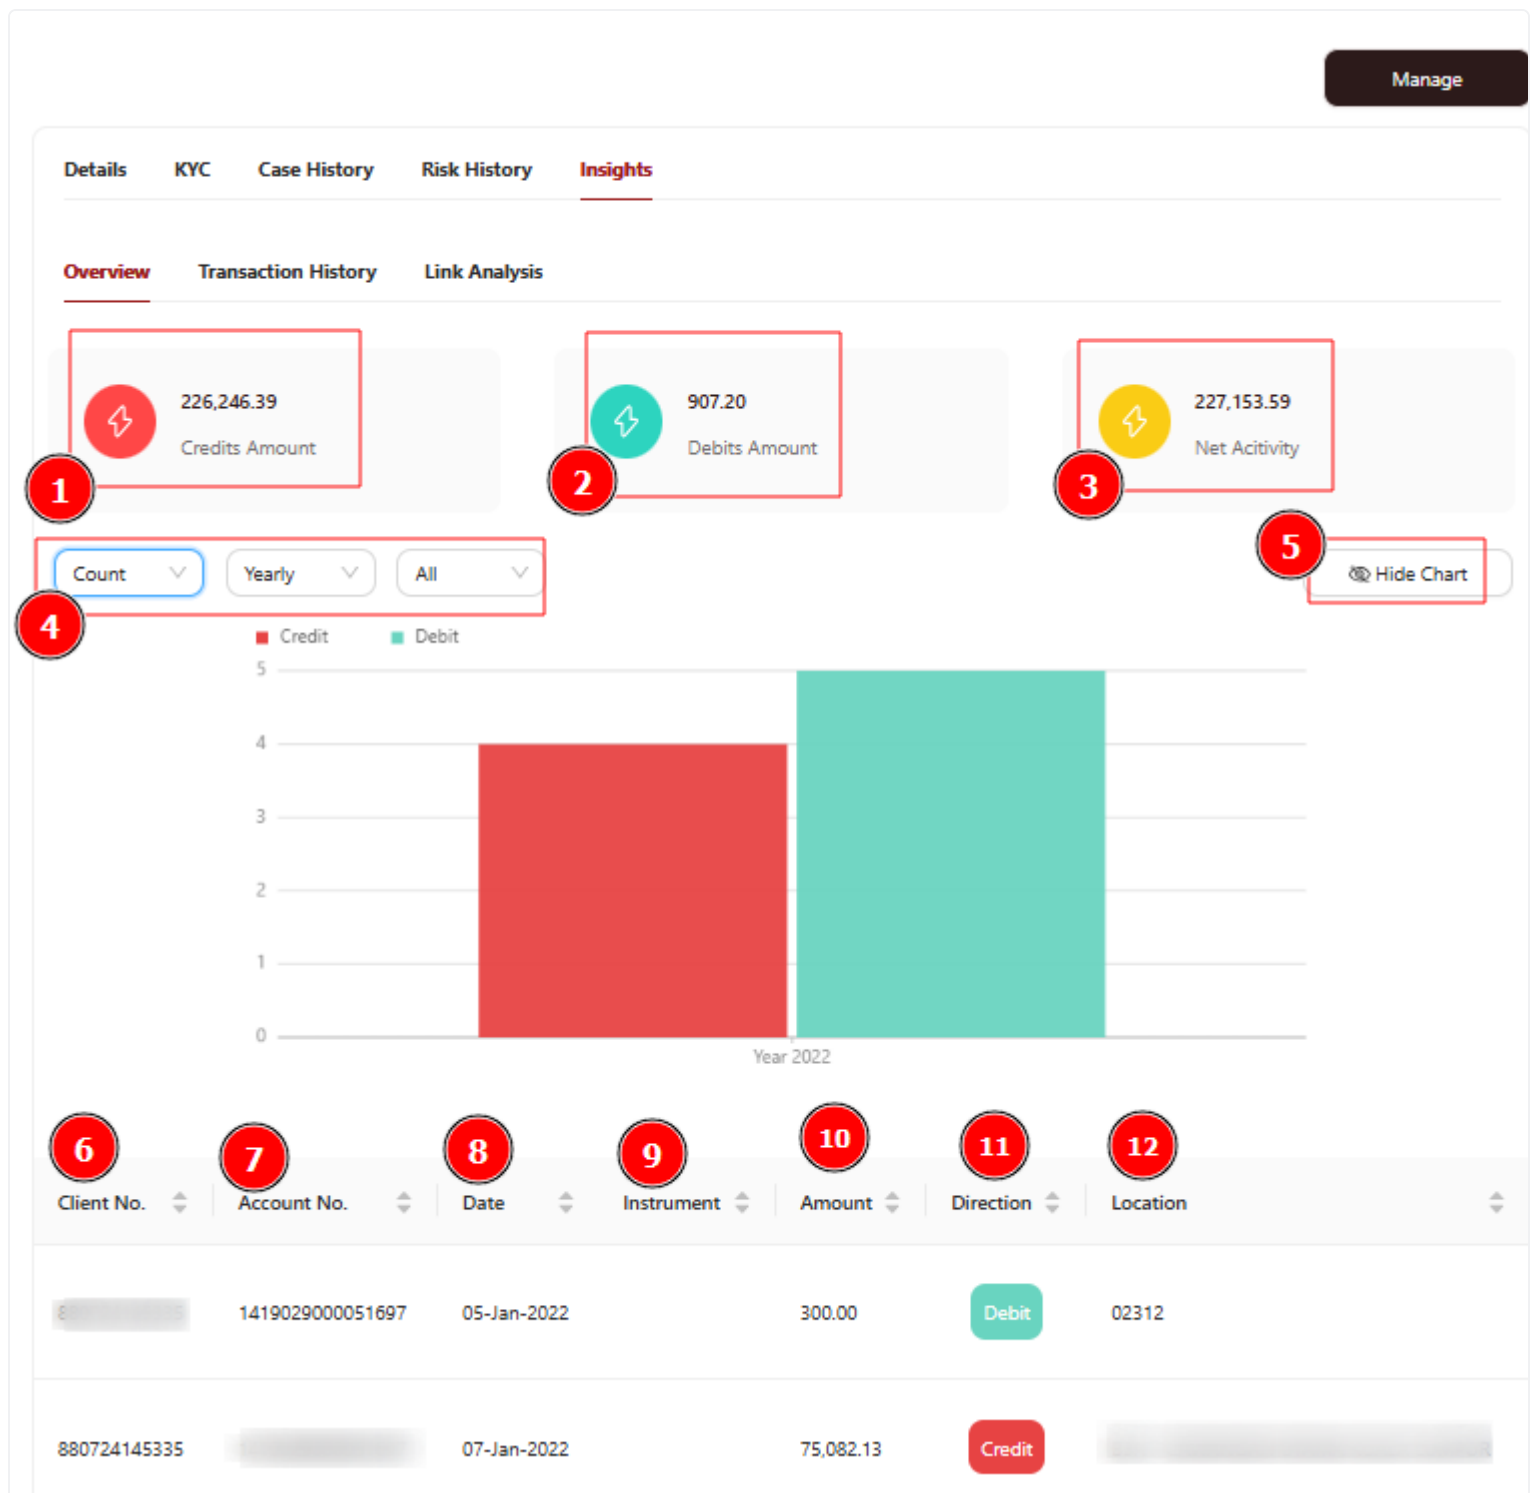

Figure 2.19: Insights - Overview

The display information is in the table listed below:

#	Name	Description
1	Credit Amount	Display the total accumulate credit amount transaction for all the client no. and account no.
2	Debits Amount	Display the total accumulate debit amount transaction for all the client no. and account no.
3	Net Activity	Display the total accumulate transaction on both credit and debit for all the client no. and account no.
4	Graph Filters	1. Allow to change graph view to transaction count

		2. Allow to change graph view by duration Daily, Weekly, Monthly or Yearly 3. Allow to change graph view to show either - All - Debit - Credit
5	Graph Chart panel button	Allow user to select to collapse or hide the graph chart panel
6	Client No.	Display the client's CIF ID or other golden unique number.
7	Account No.	Display the client Account No. or unique number.
8	Date	Display the date that the transaction is performed.
9	Instrument	Display the instrument of the transaction method.
10	Amount	Display the amount that transaction is performed: • Debit • Credit
11	Direction	Display the direction of transaction flow either credit (deposit/incoming) or debit (withdrawal/outgoing).
12	Location	Display the location where the transaction is happens.

2.6.2 Transaction History

Allow users to select and view client-specific account transactions since integrated with the application.

This section allow users to view the client specific account transactions since integrated with the application.

When the user clicks the "**Eye-View Button**", the transaction history details will be displayed in a pop-up.

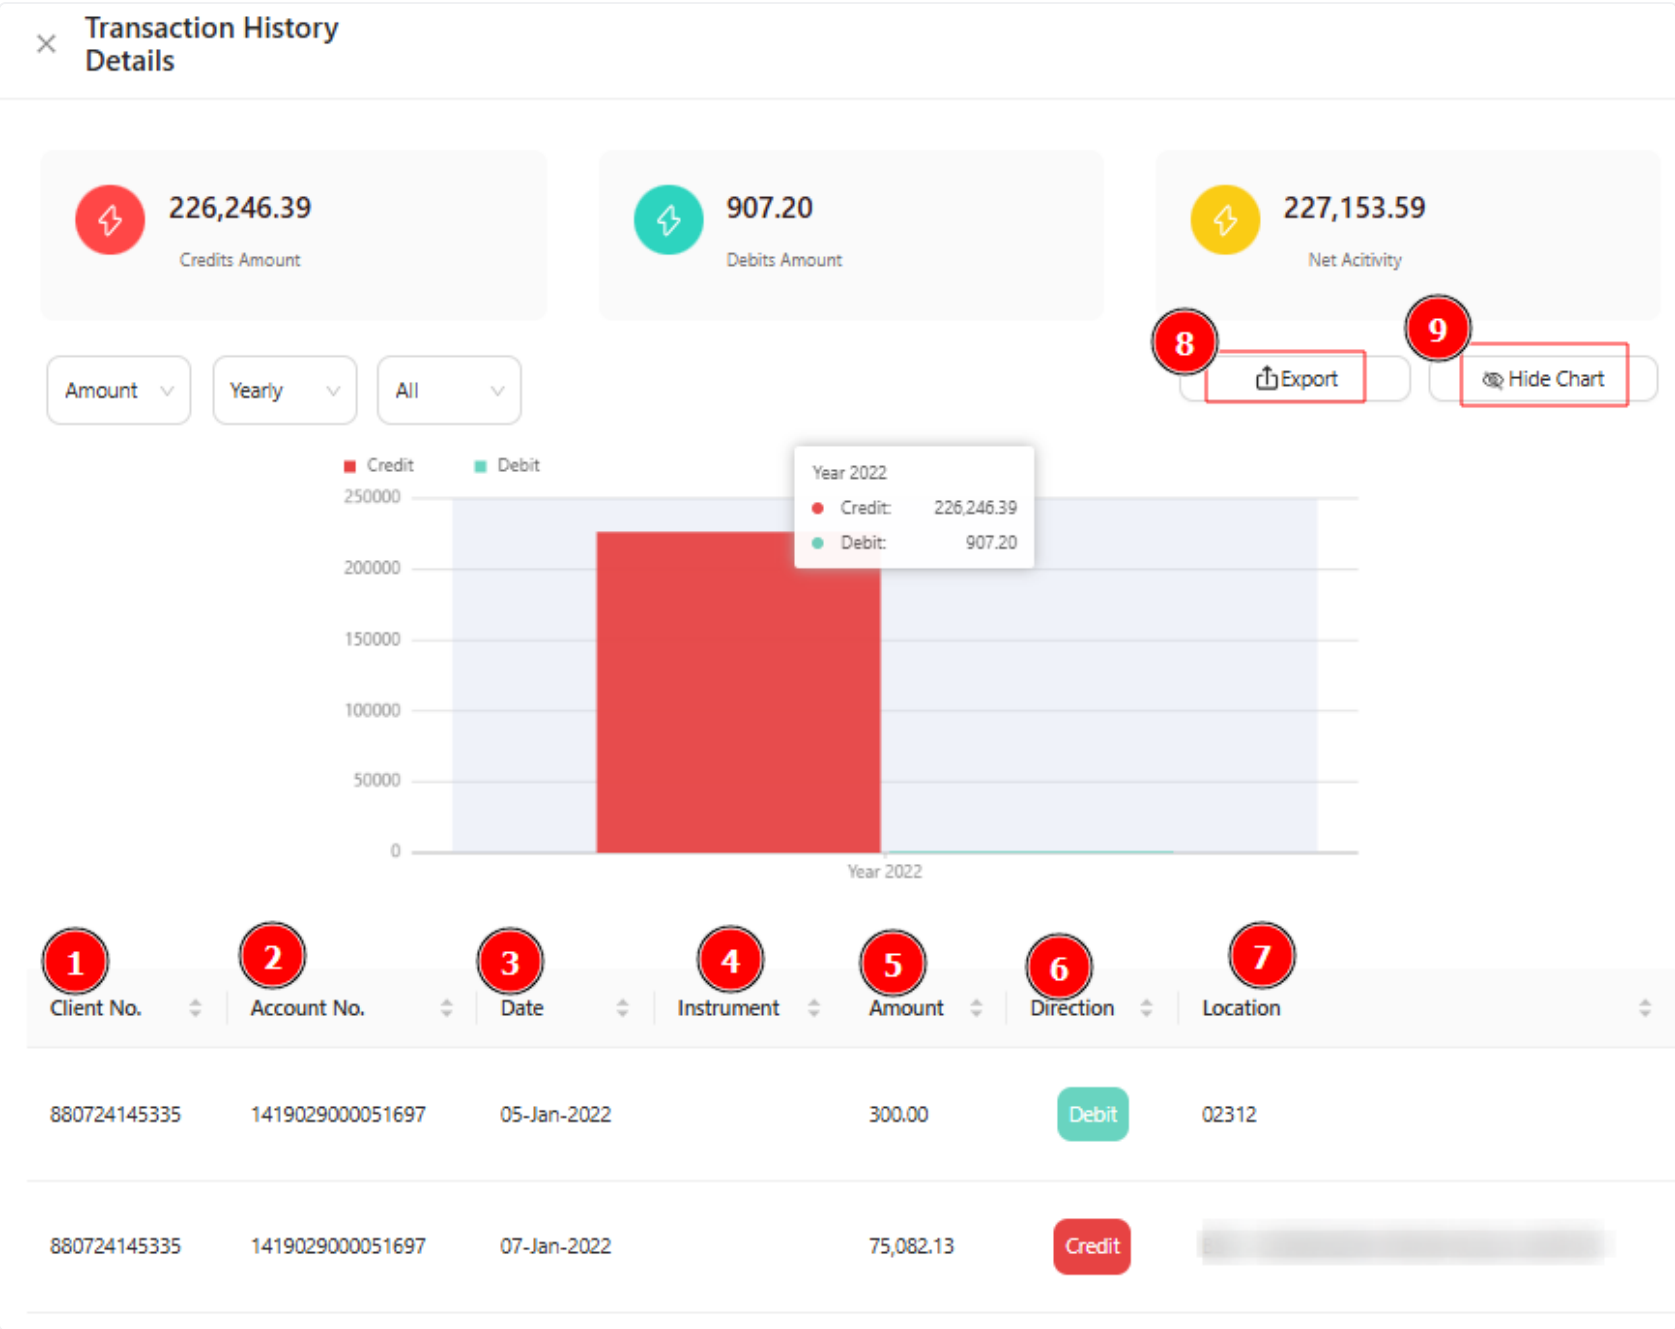

Figure 2.21: Insights - Transaction History Details

The display information is in the table listed below:

#	Name	Description
1	Client No	Display the client's CIF ID or other golden unique number.
2	Account No	Display the client Account No. or unique number.
3	Date	Display the date that the transaction is performed.
4	Instrument	Display the instrument of the transaction method.
5	Amount	Display the amount that the transaction was made.
6	Direction	Display the direction of transaction flow either credit/debit.
7	Location	Display the location where the transaction happens.

8	Export button	Allow user to export the graph for Transaction History details based on selected timeframe.
9	Graph Chart panel button	Allow user to select to collapse or hide the graph chart panel

2.6.3 Link Analysis

This section provides a different dimension of investigation on the client's transaction and associates the possible interrelationships between clients.

This facilitates a more refined investigation methodology and diverse insights and investigative perceptive.

Below are the interface of Link Analysis of the client under the TM Red Flag module.

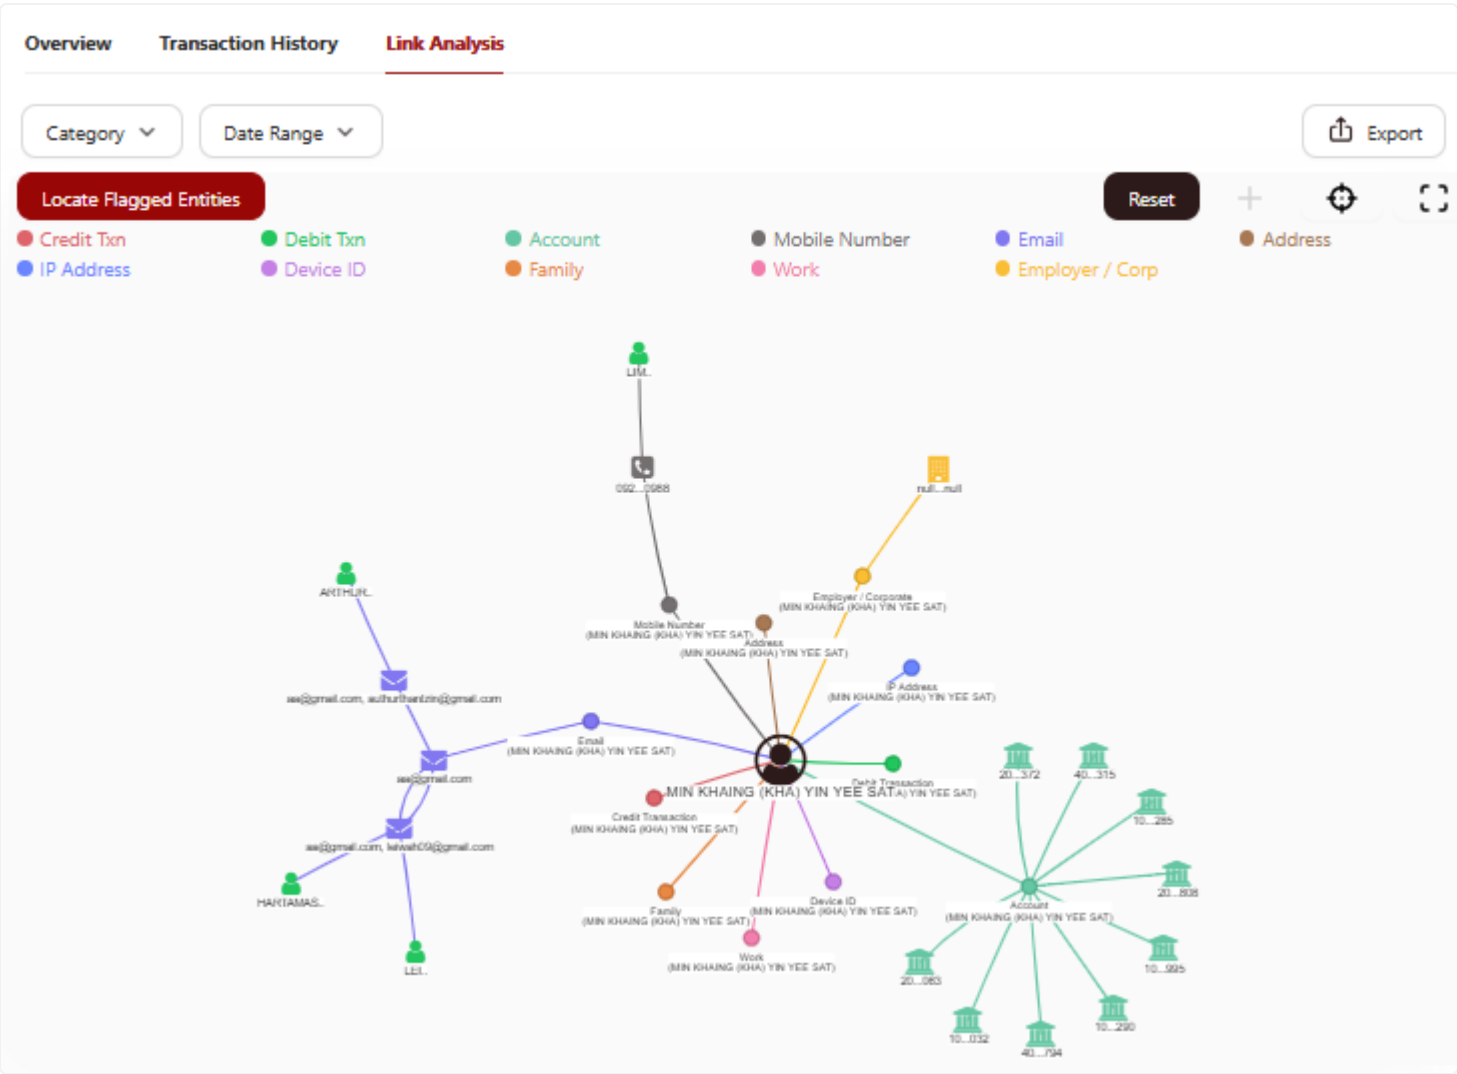

Figure 2.22: Link Analysis section

2.6.3.1 Data Requirement

The expected data is require to use link analysis features:

#	Data Type	Description
1	Account	Client's related account from various product

		Note: Reference from Account table
2	Family	1. Client's related account with familial relationship 2. Applicable for individual client only Note 1: Reference from Relationship table Note 2: Reference from UBO table
3	Employer or corporate relation	Client's related with employer relationship Note 1: Reference from Client table Note 2: Reference from Relationship table
4	Director or UBOs	1. Client's related with director or UBOs relationship 2. Applicable for corporate client only Note 1: Reference from Relationship table Note 2: Reference from UBO table
5	Address	Client's related email address Note: Reference from Client table
6	Device ID	Client's related device ID performed the transaction or account creation Note: Reference from Account table
7	Transaction	Client's related transaction performed Note: Reference from Transaction table

2.6.3.1 Data Requirement

1. The expected link relationship condition and display node:

#	Data Type	Description
1	Account	1. Allow to associate account number related to the client number. 2. Allow to associate for both individuals or corporate.
2	Family	1. Allow to associate with any family relationship related to

		the client number 2. Allow to associate with any family relationship account number related to the client number 3. Allow to associate for individuals only
3	Employer or corporate relation	1. Allow to associate with any employer relationship related to the client number 2. Allow to associate with any employer account number related to the client number
4	Director or UBOs	1. Allow to associate with any director or UBOs relationship related to the client number 2. Allow to associate with any director or UBOS account number related to the client number 3. Allow to associate for corporate only
5	Address	1. Allow to associate with existing address or past address related to the client number 2. Allow to associate any individuals or corporate having the same full address
6	Phone Number	1. Allow to associate with existing phone number or past phone number related to the client number 2. Allow to associate any individuals or corporate having the same phone number
7	Email Address	1. Allow to associate with existing email address or past email address related to the client number 2. Allow to associate any individuals or corporate having the same email address 3. Allow to associate with similar email address based on the email name before the domain name
8	IP Address	1. Allow to associate with existing transaction IP address or past transaction IP address 2. Allow to associate with any individuals or corporate having the same IP address either from account or transaction
9	Device ID	1. Allow to associate with existing transaction device ID or past transaction device ID 2. Allow to associate with any individuals or corporate having the same device ID either from account or transaction

10	Transaction	1. Allow to associate any transaction performed by the client to other individual or corporate account. 2. Allow to associate any transaction performed by other individual or corporate with the client number.
----	-------------	---

2. The behavior of the link condition node:
 - a. Allow to view linkage transactions up to 6 months or 180 days.
 - b. The primary client number from the case will be the primary central node.
 - c. The graph node represent the individuals or corporate attributes
 - d. The link represent connections between nodes.
 - e. The categories represent the connection data type.

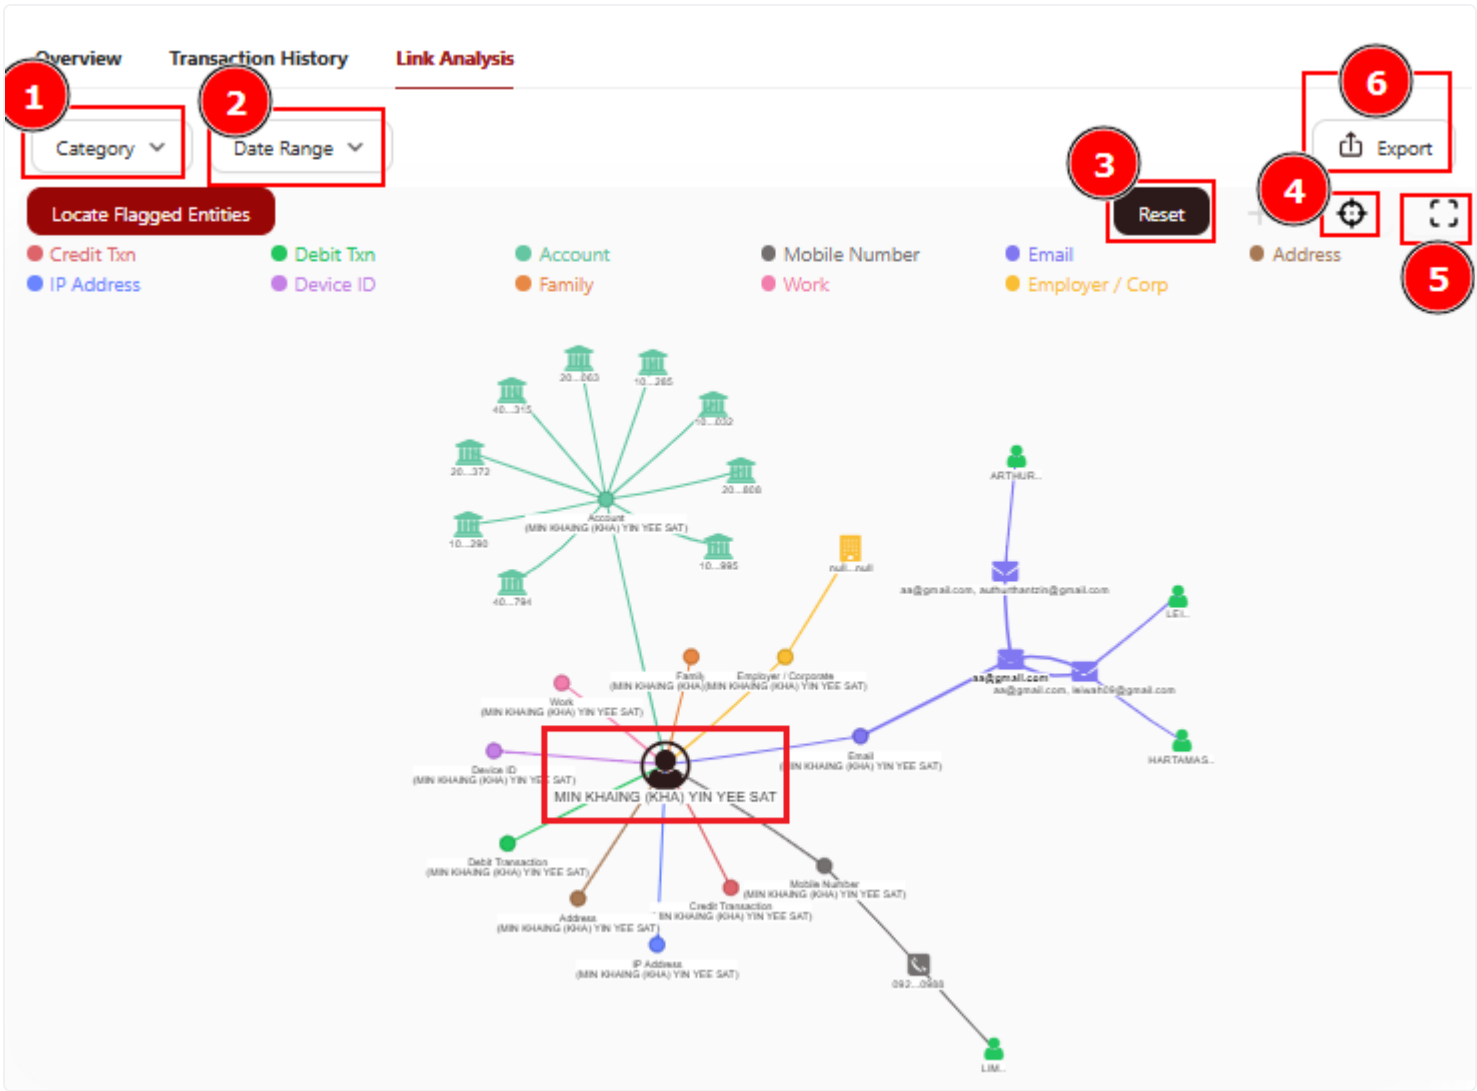

Figure 2.23: Link Analysis condition node

The display information is in the table listed below:

#	Name	Description
---	------	-------------

1	Category	User allow to select category to show / hide the select category: • Credit Transaction • Debit Transaction • Account • Mobile Number • Email • Address • IP Address • Device ID • Family • Work • Employer / Corporate
2	Date Range	User allow to select transaction date range to display the link condition node
3	Reset	Allow to reset the display node back to set
4	Recenter Graph	Allow to recenter the graph display node back to its place
5	Maximize / Minimize button	Maximize: The system will display the node in full-screen mode for a detailed preview. Minimize: The system will exit full-screen mode and return to the normal preview size, navigating back to the previous Link Analysis screen.
6	Export	User allow to export the Link Analysis Graph by two format: • Excel file • PNG file

2.7 How to Manage Red Flags

1. For the Transaction Monitoring Red Flag, the user can manage Red Flag for each Client by these three (3) actions that are known as Scenario, which is:
 - Add New Case
 - Add to Existing Case
 - Drop Red Flag

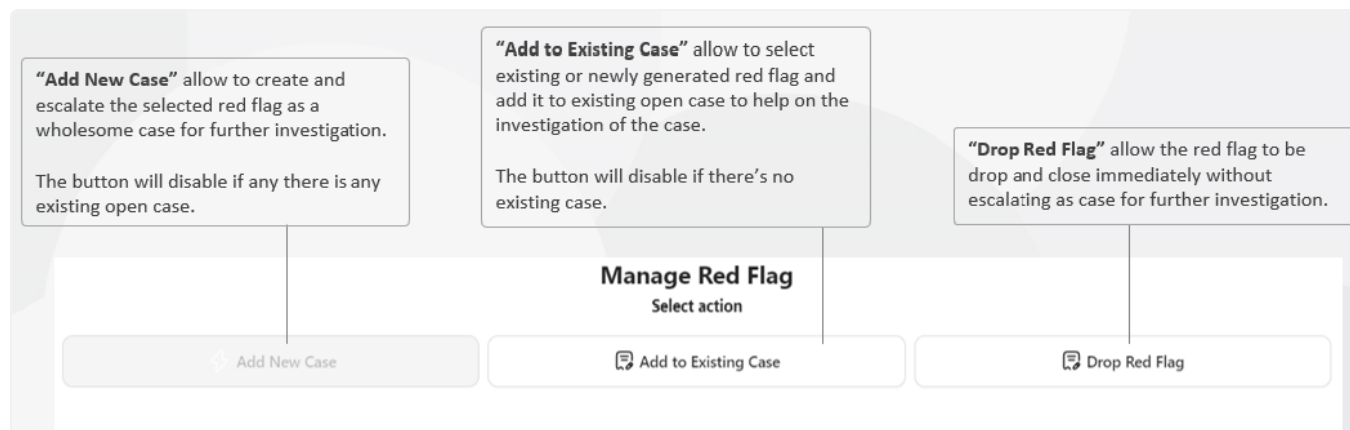

Figure 2.24: Manage Red Flag Actions

2.7.1 How to Manage Red Flag - Transaction Monitoring Red Flag

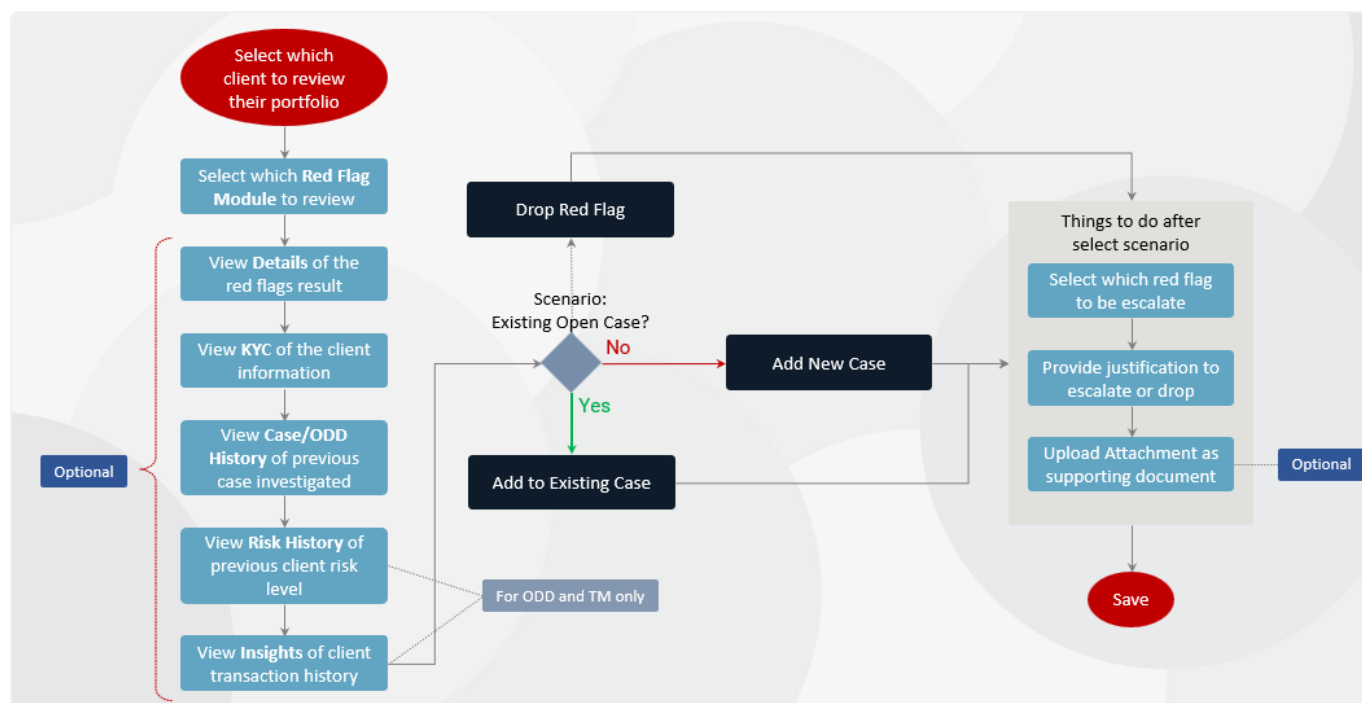

Figure 2.25: App Process Flow to Manage Transaction Monitoring (TM) Red Flag

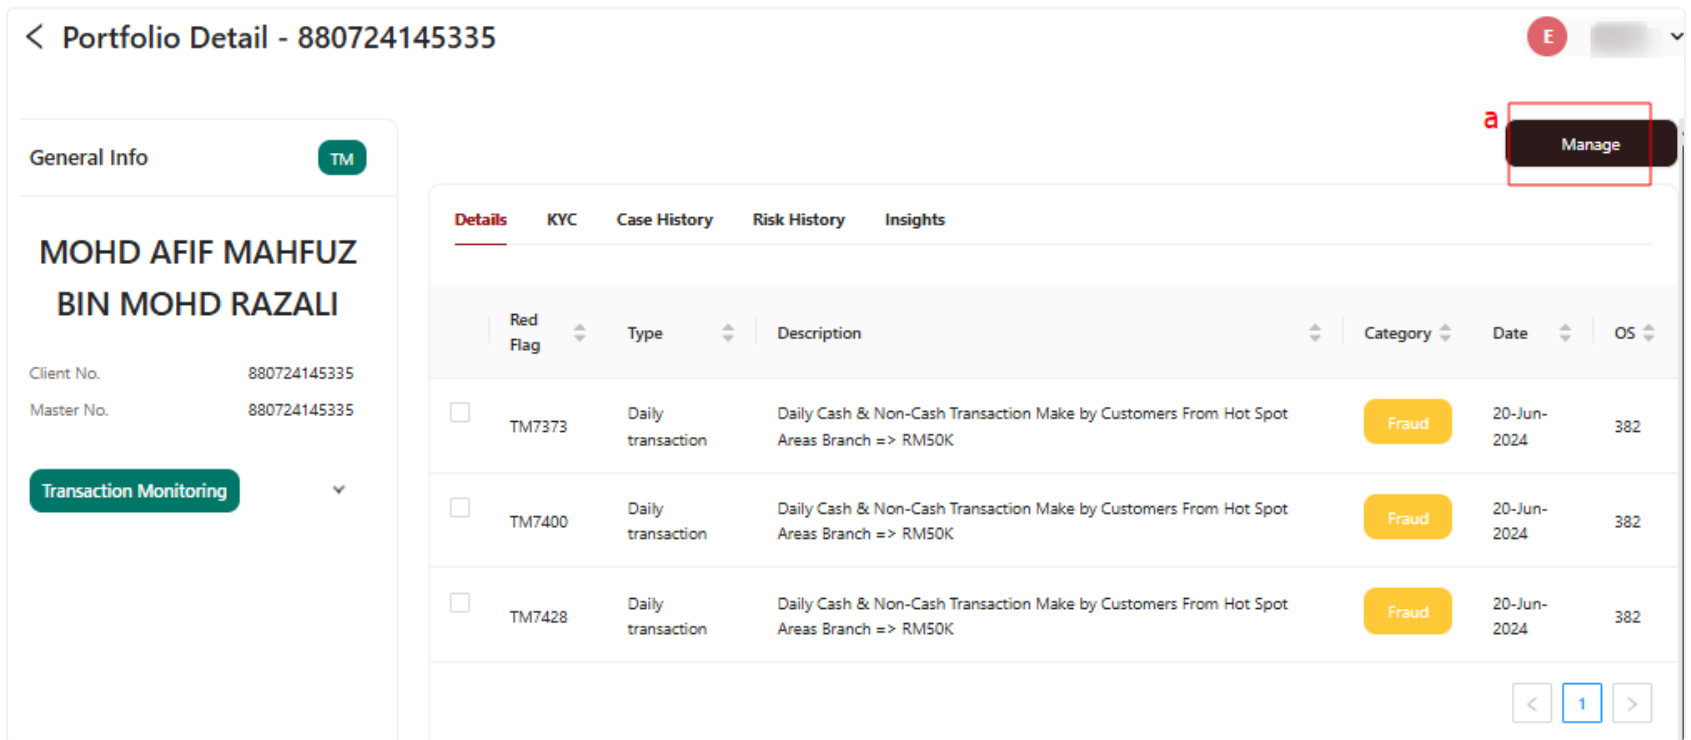

Figure 2.25: Manage button - red flags

1. The (a) manage button is to manage the red flag. The system will automatically select all the red flags when performing the actions. Users are not able to de-select the red flags to ensure proper investigation is being done without missing any red flags.
2. The action button to manage red flags only displays red flags that belong to the client master number and ID selected.
3. The action button to manage red flags only displays red flags that are open or yet to be assigned to a case.
4. The action button to manage red flags allows user to confirm their action before creating a case. A confirmation wizard flow will allow users to select yes or no to confirm their action.

2.7.1.1 How to Add New Case

1. To create a new red flag case, the user should select one or more red flag checkboxes that they want to report (multiple red flags can be selected under the same client). Then, click on the **"Add New Case"** button as shown in the figure below. *****Note: This button will be automatically deemed if there are active cases created.***

☒	Red Flag	Type	Description	Category	Date Created	OS
☒	TM7373	Daily transaction	Daily Cash & Non-Cash Transaction Make by Customers From Hot Spot Areas Branch => RM50K	Fraud	20-Jun-2024	382
☒	TM7400	Daily transaction	Daily Cash & Non-Cash Transaction Make by Customers From Hot Spot Areas Branch => RM50K	Fraud	20-Jun-2024	382

Figure 2.26: Red Flag Selection

- After selecting the red flags, the user will proceed to the next steps, as shown in the figure below. The user may need to provide a reason in the justification box* for escalating the red flags as a case.
- If there are any supporting documents to include, the user can upload them in the provided box. Finally, click the **"Save"** button.

***Notes:**

- The new red flag that has been escalated as a Red Flag case will be displayed in the Transaction - Case Workflow within the system.
- *The justification must be filled in. but if the justification box is empty, a notification will appear that the justification box is not filled in yet after clicking **"Save"**.
- The attachment file size will be based on the configuration set under Setting – General: Application Site. The attachment features only allow the following file types:
 - Jpg
 - Png
 - Gif
 - Txt
 - Doc and Docx
 - Xlx and Xlsx
 - Pdf

2.7.1.3 How to Drop Red Flag

1. To dismiss red flag cases, the user should click on the **"Drop Red Flag"** button (a), and then select any red flag (b), as illustrated in the figure below:

The screenshot shows a web interface titled "Manage Red Flag" with a close button (X) in the top right corner. Below the title is a "Select action" section with three buttons: "Add New Case" (light gray), "Add to Existing Case" (light gray), and "Drop Red Flag" (dark blue with a red box around it). Below this is a "Red Flag Selection" section containing a table with columns: Red Flag, Type, Description, Category, Date Created, and OS. The table has two rows of data. The first row is selected, indicated by a blue checkmark in the "Red Flag" column and a red arrow pointing to it. The second row is not selected. At the bottom right of the table is a pagination control showing "< 1 >".

Red Flag	Type	Description	Category	Date Created	OS
☒ TM7400	Daily transaction	Daily Cash & Non-Cash Transaction Make by Customers From Hot Spot Areas Branch => RM50K	Fraud	20-Jun-2024	382
☐ TM7428	Daily transaction	Daily Cash & Non-Cash Transaction Make by Customers From Hot Spot Areas Branch => RM50K	Fraud	20-Jun-2024	382

Figure 2.31: Red Flag Selection For Drop Red Flag

2. Following that, the user may need to furnish a reason for dropping the red flag cases in the justification section below. If there are any attachments as supporting documents for the case, the user can upload them and, lastly, click the **"Save"** button.

The screenshot shows a web interface with a "Justification" section and an "Upload Attachments" section. The "Justification" section has a text input area with a placeholder "Write Something" and a "Justification" label. The "Upload Attachments" section has a file upload area with a placeholder "Drop files browse through your machine" and an "Upload Attachments" label. At the bottom is a red "Save" button. Three text boxes provide additional information: "Justification" allows input reasoning on escalating red flags with no minimum character limit; "Upload Attachment" allows uploading supporting documents with no limit on the number of files; and "Save" will escalate all selected red flags with justification and attachments into the case's "module" for further investigation.

Justification allow the input reasoning on escalating the red flags as a case for further investigation. There's no minimum character limit for input.

Upload Attachment allow to upload supporting document that assist on the case investigation. The upload attachment allow selection of file and also drag & drops on the files with no limit of number on the document to be upload.

Save will escalate all the selected red flags with its justification and uploaded attachment into the case's "module" for further investigation by next level officer.
