## Document Control

| Rev. | Date Revised   | Section(s) | Description |
|------|----------------|------------|-------------|
| 1.0  | 05th June 2025 | All        | 1st Version |

## Preface

### 1. Customer & TESS Definition

TESS Innovation Sdn Bhd is hereinafter referred as “TESS” of the other part in this document.

### 2. Document Confidentiality

This document contains information that is proprietary to TESS and The Customer. This document, or any part thereof, shall not be copied, reproduced, translated or reduced to any electronic medium or machine readable form or disclosed to any third party without the prior written consent or authorization of TESS and the Customer.

### 3. Purpose of Document

The purpose of this document is to clearly guide user to perform day by day operation

### 4. Intended Audience

- Project team from TESS
- Project team from The Customer

### 5. Document Control

This document is subject to change control. All changes to this document shall be documented and distributed as “Release Version”. It will consist of the following:-

- Full replacement of the document; or
- Full replacement of a section in the document; or
- An addendum to the document.

Each revision will be assigned with a unique “Release Version” number and date. All pages distributed within a Document Release Notice will have the appropriate Release Version and Release Date indicated.

6. Screenshots

All sample screens as attached are for the reader’s viewing purpose only. The actual screen displayed in the CORAL iSEM™ system shall be based on the specification of The Customer’s as agreed upon.

7. Disclaimer

- All advice given or recommendations made in this document are made in good faith on the basis of the information provided and otherwise generally available or known to TESS at the time of writing.
- No advice given or statements or recommendations made shall be in any circumstances constitute or be deemed to constitute warranty by TESS as to the accuracy of such advices, statement and recommendations.
- Subject to the contents of the Supply of Software, Licensing and Service Agreement executed, TESS shall not be liable for any loss, expense, damage or claim arising out of the advice given or not given or statements made or omitted to be made in connection with this document.
- \*\*This document is **subject to updates**. Please note that it may be revised periodically within the same version to reflect any changes.

8. Product Version

This document is based on product version 1.3. Any other product version may not be relevant to this specific document content and its information.

9. Abbreviation & Definitions

| Abbreviation | Definition                    |
|--------------|-------------------------------|
| CTR          | Cash Transaction Report       |
| STR          | Suspicious Transaction Report |

Overview of Report Extraction

1.1 Apps Process Flow for Report Extraction

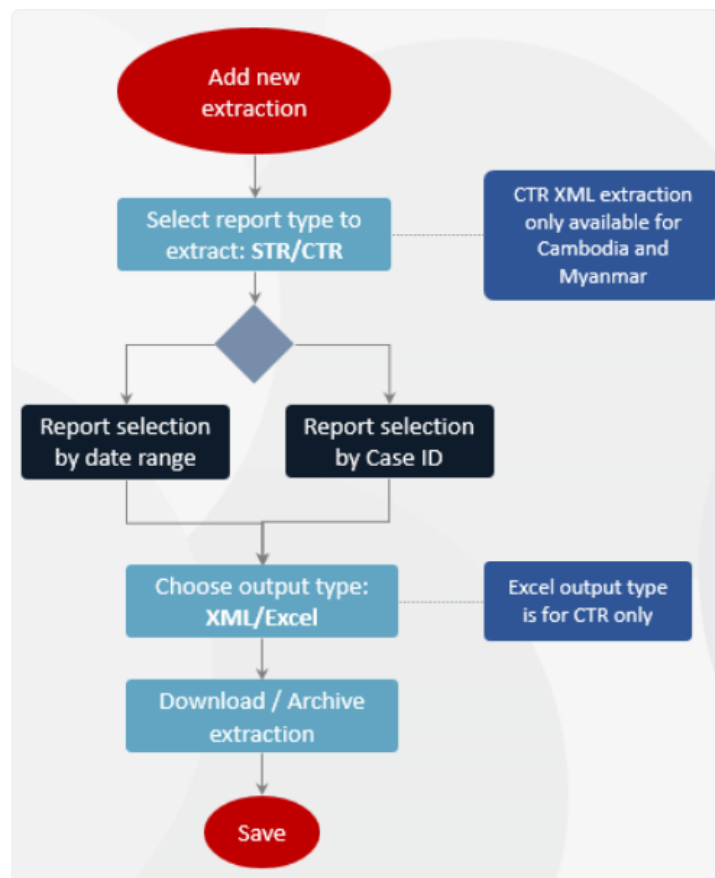

Figure 1.0: Apps Process Flow for Report Extraction

The figure above describes in general the apps process flow for Report Extraction features and functions.

## 2. Main Page

### 2.1 Main Page □ Report Extraction

This section displays the list of Report Extraction for **"My Extractions"** and **"All Extractions"**.

Figure 2.0: List of Report Extraction

The information displayed is in the table below:

| # | Name          | Description                                                                               |
|---|---------------|-------------------------------------------------------------------------------------------|
| 1 | Extraction ID | Display the submission ID reference number. Each upload will be given a unique upload ID. |
| 2 | File Name     | Display the full name of the file.                                                        |

|    |                           |                                                                                                                                                                                                                                                                                                                                        |
|----|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3  | Report Type               | Display the type of extracted report: <ul style="list-style-type: none"> <li>• STR</li> <li>• CTR</li> </ul>                                                                                                                                                                                                                           |
| 4  | Total Record              | Display the total record extracted to the file.                                                                                                                                                                                                                                                                                        |
| 5  | File Type                 | The extracted report file type: <ul style="list-style-type: none"> <li>• XML</li> <li>• Excel</li> </ul>                                                                                                                                                                                                                               |
| 6  | Date Extracted            | Display the date the report was extracted.                                                                                                                                                                                                                                                                                             |
| 7  | Extracted by              | Display the user's name who extracted the report.                                                                                                                                                                                                                                                                                      |
| 8  | Status                    | Displays the status of the report extractions: <ul style="list-style-type: none"> <li>• Archived</li> <li>• Active</li> </ul>                                                                                                                                                                                                          |
| 9  | Activity                  | <ol style="list-style-type: none"> <li>1. <b>Download Template:</b> Allows users to download files.</li> <li>2. <b>Archive:</b> Allows user to archive the uploaded file record.</li> <li>3. <b>"Eye" Icon:</b> Allow user to view more information and update the Extracted Report.</li> </ol>                                        |
| 10 | Columns                   | To show/hide columns of extracted report list as desired.                                                                                                                                                                                                                                                                              |
| 11 | Searchability & Filtering | <p>To filter values inside the ODD Case workflow table</p> <ul style="list-style-type: none"> <li>• Can combine multiple data column using AND</li> <li>• The filtering should display the item description instead the operator type.</li> <li>• Condition for filtering item type: =, &gt;, &lt;, &gt;=, &lt;=, &lt;&gt;.</li> </ul> |
| 12 | + Add New                 | Allow to add new user record into the report extraction list.                                                                                                                                                                                                                                                                          |

### 2.1.1 How to Extract STR/CTR?

This section outlines the process of how users can extract STR or CTR.

#### Steps to Extract STR/CTR:

1. In order to extract STR/CTR, it would be done in the Report Extraction subsection.
2. Users need to click on **"+ Add New"** and it will navigate them to select report type and data extraction method.
3. Once that has been done, users will proceed to search or click the **"Next"** button to open **"Extraction File"**.

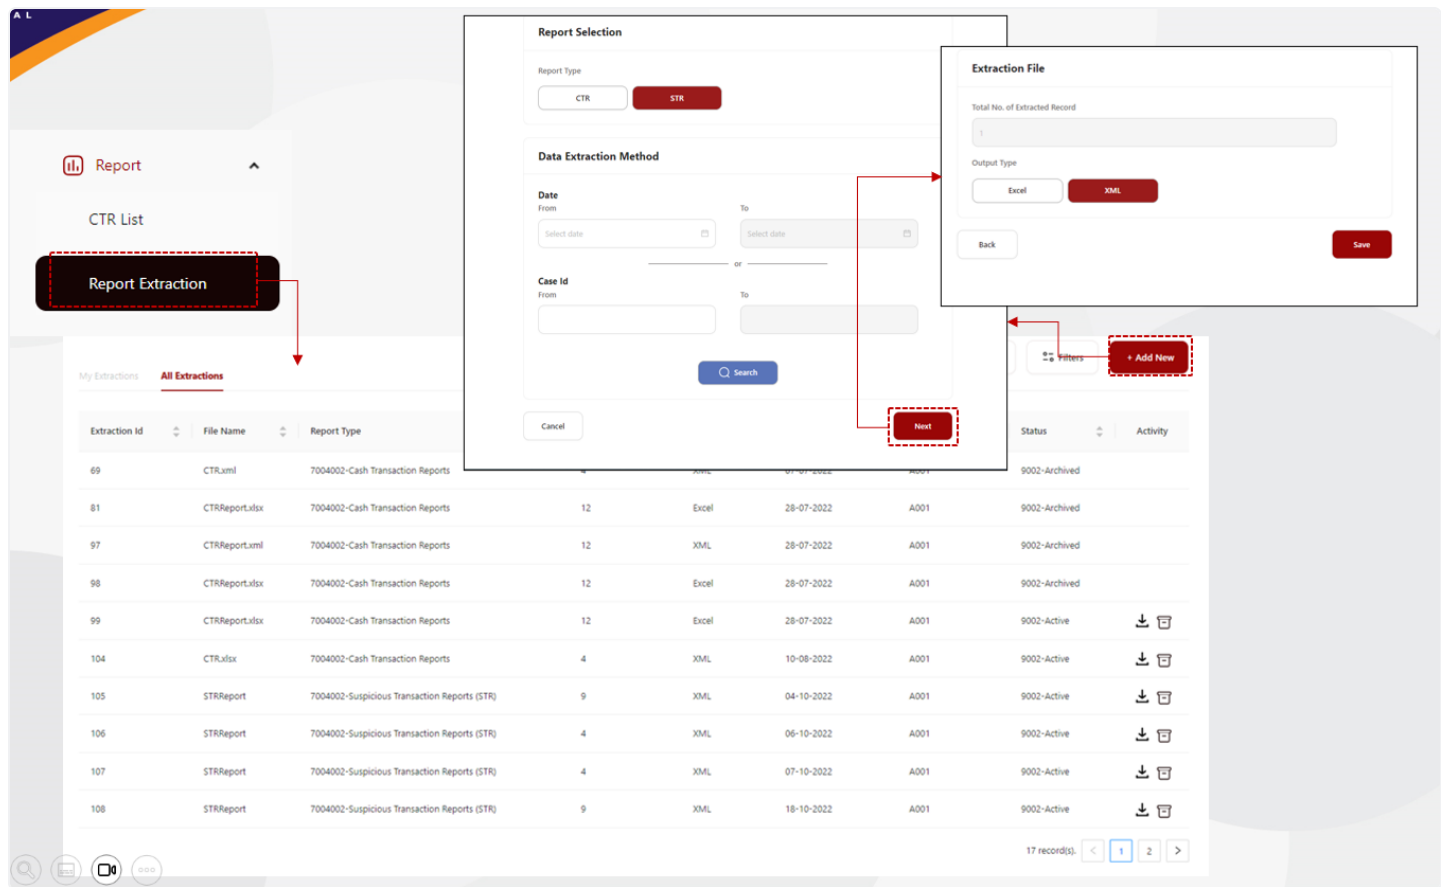

Figure 2.1: How to Extract STR/CTR

4. The total number of extracted record and output type (Excel or XML) will need to be inserted by the users before saving the changes.
5. If users want to filter columns of cases, click "**Columns**" tab to filter the searches.
6. If users want to filter values inside of cases, click "**Filters**" tab to filter the searches.
7. In the "**Activity**" column, users have the option to "**Download**", "**Archive**", and "**View**" extracted reports.
