Overview of Onboard Batch Screening

1. About Onboard Batch Screening

This menu allow users to upload a set of names with the purpose to screen those names against watchlist or client database simultaneously.

1.1 Apps Process Flow to Manage Batch Screening

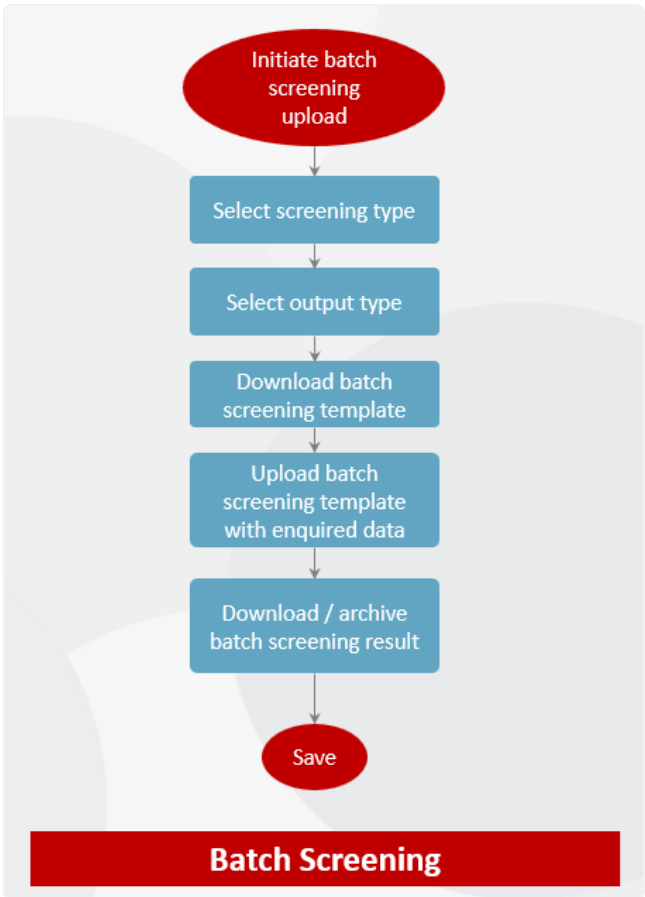

Figure 1.0: Apps Process Flow to Manage Batch Screening

2. Batch Screening

2.1 Batch Screening □ Batch Screening Details

2.1.1 How to Manage Batch Screening?

This section outlines how users can manage batch screening under Watchlist.

Steps to Manage Watchlist Batch Screening:

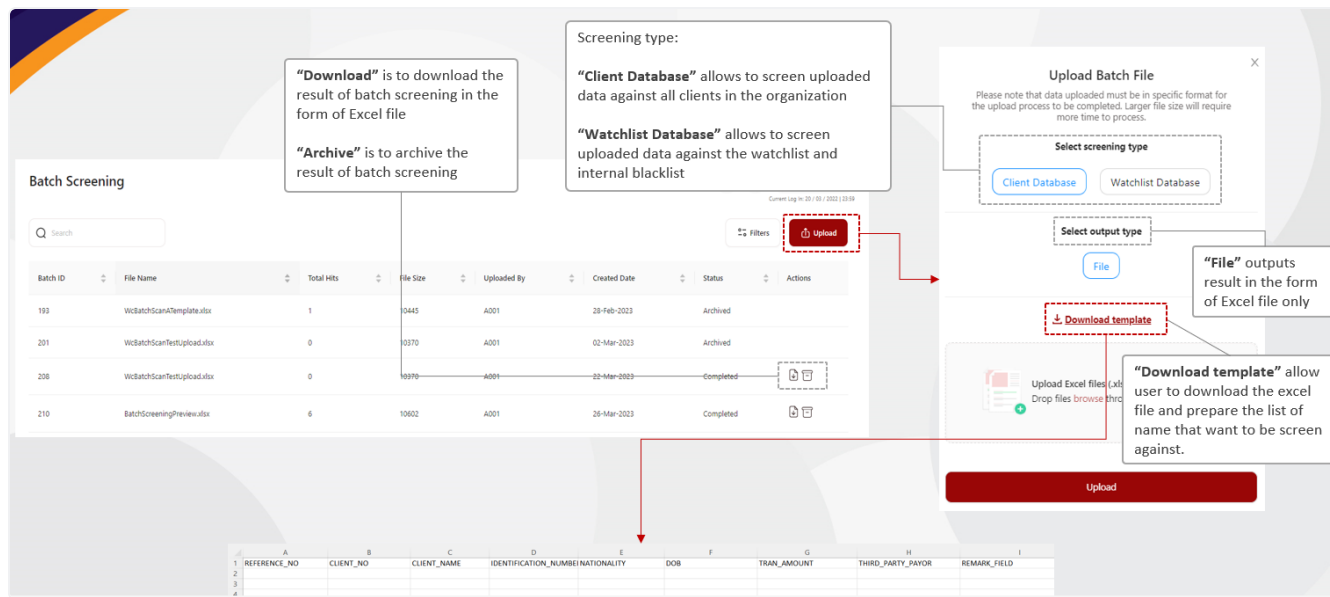

Figure 2.0: How to Manage Batch Screening

1. If users click the **"Upload"** button, they can upload batch files for screening.
2. Users are able to select screening type from two different databases:
 - a. Client Database
 - b. Watchlist Database
3. User can select the output type for the batch file in the form of an Excel file.
4. If users click on **"Download template"**, users can download the Excel file and prepare the list of names that want to be screened against.
5. Users can also upload Excel files and more if relevant to the batch files.
6. Users are also able to **"Download"** the result of batch screening in the form of an Excel file or **"Archive"** the result of batch screening.

2.1.1.1 Batch Screening Details Attributes

Search 1 10 Filters 11 Upload								
2 Batch ID	3 File Name	4 Total Hits	5 File Size (Bytes)	6 Upload By	7 Upload Date	8 Status	9 Action	
259	WcBatchScanATemplate.xlsx	0	10445	A004	24-Apr-2024	Archived		
260	WcBatchScanATemplate.xlsx	0	10445	A004	24-Apr-2024	Completed	i. ii.	
261	WcBatchScanATemplate.xlsx	0	10445	A004	24-Apr-2024	Pending	iii.	

Figure 2.1: Batch Screening Details

The display information is in the table below:

#	Name	Description
1	Search Bar	Accepts user input to be searched for in database.
2	Batch ID	• Display the batch ID reference number. • Each upload will be given a unique batch ID.
3	File Name	Display the batch file name.
4	Total Hits	Display the total record that match against client database or watchlist database.
5	File Size (Bytes)	Display the file size in MB (Megabytes).
6	Upload By	Display the user's name that uploaded the file.
7	Upload Date	Display the date that this file is uploaded by the user.
8	Status	Display the status of the file: • Pending: File waiting in queue to be uploaded. • In Progress: File in-progress of being uploaded to the system database. • Completed: The file successfully uploaded into the system database. • Error: Fail to upload the file into the system database.
9	Actions	i. Download: Allows user to re-download the uploaded file for reference purpose. ii. Archive: Allows user to archive the uploaded file record. iii. Ingest: Allows users to execute the batch screening. The action button is only available once status is changed to completed.
10	Searchability & Filtering	To search any information related to the table's column data. • Can combine multiple data column using AND • The filtering should display the item description instead the operator type. • Condition for filtering item type: =, >, <, >=, <=, <>
11	Upload Attachment	Allow users to upload attachments when needed.

2.2 Batch Screening Details ▯ Filters

The active-passive filtering can automatically display the correct filtering type based by the data type. Once the **"Filters"** button is clicked, this panel will pop-up on the right side of the screen.

The screenshot shows a 'Filters' pop-up window. It has a title bar with a close button (X) and a maximize button. The main area contains several input fields and buttons. Red boxes and numbers 1 through 7 highlight specific elements: 1. Operator (dropdown menu), 2. Column Name (dropdown menu), 3. Condition (dropdown menu), 4. Input Value (text input field), 5. Add button (circular button with a plus sign), 6. Condition Preview (text area showing 'No condition.'), and 7. Reset and Apply buttons (a group of two buttons at the bottom right).

Figure 2.2: Filters Pop-up Screen

The display information is in the table below:

#	Name	Description
1	Operator	AND or OR : • Can only be selected once a condition has been added. • To prevent user error.
2	Column Name	User can select a specific column name in the drop-down list.
3	Condition	• User can combine multiple data column using AND to get better output result. • Condition for filtering item type: =, >, <, >=, <=, <>.
4	Input Value	If the data column is a normal text character, user can manually input the value.
5	Add Button	To apply values that have been input in "Input Value" .

6	Condition Preview	Displays the description of the activity that has been input in "Column Name", "Condition", and "Input Value" after the "Add Button" has been clicked. Example: - Column Name: Status Condition: Greater Than Input Value: 2 ☐ Condition Preview: Status Greater Than 1
7	Action Buttons	1. Reset: Allows user to reset all forms of values to its initial values. 2. Apply: Applies changes to the settings that have been made for filtering.

2.3 Batch Screening Details ☐ Upload Batch Files

2.3.1 Upload Batch Files

The pop-up screen "**Upload Batch Files**" will appear after user clicks the "**Upload**" button. It allows users to upload file containing a set of names into the system database.

The screenshot shows the 'Upload Batch File' interface. At the top, a title 'Upload Batch File' is followed by a note: 'Please note that data uploaded must be in specific format for the upload process to be completed. Larger file size will require more time to process.' Below this, there are two main sections. The first section, labeled '1', contains a red box around the 'Select screening type' label, with two buttons below it: 'Client Database' (highlighted with a blue border) and 'Watchlist Database'. The second section, labeled '2', contains a red box around the 'Select output type' label, with a 'File' button below it. Below these sections is a horizontal line, followed by a red box around the 'Download template' link (labeled '3'). Underneath is a dashed box containing an 'Upload Excel files (.xlsx)' section (labeled '4'), which includes a plus icon and the text 'Drop files browse through your machine'. At the bottom of the form is a large red 'Upload' button (labeled '5').

Figure 2.3: Upload Batch File

The display information is in the table below:

#	Name	Description
1	Select Screening Type	There are two types of screening: • Client Database: Screen against the entire client database. • Watchlist Database: Screen against the entire watchlist database.
2	Select Output Type	File: • Batch file will screen based by the screening type and generate the result in the file. • User can download the result file once completed.
3	Download Template	Allow user to download the standard template to fill in the template.
4	Upload Attachment	Allow users to upload attachments when needed.
5	Upload Button	This action saves and uploads the batch files.

2.3.2 Batch Screening Template References

A	B	C	D	E	F	G
